

HD30

Home Cinema Projector

Experience life sized movies and games with the HD30 Full HD 1080p 3D projector.

Home cinema has always been about recreating the big-screen experience in your own home and the HD30 is no exception. Producing perfectly balanced colours, vibrant images and exceptional light & shade detail only possible with a high contrast projector, the HD30 offers you stunning Full HD quality visuals and an immersive 3D experience.

Using the latest DarkChip3 DLP® technology, you can project up to a 150" image making it not only the perfect choice for recreating that cinema feeling at home, but also ideal for inviting your mates round to watch the big match. Incorporating built in speakers and SRS WOW HD audio processing you can conveniently listen to your movies without the hassle of connecting external speakers.

The HD30 is supplied with 2 pairs of our ultra-high performance ZF2100 wireless 3D glasses for uncompromising 3D image quality and outstanding convenience. For ultimate peace of mind a 3 year warranty is included that covers both the projector and the lamp.*

Whether you just fancy a relaxed Movie night or immersing yourself in adrenaline-pumping 3D games, the HD30 is the perfect choice.

Amazing Colours

The HD30 incorporates BrilliantColor™ multi-colour processing technology to bring stunning, vibrant colour to your screen. Using six separate primary and secondary colours to produce a new level of colour performance and control; BrilliantColor™ increases colour brightness by up to 50% over other technologies to create accurate true to life images. You can even fine tune colours for ultimate precision.

BrilliantColor™

Without

With

Colour Guarantee

We are so confident that the HD30 image colour quality will remain as good as the day you bought it that Optoma will guarantee it for five years.

Dynamic Black

Dynamic black smoothly adjusts the lamp output automatically, based on the brightness information of each frame; to create a stunning 25,000:1 contrast ratio. Bright scenes are crisp and clear, while dark scenes remain detailed with deep blacks which gives exceptional light and shade detail.

Full HD 1080p

Sharper more detailed projection with 1920 x 1080p pixels, perfect for watching Blu-ray movies without downscaling or compression.

Why use a projector for 3D?

It is a widely accepted fact that the bigger the image, the greater the 3D effect - for the best results it is essential to fill your field of vision, without having to be too close to the screen. Even a huge 50" TV can only create a window on the 3D world, whereas the immersion & excitement created by a massive 150" projection screen makes you feel like you are part of the action!

50" 3D Television

150" Optoma Projector

3D Movies:

Now that all the latest 3D movies have arrived on Blu-ray 3D™ you can enjoy the same jaw-dropping 3D cinema experience at home, now in fantastic 1080p Full High definition.

3D Sports:

Couldn't get tickets for the big match? - The HD30 brings the big picture home like never before. With more matches broadcast in 3D every season, you'll never miss the great moments in sporting history and you can re-live them time after time as though you were actually there.

3D Gaming:

Set your sights on the HD30 for the greatest 3D gaming experience. With an impeccable response time you can line-up the perfect shot while sniper-rounds whizz past you; watch burning ships zoom off into the distance; dodge axe-wielding zombies lurching out of the screen – the possibilities are endless. Combine this with active-motion gaming for the closest thing to your very own virtual reality suite.

Bring movies and games to life with the HD30 Full HD 1080p 3D projector.

Long Lamp Life

The new lamp technology incorporated into the HD30 extends lamp life up to an incredible 6000 hours. If you watch a two hour movie every day then typically the lamp will last for over 8 years.

Quick Resume

Save time by not waiting for the projector to cool down before it can power up again. If the projector is accidentally turned off, this feature allows the projector to be instantly powered on again, if selected within a period of 100 seconds.

3D Glasses Included

For that seamless 3D experience, the HD30 is supplied with 2 pairs of our ultra-high performance ZF2100 wireless 3D glasses. Developed in parallel with our "Full 3D" projectors, the ZF2100 system & glasses are optimised to provide you with higher contrast & brighter images than ever before, while eliminating tedious issues with emitter placement, limited range and potential interference commonly experienced when using Infra-red.

Fully rechargeable, our ZF2100 glasses give you the peace of mind that comes with knowing both installing and using them will be hassle free.

*Terms and conditions apply to the 3 year lamp and projector warranty. See the warranty section on the Optoma website for details. The lamp warranty is limited to 3 years or 2000 hours – whichever is sooner. ¹Brightness will vary depending on selected projector mode, environmental conditions and usage. As is common with all lamp based projectors, brightness will decrease over the lamp lifetime. ²Actual lamp life may vary due to different environment conditions and usage.
