BrightEra[™]

HDMI[™]
HIGH DEFINITION MULTIMEDIA INTERFACE

Bright, Stylish, Easy to Install, and Simple to Use – You Can Even Make Presentation via a Network

The VPL-FX41*, VPL-FE40, and VPL-FX40 Data Projectors from Sony are ideal for vivid, clear presentations in many locations, from university classrooms to enterprise boardrooms and beyond.

Delivering extremely bright images from sophisticated bodies, these are excellent projectors for high-impact multimedia presentations. The VPL-FX41 provides an outstanding brightness of 5200 lumens, while the VPL-FE40 and VPL-FX40 offer a high brightness of 4000 lumens.

For applications ranging from business conferences and seminars to education, in locations such as boardrooms, large conference rooms, R&D facilities, and university classrooms, these projectors will captivate audiences with breathtaking image quality.

The VPL-FE40 offers incredible SXGA+ resolution to project clear and crisp images even on large screens, while the VPL-FX41 and VPL-FX40 offer native XGA resolution for high image quality.

With their outstanding functionality, simple operation, and network capabilities, these projectors provide you with the tools to perform seamless presentations. The projectors' ability to accept a broad array of signals, including those from sources equipped with the latest High-Definition Multimedia Interface™ (HDMI™), can make your presentations more dynamic than ever before. And with the model variants VPL-FX41L, VPL-FE40L, and VPL-FX40L, you can choose a lens that meets the requirements of your specific applications.

System integrators will appreciate the projectors' design – which includes features for easy installation, such as a centered lens and power zoom, focus, and shift – while maintenance personnel can easily replace lamps and clean filters as these are simple to access.

With all the features and functionality that you expect from Sony, particularly those for installation, projection, usability, and maintenance, the VPL-FX41, VPL-FE40, and VPL-FX40 are perhaps the most thoughtfully designed projectors available today. Take your presentations to the next level!

* Unless otherwise stated, VPL-FX41 (or VPL-FE40 / VPL-FX40) refers to both VPL-FX41 (or VPL-FE40 / VPL-FX40) and the model variant VPL-FX41L (or VPL-FE40L / VPL-FX40L).

Features

High-quality Images and Incredible Performance

Outstanding Brightness of 5200/4000 Lumens in a Beautifully Styled Projector

The VPL-FX41 data projector provides an outstanding brightness of 5200 lumens, while the VPL-FE40 and VPL-FX40 data projectors offer a high brightness of 4000 lumens. This allows for dynamic, large-screen presentations even in high ambient lighting environments. By combining a new generation of inorganic LCD panels that utilize Sony BrightEra™ technology* with a powerful 275W lamp, these beautifully styled projectors are excellent for bringing your presentations to life.

* "BrightEra" is a brand name for the category of next generation LCD panels having pixels with large aperture ratios and adopting inorganic alignment films. Sony is the first manufacturer to succeed in developing this technology for a High-Temperature Polysilicon (HTPS) TFT LCD panel.

Extremely High Resolution (SXGA+ or XGA)

Offering native SXGA+ (1400 x 1050) resolution, the VPL-FE40 projects extremely clear and detailed high-quality images even on a large screen. And the VPL-FX41 and VPL-FX40 offer native XGA (1024 x 768) resolution for high picture quality.

SXGA+ Resolution: Clear and Detailed Images
(simulated image)

3LCD Projection System

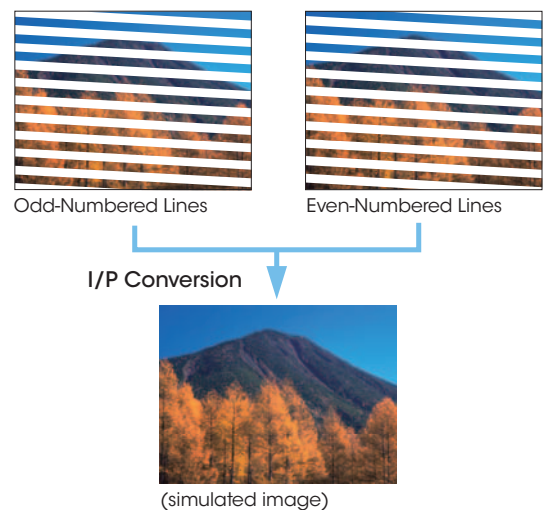

Because the VPL-FX41, VPL-FE40 and VPL-FX40 adopt a 3LCD projection system, projected images are bright and natural. 3LCD is a projection system using three LCD panels (also known as high-temperature polysilicon or HTPS). This system provides high light transmission and excellent color reproduction. It also provides smooth gradients in dark areas, and even helps prevent color breakup.

Dynamic Detail Enhancer (DDE) for High-Quality Video Images

This unique Sony video-enhancing technology incorporated in the VPL-FX41, VPL-FE40 and VPL-FX40 projectors generates high-quality images of outstanding clarity. For interlaced video sources, I/P (Interlace/Progressive) conversion is applied to the signals to project clear and sharp progressive images. When displaying film-originated sources, signals converted by 2-3/2-2 pull down are detected, and each frame of the original film is accurately reproduced.

12-bit 3D Gamma Correction and 3D Digital Comb Filter

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors incorporate 12-bit 3D Gamma Correction circuitry to perform highly accurate gamma correction, achieving uniform image color and brightness that extends right to the corners of the screen. What's more, the 3D Digital Comb Filter separates Y signals from C signals with great accuracy, which emphasizes fine images and shape boundaries.

Installation Flexibility and Easy Maintenance

Power Zoom/Focus/Lens Shift (Horizontal and Vertical)

The Zoom, Focus, and Horizontal and Vertical Lens Shift functions available with the projectors' supplied power-operated lens and optional lenses* can be controlled both from the projector control panel and the supplied Remote Commander™ unit. Images can be easily adjusted to the desired settings both during installation and when the projector is in use.

*Not available with the optional VPLL-1008 fixed-type lens.

Centered Lens Design

The centered lens provides symmetry for a balanced installation of the VPL-FX41, VPL-FE40 and VPL-FX40 projectors, and makes setup very simple.

Flexible Orientation

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors can be tilted 90 degrees upwards or downwards. This flexibility allows the projectors to be used in several different ways, including in a rear projection system.

Rear Projection System

Twin Stacking Capability

When applications require double the light output, the VPL-FX41, VPL-FE40 and VPL-FX40 projectors can be twin-stacked*. Pictures from the two projectors are then matched using the Picture Shift function on each unit.

*The optional VPLL-1008 lens cannot be used when twin stacking.

Direct Power On

Activating this function allows you to skip standby mode to power on the VPL-FX41, VPL-FE40 and VPL-FX40 projectors immediately. Direct Power On is ideal for large-scale facilities such as museums, auditoriums, and conference halls, with images ready for projection as soon as the circuit-breaker on the switchboard is turned on.

ID Function for Multi-Projector Installation

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors have a built-in ID function, so each projector can be controlled independently from a single Remote Commander unit. For multi-projector installations in a single room, this feature is indispensable both during installation and operation.

Variety of Optional Lenses

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors are each supplied with a power lens as standard for most general applications. If a specific application requires a special lens, the VPL-FX41L, VPL-FE40L and VPL-FX40L are available. The lens is not included with these projectors, so any of four optional lens types can be selected. This flexibility allows the VPL-FX41L, VPL-FE40L and VPL-FX40L to be used for a number of applications – from long-distance projection in large auditoriums to short-distance rear-projection applications.

* When using the VPLL-1008 lens, the center of the image projected from the lens must be perpendicular to and aligned with the center of the screen vertically (mirror usage is acceptable). Also, the projector cannot be installed upside-down when using this lens.

** Distance between the center of the projector lens and the screen, divided by the screen width.

*** Viewable area, measured diagonally.

Easy Lamp Replacement and Filter Cleaning

When it's time to replace the lamp in the VPL-FX41, VPL-FE40 and VPL-FX40 projectors, a timely message appears clearly on the screen. The lamp is accessible from the side of the projector and the filters from the front, so lamp replacement and filter cleaning can be performed without uninstalling the projector.

The air filter of the VPL-FX41 is on one side **a** only.

Maintenance and Notifications Via Network

Because the VPL-FX41, VPL-FE40 and VPL-FX40 projectors can be connected to a LAN, a number of functions can be performed remotely using a web browser. * For example, the projector's current status can be verified and simple controls, such as powering the unit on or off, can be performed. Also, the system can be set up to send automatic e-mail reports to designated recipients for scheduled maintenance, including projected lamp life and error reports.

* Internet Explorer 5.0 or higher is required.

Digital Keystone Adjustment

Vertical Keystone distortion of up to ± 30 degrees can be digitally corrected via the OSD and/or Remote Commander unit of the VPL-FX41, VPL-FE40 and VPL-FX40 projectors. This enables detailed images to be projected with their correct geometry, even when installation space is limited.

Multiple Interfaces for Flexible Operation

Multitude of Inputs

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors accept a wide variety of input signals, including HDMI (the latest standard for digitally connecting to high-definition systems), component and composite video, S-Video (Y/C), and computer signals up to UXGA (fV: 60 Hz) – which expands the system-connection possibilities.

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors are equipped with five BNC connectors, so they can accept signals from sources such as workstations or professional video equipment, and these sources can be located far away from the projector because the interfaces support long-distance signal transmission.

Monitor Output for Presenters

Projected images can be monitored by connecting a PC monitor to the VPL-FX41, VPL-FE40 and VPL-FX40 projectors' monitor output and placing it in the presenter's field of view. This allows the presenter to continually face the audience during the presentation for a fluid and professional delivery.

Multi-Language OSD (On-Screen Display)

The OSD used for control of the VPL-FX41, VPL-FE40 and VPL-FX40 projectors is available in 16 languages: English, Dutch, French, Italian, German, Spanish, Portuguese, Russian, Swedish, Norwegian, Japanese, simplified Chinese, traditional Chinese, Korean, Thai, and Arabic.

Quiet Operation

The VPL-FX41, VPL-FE40 and VPL-FX40 projectors are incredibly quiet, allowing for smooth and undisturbed presentations. The low fan noise is attributed to a highly efficient cooling system based on Sony's latest technology.

Multi-Function Remote Commander Unit

The supplied Remote Commander unit for the VPL-FX41, VPL-FE40 and VPL-FX40 is useful for both setting up the projector during installation and changing settings for a presentation.

This unit has buttons for direct input selection, so users do not have to toggle through the entire range of inputs to select the desired one. With the projector ID function, each projector in a multiple-projector installation can be controlled independently from a single remote.

Network Presentations

When the VPL-FX41, VPL-FE40 and VPL-FX40 projectors are installed on a LAN, presentations can be projected from any PC on that network* – whether connected via a LAN cable or wirelessly. Switching from presenter to presenter is as easy as clicking a mouse – there’s no fussing with cables.

*Requires supplied application software to be installed on your PC.

High-Speed Image Transfer over IP Networks

Because the VPL-FX41, VPL-FE40 and VPL-FX40 projectors employ efficient compression and transmission techniques, they can receive and project images via IP networks for effective presentations from any networked PC. In fact, they can even handle animated Microsoft® PowerPoint® presentations.

Network Presentations Using Up To Five Projectors

Up to five VPL-FX41, VPL-FE40 or VPL-FX40 projectors can be connected to a network, with the image from a single PC projected on each of them. This feature is ideal for both large venues and multiple rooms in which images have to be projected from various locations.

Network Presentations Almost Anywhere

By manually registering your PC’s IP address to the VPL-FX41, VPL-FE40 and VPL-FX40 projectors, images can be projected not only across the country, but across the globe. This is ideal for applications such as distance learning and long-distance corporate communication.

Network Presentation System Diagram

System Requirements to Run Supplied Application Software	
Hardware	CPU: Intel® Pentium® III 600-MHz processor or faster, and CPU recommended by OS
	Memory: 64 MB or more (128 MB or more is recommended), and Memory recommended by OS
	Hard disk: 10 MB or more of free capacity
	Other hardware requirements: CD-ROM drive
Operating System	Microsoft® Windows® 98 SE, Windows ME, Windows 2000, Windows XP Home Edition, Windows XP Professional Edition, Windows Vista Home Basic, Windows Vista Home Premium, Windows Vista Ultimate, Windows Vista Business
Browser	Internet Explorer 5.0 or higher
Display	Color resolution: 16-bit, 24-bit, or 32-bit
Network	RJ-45: 10BASE-T/100BASE-TX

Sony cannot guarantee that application software will run properly even though all of the above system requirements are met.

Notice Regarding Network Presentations:

- When an image is sent from a computer to the VPL-FE40 projector, the image is processed using 1024 x 768 pixels.
- Animation effects and the slide show function in Microsoft PowerPoint presentations can be used; however, transmission delays may occur if a large number of effects are performed at once or if several slides are turned at once.
- Network transmission is not suitable for video.
- Network transmission should not be used with sound.
- Applications that use DirectX® application programming interface may not be displayed properly.
- When using Windows Vista, Windows XP, or Windows 2000 Operating Systems, the user must be logged into an account with computer administrator access.
- Application software is provided in English and Japanese.
- Network presentations may not be possible depending on the network environment and available bandwidth.

Other Features

- Smart APA (Auto Pixel Alignment)
- Password-Authentication System
- Picture/Audio Muting

For both Floor and Ceiling Mount Installations, image can be shifted horizontally by +/- 10 percent of the screen width.
 * Viewable area, measured diagonally.

Dimensions

Unit: inches (mm)

Specifications

	VPL-FX41 (lens is supplied) VPL-FX41L (lens is optional)	VPL-FE40 (lens is supplied) VPL-FE40L (lens is optional)	VPL-FX40 (lens is supplied) VPL-FX40L (lens is optional)
Optical			
Projection system	3 LCD panels, 1 lens projection system		
LCD panel	0.79-inch XGA panel, 2,359,296 (1024 x 768 x 3) pixels	0.79-inch SXGA+ panel, 4,410,000 (1400 x 1050 x 3) pixels	0.79-inch XGA panel, 2,359,296 (1024 x 768 x 3) pixels
Projection lens	VPL-FX41/FE40/FX40 : 1.3 times power zoom lens, f 30.6 to 39.7 mm, F 1.66 to 2.18 VPL-FX41L/FE40L/FX40L : Not supplied		
Lamp	275 W ultra high pressure lamp		
Screen coverage	VPL-FX41/FE40/FX40: 40 to 600 inches (viewable area measured diagonally) VPL-FX41L/FE40L/FX40L: 40 to 600 inches (with VPLL-Z1014 VPLL-Z1024 or VPLL-Z1032) (viewable area measured diagonally) 60 to 300 inches (with VPLL-1008) (viewable area measured diagonally)		
Light output	5200 lumens (lamp mode high) 4160 lumens (lamp mode standard)	4000 lumens (lamp mode high) 3200 lumens (lamp mode standard)	
Signals			
Color system	NTSC3.58, PAL, SECAM, NTSC4.43, PAL-M, PAL-N, PAL60 (automatically/manually selected)		
Resolution	Video: 750 TV lines, RGB: 1024 x 768 pixels	Video: 750 TV lines, RGB : 1400 x 1050 pixels	Video: 750 TV lines, RGB : 1024 x 768 pixels
Acceptable computer signals	fH: 19 to 92 kHz, fV: 48 to 92 Hz (Up to UXGA (fV 60 Hz))		
Acceptable video signals	15 kHz RGB 50/60 Hz, Progressive Component 50/60 Hz, DTV (480/60i, 575/50i, 480/60p, 575/50p, 720/60p, 720/50p, 1080/60i, 1080/50i, 1080/60p, 1080/50p), Composite Video, Y/C video		
Speaker			
	1.8 W x 2 (stereo)		
General			
Dimensions (W x H x D)	21 x 5 3/4 x 13 7/8 inches, (532 x 145 x 352 mm)		
Weight	VPL-FX41/FE40/FX40: Approx. 21 lb 10 oz (9.8 kg) VPL-FX41L/FE40L/FX40L: Approx. 19 lb 13 oz (9.0 kg)		
Power requirements	AC 100 to 240 V, 4.1-1.7 A, 50/60 Hz		
Power consumption	Max. 400 W, standby 15 W (standard mode) / 0.5 W (low mode)		
Heat dissipation	1365 BTU		
Operating temperature	32 to 95 °F (0 to 35 °C)		
Operating humidity	35 to 85 % (no condensation)		
Storage temperature	-4 to 140 °F (-20 to 60 °C)		
Storage humidity	10 to 90 %		
Inputs/Outputs			
Video In	Video	Composite Video (RCA phono jack)	
	S Video	Y/C Mini DIN 4-pin	
	Audio	Stereo (RCA phono jack x 2)	
Input A	Analog RGB	HD D-sub 15-pin (female)	
	Audio	Stereo mini jack	
Input B	Analog RGB	HD D-sub 15-pin (female)	
	Audio	Stereo mini jack	
Input C	Analog RGB/Component	BNC x 5 (female)	
	Audio	Stereo mini jack	
Input D	Digital RGB/Audio	HDMI (HDCP)	
Input E	Network	10BASE-T/100BASE-TX: RJ45	
Output	Monitor out	HD D-sub 15 pin (female)	
	Audio out	Stereo mini jack (Variable out)	
Remote	RS-232C: D-sub 9 pin (female)		
Control S IN	Stereo mini jack (plug-in-power)		
Supplied accessories			
	Remote Commander Unit (1), Size AA (R6) batteries (2), Lens Cap (1) (for VPL-FX41, VPL-FE40 & VPL-FX40), Lens hole cover (1) (for VPL-FX41L, VPL-FE40L & VPL-FX40L), AC power code (1), Operating Instructions and Application Software (CD-ROM) (1), Quick Reference Manual (1), Safety Regulations (1), Security Label (1)		

- Halogenated flame retardants are not used in cabinets or printed wiring boards.
- Standby power consumption: 0.5 W
