

# Epson EB-1965 Projector

This Epson projector offers the best combination of high-quality output, value-added features and affordability. Designed with the needs of both large corporates and educational establishments in mind, it can be used for installation in meeting rooms or portable use from a desktop.

Delivering high-quality pictures with a bright image and benefitting from Epson's 3LCD technology for vivid, natural colours and an equally high White and Colour Light Output, presentations will be projected with clarity.

Easy to install, the projector is compact and offers a wide range of convenient features. It boasts both Wi-Fi connectivity and a DisplayPort connector to show a range of high definition digital video and audio content. New to Epson, the 'focus help' feature allows users to precisely calibrate the focus with a test pattern, to suit any meeting room set up. And the wide controller manufacturer compatibility means integration within existing systems is hassle-free.

To adjust the projected image the handy screen fit function corrects images instantly to any framed screen within seconds at the touch of a button. And the real time automatic vertical and horizontal keystone correction is a real stand-out feature which is new to Epson and rarely found in other devices. It adjusts the image in real time and corrections take less than a second to be seen.

Alongside this, the projector aids productivity as it allows split-screen projecting to show different kinds of content simultaneously, as well as showing content from up to four computers with the multi-PC feature. And the image processing and DICOM capabilities mean users can be flexible with the content they choose to project.
