Location and Function of Controls

Main unit

- ❶ **Lens (page 34)**
- ❷ **Focus ring (page 13)**
- ❸ **Zoom lever (page 13)**
- ❹ **Lens shift dial (page 13)**
- ❺ **Front panel (page 34)**
- ❻ **Rear panel (pages 31, 33)**
- ❼ **Ventilation holes (intake)**
- ❽ **Ventilation holes (exhaust)**

Caution

Do not place anything near the ventilation holes as this may cause internal heat buildup. Do not place your hand near the ventilation holes and the circumference as this may cause injury.

- ❾ **ON/STANDBY indicator (page 27)**
- ❿ **LAMP/COVER indicator (page 27)**
- ⓫ **Control panel (page 5)**

- ❿ **Connector panel (page 4)**
- ⓬ **Remote control detector**
- ⓭ **Adjusters (page 13)**
- ⓮ **Security lock**
Connects to an optional security cable manufactured by Kensington. For details, visit Kensington's web site. <http://www.kensington.com/>
- ⓯ **Security bar**
Connects to a commercially available security chain or wire.

Connector Panel

Input (pages 8, 9)

1 INPUT A

Video: RGB/YPbPr input connector (RGB HD VD/YPbPr)
Audio: Audio input connector (AUDIO)

2 INPUT B

Video: RGB input connector (RGB)
Audio: Audio input connector (AUDIO)

3 INPUT C

Video: DVI-D input connector (DVI-D)
Audio: Audio input connector (AUDIO)

4 S VIDEO (S VIDEO IN)

Video: S video input connector
Audio: Audio input connector (AUDIO L [MONO]/R)

5 VIDEO (VIDEO IN)

Video: Video input connector
Audio: Audio input connector (AUDIO L [MONO]/R)

Note

The audio input connectors of the projector are for output to external equipment. Connect external audio equipment to output an audio (page 11). The audio inputs of INPUT B and INPUT C are shared. The audio inputs of S VIDEO and VIDEO also are shared.

Output (page 11)

6 OUTPUT

Video: Monitor output connector (MONITOR)

Audio: Audio output connector (AUDIO)

Note

This connector outputs the projected image and audio. The image is output as a computer signal input from the RGB input connector or a video signal input from the YPbPr input connector.

Others

7 RS-232C connector

RS-232C compatible control connector

8 LAN connector (page 24)

9 CONTROL S input connector (DC power supply) (CONTROL S IN PLUG IN POWER)

Connects to the CONTROL S output connector on the supplied Remote Commander with a connecting cable (stereo mini plug (not supplied)) when using it as a wired Remote Commander. You do not need to install batteries in the Remote Commander, as the power is supplied from this connector.

10 AC IN (~) socket

Connects the supplied AC power cord.

Remote Commander and Control Panel

Remote Commander

Control Panel

1 Turning on the power/Going to standby mode

- ⏻ (On) key
- ⏻ (Standby) key

2 Selecting an input signal (page 12)

- INPUT** key (main unit)
- Direct input select keys** (Remote Commander)

3 Operating a menu (page 15)

- ENTER** /▲/▼/◀/▶ (arrow) keys
- MENU** key
- RETURN** key
- RESET** key

4 Adjusting the image (page 13)

- FOCUS** key
- This function is not provided in this projector.

- ZOOM** key
- This function is not provided in this projector.

- SHIFT** key
- This function is not provided in this projector.

- ASPECT** key (pages 17, 18)
- Changes the aspect ratio of the projected image.

- KEystone** key
- Adjusts the vertical trapezoidal distortion of the image manually. When you press this key, the Keystone menu is displayed. Use the arrow keys (▲/▼/◀/▶) for adjustment.

- PATTERN** key
- APA (Auto Pixel Alignment) key***
- Automatically adjusts a picture to its clearest while a signal is input from a computer. You can cancel the adjustment by pressing the APA key again while adjusting.

Note
* Use this key when inputting a computer signal via the RGB input connector.

5 Using various functions during projecting

D ZOOM (Digital Zoom) +/- key*1

Enlarges a portion of the image while projecting.

- 1 Press the D ZOOM + key to display the digital zoom icon on the projected image.
- 2 Press the $\uparrow/\downarrow/\leftarrow/\rightarrow$ keys to move the digital zoom icon to the point on the image you wish to enlarge.
- 3 Press the D ZOOM + key or the D ZOOM – key repeatedly to change the enlargement ratio. The image can be enlarged up to 4 times.

Press the RESET key to restore the previous image.

MUTING key

PIC: Cuts off the image. Press again to restore the image.

AUDIO: Mutes the audio output. Press again to restore the previous volume.

VOLUME +/- key

For adjusting the volume output from the audio output connector of the projector.

TWIN (double-window) key

This function is not provided in this projector.

FREEZE key*2

Pauses a projected image. Press again to restore the image.

Notes

*1: Use this key when inputting a computer signal. But it may not be used depending on the resolution of the input signal.

*2: Use this key when inputting a computer signal.

6 Setting the energy-saving mode easily

ECO MODE key

Energy-saving mode can be set easily, using a Remote Commander. Energy-saving mode consists of “Lamp Mode,” “Power Saving Mode” and “Standby Mode.”

- 1 Press the ECO MODE key to display the ECO Mode menu.

ECO Mode Menu

- 2 Press the \uparrow/\downarrow key or ECO MODE key to select ECO or User mode.

ECO: Sets each mode to the optimum energy-saving value.

Lamp Mode: Standard

Power Saving Mode: Standby

Standby Mode: Low

(go to step 6)

User: Sets each item of the energy-saving mode menu as you desire (go to step 3).

- 3 Select “User” then press the \rightarrow key. The setting items appear.

- 4 Press the \uparrow/\downarrow key to select the ECO Mode item then press the ENTER key.
- 5 Press the \uparrow/\downarrow key to select the setting value.
- 6 Press the ENTER key to restore the previous image.

For details on ECO Mode settings, see “Lamp Mode” (page 19) on the Function menu and “Standby Mode” (page 21) and “Power Saving Mode” (page 21) on the Connection/Power menu.

Others

7 Infrared transmitter

8 ID MODE 1/2/3 switch (page 20)

Sets an ID mode of the Remote Commander. If you assign a different ID number to each projector when multiple projectors are used, you can control only the projector with the same ID mode as that of the Remote Commander.

9 CONTROL S output connector

Connects to the CONTROL S input connector on the projector with a connecting cable (stereo mini plug (not supplied)) when using the Remote Commander as a wired one.

You do not need to install batteries in the Remote Commander, as the power is supplied from the projector.

About Remote Commander operation

- Make sure that nothing obstructs the infrared beam between the Remote Commander and the remote control detector on the projector. Direct the Remote Commander toward the remote control detector.
- The operation range is limited. The shorter the distance between the Remote Commander and the projector is, the wider the angle within which the Remote Commander can control the projector becomes.

Connecting the Projector

Notes

- Use the proper cables for each connection.
- Insert the cable plugs firmly; Loose connections may reduce performance of picture signals or cause a malfunction. When pulling out a cable, be sure to grip it by the plug, not the cable itself.
- For more information, refer also to the instruction manuals of the equipment you are connecting.
- Use a no-resistance audio cable.

Connecting a Computer

Connection with a computer is explained for each input signal.

INPUT A

For connection when there is some distance between a computer and the projector.

INPUT B

For connecting a computer with an RGB output connector.

Notes

- It is recommended that you set the resolution of your computer to 1024 × 768 pixels for the external monitor.
- To connect a Macintosh computer equipped with a video output connector of a type having two rows of pins, use a commercially available plug adapter.

INPUT C

For connecting a computer with a DVI-D output connector.

Preparation

Connecting a Video equipment

Connections with a VHS video deck, DVD player, or BD player are explained for each input signal.

S VIDEO IN

For connecting video equipment with an S-video output connector.

VIDEO IN

For connecting video equipment with a video output connector.

INPUT A

For connection when there is some long distance between the video equipment and projector.

Connecting an External Monitor and Audio Equipment

OUTPUT

Projected images and input audio can be output to display equipment such as a monitor and audio equipment such as speakers with a built-in amplifier.

Note

The image is output only as a computer signal input from the RGB input connector or a video signal input from the YPBPr input connector.

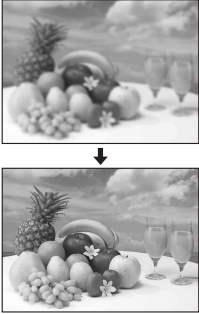

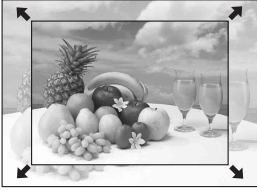

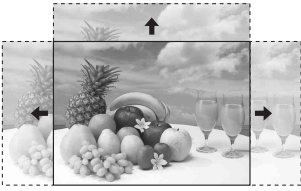

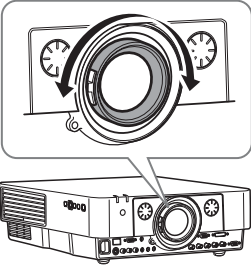

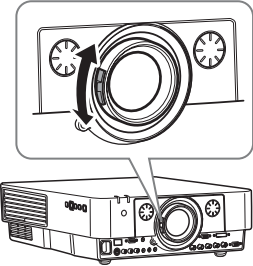

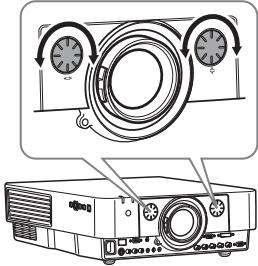

Projecting an Image

The size of a projected image depends on the distance between the projector and screen. Install the projector so that the projected image fits the screen size. For details on projection distances and projected image sizes, see “Projection Distance and Lens Shift Range” (page 41).

- 1** Connect the AC power cord.
- 2** Connect all equipment to the projector (page 8).
- 3** Turn on the projector.
Press the I/⏻ key on the main unit or the I key on the Remote Commander.
- 4** Turn on the connected equipment.
- 5** Select the input source.
Press the INPUT key on the projector to display the input select window. Press the INPUT key repeatedly or the ▲/▼ key to select an image to be projected. You can select the input source using Direct input select keys on the Remote Commander (page 5).
- 6** Switch your computer to output to external display by changing your computer's setting.
How to switch the computer to output to the projector varies, depending on the type of computer.
(Example)
Fn + F7
- 7** Adjust the focus, size, and position of the projected image (page 13).

Adjusting the Focus, Size, and Position of the Projected image

Focus	Size (Zoom)	Position (Lens shift)
		
		

Adjusting the tilt of the projector with the adjusters

When the projector is installed on an uneven surface and the projected position is low, you can adjust using the adjusters. To correct any trapezoidal distortion of the projected image, use the Keystone feature (page 22).

Notes

- Be careful not to let the projector down on your fingers.
- Do not push hard on the top of the projector with the adjuster extended.
- Since the Keystone adjustment is an electronic correction, the image may be deteriorated.

Displaying a pattern for adjusting an image

You can display a pattern for adjusting the projected image with the PATTERN key on the Remote Commander. Press the PATTERN key again to restore the previous image.

Turning Off the Power

- 1** Press the I/⏻ key on the main unit or the ⏻ key on the Remote Commander. The message appears if you press the I/⏻ key on the main unit. Press it again according to the message.
- 2** Unplug the AC power cord from the wall outlet.
After step **1**, the fan continues to run for a while to reduce internal heat. You may unplug the AC power cord before the fan stops.

To erase the confirmation message

The message disappears if you press any key other than the I/⏻ key on the main unit or ⏻ key on the Remote Commander, or if you do not press any key for a while.

To prevent the confirmation message from the being displayed with the key on the main unit

Hold the I/⏻ key on the main unit pressed for a few seconds.

Using a MENU

Note

The menu displays used for the explanation below may be different depending on the model you are using.

- 1 Press the MENU key to display the menu.
- 2 Select the setting menu.
Use the **▲** or **▼** key to select the setting menu then press **▶** or ENTER key.

Setting menu

- 3 Select the setting item.
Use the **▲** or **▼** key to select the setting menu then press **▶** or ENTER key.
To return to the selection screen of the setting menu, press the **◀** key or the RETURN key.

Setting items

- 4 Make the setting or adjustment for the selected item.
Menu operation differs depending on the setting item. If the next menu window is displayed, select the item according to the operations in step 3.

To return to the selection screen of the setting items, press the **◀** key or the

RETURN key. Also, to reset the setting value of an item to its factory preset value, press the RESET key during setting or adjusting.

Using a pop-up menu

Press the **▲/▼/◀/▶** key to select an item. Press the ENTER key to restore the previous screen.

Selecting items

Using the setting menu

Press the **▲** or **▼** key to select the item. Press the ENTER key to restore the previous screen.

Using the adjustment menu

To increase the number, press the **▲** or **▶** key and to decrease the number, press the **▼** or **◀** key. Press the ENTER key to register the setting. The previous screen is restored.

- 5 Press the MENU key to clear the menu.
The menu disappears automatically if no key is pressed for a while.

The Picture Menu

For adjusting the picture for each input signal.

Setting items	Functions
Picture Mode	Dynamic: Emphasizes the contrast to produce a “dynamic” picture. Standard: Makes the picture be natural and well balanced. Presentation ^{*1} : Makes the picture bright to suit for a presentation.
Reset	The picture settings are initialized to their factory preset values.
Contrast	The higher the setting, the greater the contrast. The lower the setting, the lower the contrast.
Brightness	The higher the setting, the brighter the picture. The lower the setting, the darker the picture.
Color ^{*2} ^{*4}	The higher the setting, the greater the intensity. The lower the setting, the lower the intensity.
Hue ^{*2} ^{*4} ^{*5}	The higher the setting, the more greenish the picture becomes. The lower the setting, the more reddish the picture becomes.
Color Temp. ^{*3}	High/Middle/Low: The higher the temperature, the more bluish the picture. The lower the temperature, the more reddish the picture. Custom1/ Custom2/ Custom3: An adjusted color temperature setting can be stored for each item. The factory settings are Custom1: High, Custom2: Middle, Custom3: Low.
Sharpness ^{*2}	The higher the setting, the sharper the picture. The lower the setting, the softer the picture.
Expert Setting	
Film Mode ^{*2} ^{*6}	Auto: Precisely reproduces the image from a film source to suit the original film source. Normally, select this option. Off: Select this option if the images are rough around the edges when “Auto” is selected.
Black Level Adj. (Adjust) ^{*2}	High/Low/Off: Emphasizes dark portions of the projected image to suit your taste.
Gamma Mode ^{*1}	Graphics: Improves the reproduction of halftones. Photos can be reproduced in natural tones. Text: Contrasts black and white. Suitable for images that contain lots of text.

Notes

- *1: When a computer signal is input, this option is available.
- *2: When a video signal is input, this option is available.
- *3: When “Picture Mode” is set to the item other than “Presentation,” this option is available.
- *4: When a B & W signal is input, this option is not available.
- *5: When an analog TV signal is input, this option may not available, depending on the color system.
- *6: When a progressive signal is input, this option is not available.

The Screen Menu

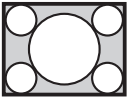

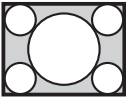

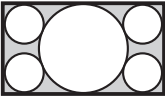

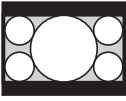

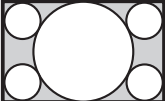

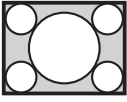

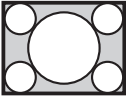

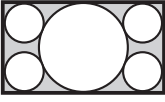

For adjusting the size, position, and aspect ratio of the projected image for each input signal.

Setting items	Functions
Aspect ^{*1}	Switches the aspect (page 18).
When the computer signal is input	<p>Normal: Displays the image on the center point of the projected image without changing the resolution of the input signal or enlarging the image.</p> <p>Full1: Displays the image to fit the maximum projected image size without changing the aspect ratio of the input signal.</p> <p>Full2: Displays the image to fit the maximum projected image size.</p>
When the video signal is input	<p>4:3: Displays the image to fit the maximum projected image size with an aspect ratio fixed to 4:3.</p> <p>16:9: Displays the image to fit the maximum projected image size with an aspect ratio fixed to 16:9.</p> <p>Zoom: Display the center point of the projected image to zoom.</p>
Over Scan ^{*2}	On/Off: Hides the outline of the image when set to “On.” Select “On” if noise appears along the edge of the image.
Adjust Signal ^{*3}	Adjusts the image of a computer signal. Use this item if the edge of the image is cut and reception is bad.
APA ^{*3 *4}	Automatically adjusts the projected image to an optimum quality when you press the ENTER key.
Phase ^{*3}	Adjusts the dot phase of the display pixel and the input signal. Set to the value where looks clearest.
Pitch ^{*3}	The higher the setting, the wider the horizontal image elements (pitch). The lower the setting, the narrower the horizontal image elements (pitch).
Shift ^{*5}	<p>H: The higher the setting, the farther right the image is projected on the screen. The lower the setting, the image farther left.</p> <p>V: The higher the setting, the farther up the image is projected on the screen. The lower the setting, the image farther down.</p>

Notes

- *1: • Note that if the projector is used for profit or for public viewing, modifying the original picture by switching to the aspect mode may constitute an infringement of the rights of authors or producers, which are legally protected.
- Depending on the input signal, setting items for aspect ratio or some other setting items cannot be set in some cases, or changing the aspect ratio setting may have no effect.
- A part of the image may be displayed in black, depending on the setting item.
- *2: Available when a video signal is input from the YPBPr input connector or DVI-D input connector.
- *3: Available when a computer signal is input from the RGB input connector.
- *4: If the projected image includes large amount of black portion around it, the APA function will not work properly and a part of the image may not be displayed on the screen and also optimum image cannot be obtained, depending on the type of input signal. In this case, adjust the “Phase,” “Pitch,” and “Shift” items manually.
- *5: Available when a computer signal is input from the RGB input connector or a video signal is input from the YPBPr input connector.

Aspect

	Input signal	Recommended setting value and projected image
Computer signal	(4:3) 	(Full1) ^{*1} 
	(16:9) 	(Full1) ^{*1 *2} 
	(16:10) 	(Full1) ^{*1 *2} 
Video signal	(4:3) 	(4:3) ^{*3} 
	(16:9) 	(16:9) ^{*4} 

*1: If you select “Normal,” the image is projected in the same resolution as the input signal without changing the aspect ratio of the original image.

*2: If you select “Full2,” the image is projected to fit the projected image size, regardless of the aspect ratio of the image.

*3: Depending on the input signal, the projected image may be projected as illustrated below. In this a case, select “16:9.”

*4: Depending on the input signal, the image may be projected as illustrated below. In this a case, select “Zoom.”

The Function Menu

The Function menu is used for setting various functions of the projector.

Setting items	Functions
Audio Output Vol.	The higher the setting, the higher an audio level output from the audio output connector. The lower the setting, the lower the audio level.
Smart APA	On/Off: When set to “On,” executes APA automatically when a signal is input. ^{*1}
CC Display	CC1/CC2/CC3/CC4/Text1/Text2/Text3/Text4: Select the closed caption service (Captions or Text). Off: Closed caption does not appear.
Lamp Mode	High/Standard: When set to “High,” the image becomes brighter, and power consumption becomes higher.
Lamp Timer Reset	When replacing the lamps, resets the lamp timer (page 31).
Background	Black/Blue: Selects the background color of the projected image when no signal is input.
Start Up Image	On/Off: When set to “On,” the Start Up Image is displayed on the screen upon startup of the projector.

Note

*1: Executes APA when a computer signal is input via the RGB input connector.

The Operation Menu

The Operation Menu is used for setting for the operations by using the menu or the Remote Commander.

Setting items	Functions
Language	Selects the language used in the menu and on-screen displays.
Status	On: All on-screen statuses are enabled. Off: Turn off the on-screen displays except for the menus, message when turning off the power, and warning messages.
IR Receiver	Front & Rear/Front/Rear: Selects the remote control detectors (IR Receiver) on the front and rear of the projector.
ID Mode	All/1/2/3: Assigns an ID number to the projector. When set to "All," you can control the projector with the Remote Commander independently of the assigned ID Mode. Refer also to "ID MODE 1/2/3 switch" of the Remote Commander on page 6.
Security Lock ^{*1}	On/Off: This function enables restriction of the projector to authorized users by password. The setting procedures for security locking are as follows: <ol style="list-style-type: none">1 Select "On" to display the setting menu.2 Input the password with the MENU, $\blacktriangle/\blacktriangledown/\blacktriangleleft/\blacktriangleright$, and ENTER keys. (The default password setting is "ENTER, ENTER, ENTER, ENTER.")3 Input a new password with the MENU, $\blacktriangle/\blacktriangledown/\blacktriangleleft/\blacktriangleright$, and ENTER keys.4 Enter the password again to confirm. Enter the password when you turn on the projector after disconnecting and reconnecting the AC power cord. When it is set to "Off," you can cancel the security lock. You are required to input the password again. If you fail to enter the correct password after three consecutive times, the projector cannot be used. In this case, press the I/O key to go Standby mode then turn on the power again.
Panel Key Lock	On/Off: When set to "On," locks all the control panel keys of the projector. However, you can operate the following: <ul style="list-style-type: none">• Press and hold the I/O key for approximately 10 seconds during Standby mode.<ul style="list-style-type: none">→ The projector turns on.• Press and hold the MENU key for approximately 10 seconds during power on.<ul style="list-style-type: none">→ "Panel Key Lock" is set to "Off" and enables operation of all control panel keys on the projector.

Note

*1: You will not be able to use the projector if you forget your password. If you call qualified Sony personnel because you have forgotten the password, you will be asked to verify the projector's serial number and your identity. (This process may differ in other countries/regions.) Once your identity has been confirmed, we will provide you with the password.

The Connection/Power Menu

The Connection/Power menu is used for setting for the connections and power.

Setting items	Functions
Network Setting	
IP Address Setup	Auto (DHCP): The IP address is assigned automatically from the DHCP server such as a router. Manual: To specify the IP Address manually.
IP Address/ Subnet Mask/ Default Gateway/Primary DNS/Secondary DNS	When “Manual” is selected for “IP Address Setup,” select the item with the ◀ or ▶ key and input the value with ▲ or ▼ key. When all items are entered, select “Apply” then press the ENTER key. The entered settings will be registered.
Input-A Signal Sel.	Auto/Computer/Video GBR/Component: When set to “Auto,” selects the type of video signal input automatically when “Input-A” is selected with the INPUT key.*1
Color System	Auto/NTSC3.58/PAL/SECAM/NTSC4.43/PAL-M/PAL-N: When set to “Auto,” selects the color system automatically when “S Video” or “Video” is selected with the INPUT key.*1
Standby Mode*2	Standard/Low: When set to “Low,” lowers power consumption in Standby mode.
Power Saving Mode	Lamp Cutoff: The lamp turns off automatically and power consumption is reduced if no signal is input for 10 minutes. The lamp lights again when a signal is input or any key is pressed. In Lamp Cutoff, the ON/STANDBY indicator lights in orange (page 27). Standby: The power will be turned off automatically and the projector goes to Standby mode if no signal is input for 10 minutes. Off: The Power Saving Mode is released.
Direct Power On	On/Off: When set to “On,” you can turn the power on without going to Standby mode when the AC power cord is connected to a wall outlet.

Notes

- *1: The image may not be adjusted properly depending on the type of input signal. In such a case, adjust it manually to suit to the connected equipment.
- *2: When “Standby Mode” is set to “Low,” the network and network control function cannot be operated while the projector is in standby mode.

The Installation Menu

The Installation menu is used for installing the projector.

Setting items	Functions
Image Flip	HV/H/V/Off: Flips the projected image horizontally and/or vertically according to the installation method.
Installation Attitude	Right Side Up/Upside Down: Change the cooling setting to suit to the installation attitude. Continuing to use the wrong setting may affect component reliability.
High Altitude Mode ^{*1}	On/Off: Set to “On” when using the projector at an altitude of 1,500 m or higher. Continuing to use the wrong setting may affect component reliability.
V Keystone ^{*2}	The higher the setting, narrower the top of the projected image. The lower the setting, the narrower the bottom.

Notes

- *1: When “High Altitude Mode” is set to “On,” the speed of the fan increases, and the fan noise becomes slightly louder.
- *2: Depending on the position adjusted with the lens shift feature, the aspect ratio of the image may change from the original or projected image may be distorted with Keystone adjustment.

i The Information Menu

The Information menu enables you to confirm various information on the projector, such as the total usage hours of a lamp.

Setting items	Functions
Model Name	Displays the model name.
Serial No.	Displays the serial number.
fH / fV (horizontal frequency/vertical frequency)*1	Displays the horizontal frequency/vertical frequency of the current input signal.
Signal type	Displays the type of the current input signal.
Lamp Timer	Indicates the total usage time of a lamp.

Note

*1: These items may not be displayed depending on the input signal.

Using Network Features

Connection to the network allows you to operate the following features:

- Checking the current status of the projector via a Web browser.
- Remotely controlling the projector via a Web browser.
- Receiving the e-mail report for the projector.
- Making the network settings for the projector.
- Supports network monitoring, control protocol (Advertisement, PJ Link, SNMP, PJ Talk, AMX DDDP [Dynamic Device Discovery Protocol]).

Notes

- The menu displays used for the explanation below may be different depending on the model you are using.
- Supported Web browsers are Internet Explorer 6/7/8.
- The menu displays only English.
- If the browser of your computer is set to [Use a proxy server] when you have access to the projector from your computer, click the check mark to set accessing without using a proxy server.

Displaying the Control Window of the Projector with a Web Browser

1 Connect the LAN cable.

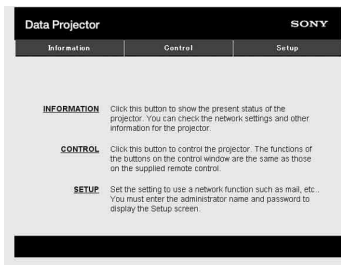

2 Set the network settings for the projector using “Network Setting” on the Connection/Power menu (page 21).

3 Start a web browser on the computer, enter the following in the address field, then press the Enter key on your computer.

http://xxx.xxx.xxx.xxx
(xxx.xxx.xxx.xxx: IP address for the projector)

You can confirm the IP address of the projector under “Network Setting” on the Connection/Power menu.

The following window appears in the Web browser:

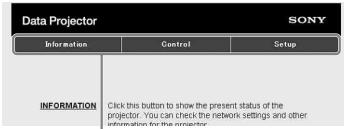

Once you make the network settings, you can open the Control window only by performing step 3 of this procedure.

How to operate the Control window

Switching the page

Click one of the Page Switching buttons to display the desired setting page.

Page Switching buttons

Setting the access limitation

You can limit a user for accessing any particular page.

Administrator: Allowed access to all pages

User: Allowed access to all pages except the Setup page

Set under [Password] of the Setup page.

When you access the Setup page for the first time, enter “root” for user name and enter nothing for password.

The name of the administrator is preset to “root.”

Entry area for [Administrator]

Entry area for [User]

When you change the password, input a new password after deleting the password (*****) that was set.

Note

If you forget your password, consult with qualified Sony personnel.

Confirming the Information regarding the Projector

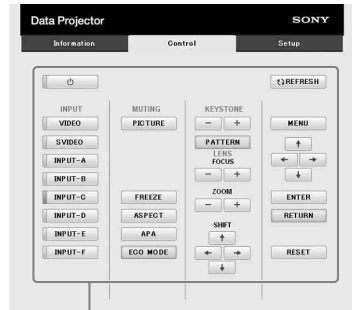

You can confirm the current settings for the projector on the Information page.

Information area

Operating the Projector from a Computer

You can control the projector from the computer on the Control page.

Operation area

The functions of the keys shown in the operation area are the same as those of the keys on the supplied Remote Commander.

Using the e-mail report Function

Set the e-mail report function on the Setup page.

Entered values will not be applied unless you click on [Apply].

- 1 Click on [Owner information] to enter the owner information recorded in the e-mail report.

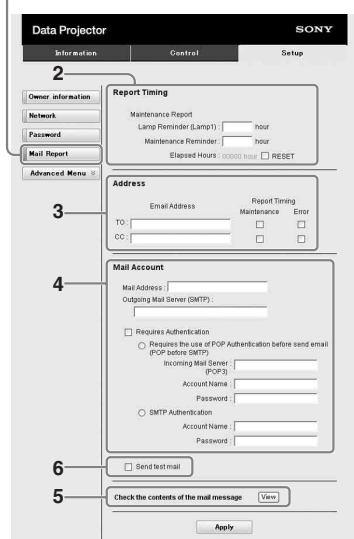

Owner information button 1

- 2 Set the timing of the e-mail report. Click on [Mail Report] to open the Mail Report page.

Lamp Reminder (Lamp1): Set the timing for lamp replacement. To reset Lamp Reminder, execute “Lamp Timer Reset” on the projector (page 19).

Maintenance Reminder: Set the timing for maintenance. To reset Maintenance Reminder, check the RESET check box and then click on [Apply].

Mail Report button

- 3 Enter the outgoing e-mail address in the Email Address box then check the Report Timing check box of the e-mail report to be sent.

- 4 Set the mail account for sending e-mail reports.

Mail Address: Enter the e-mail address.
Outgoing Mail Server (SMTP): Enter the address of outgoing mail server (SMTP).

Required Authentication: Check this check box if authentication is required for sending e-mail.

Requires the use of POP

Authentication before send email

(POP before SMTP): Check this check box to arrange for POP authentication to be performed before sending e-mail.

Incoming Mail Server (POP3): Enter the address of the incoming-mail server (POP3) to be used for POP authentication.

Account Name: Enter the mail account.

Password: Enter the password.

SMTP Authentication: Check this check box to arrange for SMTP authentication to be performed before sending e-mail.

Account Name: Enter the mail account.

Password: Enter the password.

- 5 Confirm the contents of the e-mail report.

When you click on [View] is pressed, the contents of the e-mail report are displayed.

- 6 Send the test mail.

Check on the Send test mail check box then click on [Apply] to send your test mail to the e-mail address you set.

Notes

- The e-mail report function is not available because the network which Outbound Port25 Blocking is used cannot be connected to the SMTP server.
- You cannot use the following characters to enter the characters in the text box: ‘ ’, “ ”, “ ”, “ & ”, “ < ”, “ > ”

Indicators

The indicators allow checking the status and notify you of abnormal operation of the projector. If the projector exhibits abnormal status, address the problem in accordance with the table below.

ON/STANDBY indicator

Status	Meaning/Remedies
Lights in red	The projector is in Standby mode.
Flashes in green	<ul style="list-style-type: none"> • The projector is ready to operate after having been turned on. • The lamp cools after the projector is turned off.
Lights in green	The projector's power is on.
Lights in orange	The projector is in Power Saving Mode (lamp cut off).
Flashes in red	The projector is in abnormal status. Symptoms are indicated by number of flashes. Address the problem in accordance with the following. If the symptom is shown again, consult with qualified Sony personnel.
Flashes twice	<p>The internal temperature is unusually high. Check the items below.</p> <ul style="list-style-type: none"> • Check to see if nothing is blocking the ventilation holes. • Check to see if the air filter is not clogged. • Check if "Installation Attitude" on the Installation menu is correctly selected.
Flashes six times	Unplug the AC power cord from a wall outlet. After checking that the ON/STANDBY indicator goes out, plug the power cord to a wall outlet again then turn on the projector.
Other number of flashes	Consult with qualified Sony personnel.

LAMP/COVER indicator

Status	Meaning/Remedies
Flashes in red	Symptoms are indicated by number of flashes. Address the problem in accordance with the following.
Flashes twice	The rear panel or air filter unit are not attached securely.
Flashes three times	The temperature of lamp is unusually high. Turn off the power and wait for lamp to cool then turn on the power again. If the symptom is shown again, the lamp may be burnt out. In such a case, replace the lamp with a new one (page 31).

Messages List

When any of the messages listed below appears on the projected image, address the problem in accordance with the table below.

Message	Meaning/Remedy	Page
High temp.! Lamp off in 1 min.	Check the items below. <ul style="list-style-type: none">• Check to see if nothing is blocking the ventilation holes.• Check to see if the air filter is not clogged.• Check if “Installation Attitude” on the Installation menu is correctly selected.	3, 22, 33
Frequency is out of range!	Change the output setting of the connected equipment to one for signals supported by the projector.	40
Please check Input-A Signal Sel.	Set “Input-A Signal Sel.” to “Auto” or select the input signal type to suit to the input signal.	21
Please replace the Lamp and clean the Filter.	Replace the lamp with a new one and clean the air filter. To cancel the message, press any key on the Remote Commander or the control panel of the projector. The message appears whenever you turn on the power until you replace the lamp and reset the lamp timer.	31, 33
Projector temperature is high. High Altitude Mode should be “On” if the projector is being used at high altitude.	At an altitude of 1,500 m or higher, if you are not using the projector, check the items below. <ul style="list-style-type: none">• Check that nothing is blocking the ventilation holes.• Check that the air filter is not clogged.• Check if “Installation Attitude” on the Installation menu is correctly selected.	3, 22, 33
Not applicable!	Invalid key pressed.	5
The panel keys are locked!	“Panel Key Lock” is set to “On.”	20

Troubleshooting

Before asking to have the projector repaired, try to diagnose the problem, following the instructions below.

Symptom	Remedy	Page
The power is not turned on.	Check if the AC power cord is firmly connected.	–
	When the “Panel Key Lock” is set to “On,” you cannot turn on the projector using the I/⏻ key on the projector.	20
	If the lamp, rear panel, or air filter unit is not attached securely, the projector cannot be turned on.	31, 33
No image.	Check if the connecting cable is connected to external equipment properly.	–
	Check if the computer signal is set for output to an external monitor. If you set your computer, such as a notebook computer, to output the signal to both your computer’s display and an external monitor, the picture of the external monitor may not appear properly. Set your computer to output the signal to only an external monitor.	12
	Check if the input source is correctly selected.	12
	Check if the picture is muted.	6
On-screen display does not appear.	The on-screen display does not appear when “Status” in the Operation menu is set to “Off.”	20
The aspect ratio of the display is not right/the image is displayed smaller /a portion of image does not appear.	The image may not be displayed correctly with an input signal the projector cannot interpret correctly. In such a case, set “Aspect” manually.	17, 18
The image is a trapezoid.	The images become trapezoidal because of the projection angle. In such a case, you can correct the trapezoidal distortion, using a Keystone feature.	5, 22
The image is dark/too bright.	The settings for “Brightness,” “Contrast,” and “Lamp Mode” affect brightness of the image. Check if the value is appropriate.	16, 19
	The image will be dark when the lamp is burnt out. Check “Lamp Timer,” and replace the lamp with a new one if necessary.	23
The image is not clear.	Check if the projector is in focus.	13
	The picture will not be clear if condensation has accumulated on the lens. In such a case, let the projector sit for about two hours with the power on.	–
The image is noisy.	Check if the connecting cable is connected to external equipment properly.	8

Symptom	Remedy	Page
No sound.	Check that the connecting cables between the projector and external video or audio equipment are securely connected.	8
	Check if the output setting of connected external audio equipment is set for output the audio signal from the projector.	–
	Audio is not output if audio muting is activated.	6
	Check if the “Audio Output Vol.” is set to minimum.	6
The Remote Commander does not work.	Check that the batteries are installed correctly.	–
	Check that the batteries are not exhausted.	–
	Check if the “ID Mode” of the projector corresponds to that of the Remote Commander.	6, 20
	Check the setting for “IR Receiver.”	20
The fan is noisy.	When “Lamp Mode” is set to “High,” or “High Altitude Mode” is set to “On,” the sound from the fan is often greater than normal to cool the lamp, etc.	19, 22
	If the ventilation holes are blocked, the internal temperature of the projector rises and the fan noise becomes larger.	3

Replacing the Lamp

Replace the lamp with a new one if a message displayed on the projected image or the LAMP/COVER indicator notifies you to replace the lamp (pages 27, 28). Use an LMP-F230 projector lamp (not supplied) for replacement.

Caution

- The lamp remains hot after the projector is turned off. **If you touch the lamp, you may burn your finger. When you replace the lamp, wait for at least an hour after turning off the projector for the lamp to cool sufficiently.**
- Do not allow any metallic or inflammable objects into the lamp replacement slot after removing the lamp, otherwise it may cause electrical shock or fire. Do not put your hands into the slot.
- **If the lamp breaks, contact qualified Sony personnel. Do not replace the lamp yourself.**
- When removing the lamp, be sure to pull it out straight, by holding it by grab. If you touch a part of the lamp other than the grab, you may be burned or injured. If you pull out the lamp while the projector is tilted, the pieces may scatter if the lamp breaks any may cause injury.

- 1 Turn off the projector, and disconnect the AC power cord from a wall outlet.
- 2 When the lamp has cooled sufficiently, open the rear panel by loosening the three screws.

- 3 Loosen the three screws on the lamp then pull out the lamp by its grab.

Others

- 4 Insert the new lamp all the way in until it is securely in place. Tighten the three screws.

- 5 Close the rear panel and tighten the three screws.

Note

Be sure to install the lamp and rear panel securely as it was. If not, the projector cannot be turned on.

- 6 Connect the AC power cord to a wall outlet and turn on the projector.
- 7 Reset the lamp timer for notification of the next replacement time.
Select "Lamp Timer Reset" on the Function menu then press the ENTER key. When a message appears, select "Yes" to reset the lamp timer.

Cleaning the Air Filter

When a message appears on the projected image or the indicator flashes, indicating time for a filter cleaning, clean the air filter (pages 27, 28).

If the dust cannot be removed from the air filter even after cleaning, replace the air filter with a new one.

For details on a new air filter, consult with qualified Sony personnel.

Caution

If you neglect to clean the air filter, dust may accumulate, clogging it. As a result, the temperature may rise inside the unit, leading to a possible malfunction or fire.

- 1 Turn off the projector, and disconnect the AC power cord from the AC outlet.
- 2 Open the rear panel by loosening the three screws on the rear panel.

- 3 Pull out the air filter unit.

- 4 Clean the air filter with a vacuum cleaner.
Remove the cover as illustrated below then clean the four air filters.
The two air filters on the bottom of the air filter unit cannot be removed from the air filter unit.

- 5 Return the air filter to the air filter unit then return it to the projector.
- 6 Close the rear panel and tighten the three screws.

Note

Be sure to attach the air filter unit and rear panel firmly; the power cannot be turned on if it is not closed securely.

Removing/Attaching the Projection Lens

Notes

- Turn off the projector and disconnect the AC power cord from a wall outlet before you remove/attach the projection lens.
- Be careful not to drop the projection lens.
- Avoid removing/attaching the lens with the projector installed suspended from a ceiling.
- Avoid touching the lens surface.
- For usable projection lenses and a lens adapter, see “Optional accessories” (page 38).

Removing

- 1 Loosen the two screws that secure the front panel to remove the front panel in the direction of the front.

- 2 Loosen the four screws that secure the projection lens then pull it out straight.

Note

If the lens was shifted with lens shift adjustment, it may take some effort to loosen the screws. In such a case, adjust to shift the lens to the lower position and to the horizontal center position.

Attaching

- 1 Insert the projection lens with a mark upward all the way in until it is securely in place then tighten the four screws.

- 2 Replace the front panel and fasten it with the two screws.

Attaching the Projection Lens Adapter to the Projection Lens

Before starting

Since you may not recognize the center position of the projection lens after the flange section of the lens (step 1) is removed, place a mark on the projection lens with a marking pen, etc.

- 1 Place the projection lens with the motor section upward and place a mark around the top screw hole on the lens.

- 2** Remove the six screws that secure the flange section then slide it straight to remove.

Notes

- The screws that secure the flange section are strongly tightened. When removing the screws, be careful not to damage the screw heads.
- When the flange section is removed, the spacer section is also loosened. Be careful that the spacer section is not removed.

- 3** Insert Part C for the lens adapter all the way until it is securely in place, align the center mark with the mark placed in step 1, then tighten the six D screws supplied with the lens adapter.

- 4** Attach Part A and Part B for the lens adapter to the projection lens.

- ① First, fit Part A to the zoom gear section on the projection lens.
- ② Fit the holes on Part B to the hooks on Part A then hold the projection lens between Part A and Part B for the lens adapter.

- 5** Secure Part A and Part B for the lens adapter attached to the projection lens with the two E screws supplied with the lens adapter.

Others

Specifications

Item		VPL-FX30
Projection system		3 LCD system
Display device	Effective display size	0.79-inch (20.1 mm), 3 plate, Aspect ratio 4:3
	Effective picture elements	2,359,296 pixels (1024 × 768 pixels, 3 plate panels)
Projection lens	Zoom	Manual zoom (approx.1.6 times)
	Focus	Manual
Light source		High-pressure mercury lamp, 230 W type
Projected image size		40 inches to 600 inches (1.02 m to 15.24 m)
Luminous flux (Brightness)		4200 lm (when “Lamp Mode” is set to “High”)
Applicable scanning frequency *1		Horizontal: 14 kHz to 93 kHz, Vertical: 47 Hz to 93 Hz
Resolution	When a computer signal is input	Maximum input signal resolution: 1920 × 1200 pixels (resize) Panel display resolution: 1024 × 768 pixels
	When a video signal is input	NTSC, PAL, SECAM, 480/60i, 576/50i, 480/60p, 576/50p, 720/60p, 720/50p, 1080/60i, 1080/50i, 1080/60p, 1080/50p
Color system		NTSC ^{3.58} , PAL, SECAM, NTSC ^{4.43} , PAL-M, PAL-N, PAL60
Input/Output connector	INPUT A	RGB/YPbPr input connector: 5BNC female, G with sync/Y: 1 Vp-p ± 2 dB, sync negative, 75 ohms terminated, RGB/PbPr: 0.7 Vp-p ± 2 dB, 75 ohms terminated, Sync signal: TTL level high impedance, positive/negative Audio input connector: Stereo mini jack, rated input 500 mVrms, input impedance more than 47 kohms
	INPUT B	RGB input connector: Mini D-sub 15-pin female, RGB: 0.7 Vp-p ± 2 dB, 75 ohms terminated, Sync signal: TTL level high impedance, positive/negative Audio input connector: Stereo mini jack, rated input 500 mVrms, input impedance more than 47 kohms
	INPUT C	DVI-D input connector: DVI-D 24-pin (Single link), DVI 1.0 compliant, HDCP support Audio Input connector: Shared with INPUT B

Item		VPL-FX30
Input/Output connector	S VIDEO (S VIDEO IN)	S video input connector: Mini DIN 4-pin, Y: 1 V _{p-p} ± 2 dB, sync negative, 75 ohms terminated, C: (burst signal) 0.286 (NTSC)/0.3 (PAL/SECAM) V _{p-p} ± 2 dB, 75 ohms terminated Audio input connector: Phone jack × 2, rated input 500 mVrms, Input impedance more than 47 kohms
	VIDEO (VIDEO IN)	Video input connector: Phone jack, 1 V _{p-p} ± 2 dB, sync negative, 75 ohms terminated Audio input connector: Shared with S VIDEO IN
	OUTPUT	MONITOR output connector: Mini D-sub 15-pin female, G with sync/Y: 1 V _{p-p} ± 2 dB, sync negative, 75 ohms terminated, RGB/PbPr: 0.7 V _{p-p} ± 2 dB, 75 ohms terminated, Sync signal: HD, VD 4 V (open), 1 V _{p-p} (75 ohms), positive/negative Audio output connector: Stereo mini jack, stereo, 1 Vrms (maximum volume, when inputting 500 mVrms), output impedance 5 kohms
Others connector	RS-232C connector	D-Sub 9 pin female
	LAN connector	RJ45, 10BASE-T/100BASE-TX
	CONTROL S input connector (DC power supply)	Stereo mini jack, 5 V _{p-p} , Plug in power DC 5 V
Operating temperature/ Operating humidity	0 °C to 40 °C (32 °F to 104 °F)/35% to 85% (no condensation)	
Storage temperature/ Storage humidity	-20 °C to +60 °C (-4 °F to +140 °F)/ 10% to 90%	
Power requirements	100 V to 240 V AC, 3.3 A to 1.3 A , 50/60 Hz	
Power consumption	100 V AC: 330 W 240 V AC: 310 W	
Power consumption (in standby)	100 V AC: 11 W (when “Standby Mode” is set to “Standard”) / 0.15 W (when “Standby Mode” is set to “Low”) 240 V AC: 12 W (when “Standby Mode” is set to “Standard”) / 0.3 W (when “Standby Mode” is set to “Low”)	
Heat dissipation	100 V AC: 1126 BTU 240 V AC: 1058 BTU	
Dimensions (W/H/D)	Approx. 390 × 148 × 477 mm (15 ¹¹ / ₃₂ × 5 ¹³ / ₁₆ × 18 ²⁵ / ₃₂) Approx. 390 × 134 × 463 mm (15 ¹¹ / ₃₂ × 5 ⁹ / ₃₂ × 18 ⁷ / ₃₂ inches) (without projecting parts)	
Mass	Approx. 7.9 kg (17 lb 7 oz)	

Item	VPL-FX30

Notes

- *1: For details, refer to “Acceptable Input Signals” on page 40.
- *2: Information on accessories in this manual is current as of May 2010.
- *3: Not all optional accessories are available in all countries and area. Please check with your local Sony Authorized Dealer.
- *4: To attach the projection lens to the projector, the PK-F30LA1 projection lens adapter is required.

Design and specifications of the unit, including the optional accessories, are subject to change without notice.

Always verify that the unit is operating properly before use. SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND INCLUDING, BUT NOT LIMITED TO, COMPENSATION OR REIMBURSEMENT ON ACCOUNT OF THE LOSS OF PRESENT OR PROSPECTIVE PROFITS DUE TO FAILURE OF THIS UNIT, EITHER DURING THE WARRANTY PERIOD OR AFTER EXPIRATION OF THE WARRANTY, OR FOR ANY OTHER REASON WHATSOEVER.

Notes

- *1: Available for VESA Reduced Blanking signals only.
- *2: With INPUT A only
- *3: Determine as a computer signal.
- When a signal other than the signals listed in table is input, the picture may not be displayed properly.
- An input signal meant for screen resolution different from that of the panel will not be displayed in its original resolution. Text and lines may be uneven.

Projection Distance and Lens Shift Range

The projection distance refers to the distance between the front of the lens and the projected surface.

The lens shift range represents the distance in percent (%) by which the lens can be shifted from the center of the projected image. The lens shift range is regarded as 0% when the point (A) in the illustration (point where a line drawn from the center of the lens and the projected image cross at right angles) is aligned with the center of the projected image and full width or full height of the projected image is regarded as 100%.

- VSUP: Vertical shift range (up) [%]
- VSDN: Vertical shift range (down) [%]
- HSR: Horizontal shift range (right) [%]
- HSL: Horizontal shift range (left) [%]

Others

Projection distance

Unit: m (inches)

Projection image size		Projection distance L		
Diagonal	Width × Height	Standard lens	VPLL-Z1024	VPLL-Z1032
80-inch (2.03 m)	1.63 × 1.22 (64 × 48)	2.31 × 3.69 (91 × 145)	3.85 × 5.28 (152 × 207)	5.24 × 8.01 (207 × 315)
100-inch (2.54 m)	2.03 × 1.52 (80 × 60)	2.89 × 4.62 (114 × 182)	4.84 × 6.62 (191 × 260)	6.59 × 10.05 (260 × 395)
120-inch (3.05 m)	2.44 × 1.83 (96 × 72)	3.48 × 5.56 (137 × 218)	5.83 × 7.97 (230 × 313)	7.94 × 12.09 (313 × 476)
150-inch (3.81 m)	3.05 × 2.29 (120 × 90)	4.36 × 6.96 (172 × 274)	7.31 × 9.98 (288 × 393)	9.95 × 15.14 (392 × 596)
200-inch (5.08 m)	4.06 × 3.05 (160 × 120)	5.83 × 9.29 (230 × 366)	9.77 × 13.34 (385 × 525)	13.32 × 20.24 (525 × 797)

Projection distance formula

D: Projected image size (Diagonal)

Unit: m (inches)

Lens	Projection distance L (minimal length)	Projection distance L (maximal length)
Standard lens	$L=0.0294 \times D - 0.0465$ ($L=1.1555 \times D - 1.8307$)	$L=0.0467 \times D - 0.0443$ ($L=1.8389 \times D - 1.7435$)
VPLL-Z1024	$L=0.0493 \times D - 0.0973$ ($L=1.9423 \times D - 3.8296$)	$L=0.0672 \times D - 0.0930$ ($L=2.6454 \times D - 3.6617$)
VPLL-Z1032	$L=0.0673 \times D - 0.1414$ ($L=2.6483 \times D - 5.5654$)	$L=0.1019 \times D - 0.1323$ ($L=4.0111 \times D - 5.2083$)

Lens shift range

$$VS_{UP} = 51 - 1.545 \times HS \text{ (HS}_R \text{ or HS}_L \text{) [\%]}$$

$$VS_{DN} = 0 \text{ [\%]}$$

$$HS_R = HS_L = 33 - 0.647 \times VS_{UP} \text{ [\%]}$$
