

ZX212ST / ZW212ST

Lamp Free LED+ Projector

The Future of Education

The most intuitive way to teach – Instantly present from your phone or tablet

Longer life and less maintenance – Lamp Free LED+ Technology

Long-term cost savings with efficient Eco+ features

ZX212ST/ZW212ST

Intuitive presentation technology at your fingertips effortlessly puts the class in the palm of your hand. An innovative light engine improves efficiency, reducing power and maintenance costs while minimising the impact on the environment. Together we can all look forward to a brighter future.

The most intuitive way to present

Instantly present from your phone or tablet using the free App: WiFi-Doc. Available for both Android and iOS devices, WiFi-Doc gives you the freedom to move around the classroom, share ideas and connect with your students like never before, to create a more collaborative learning experience for everyone.

Use your device's touch screen to browse, flick between slides and pinch-to-zoom.

SCAN BARCODE TO DOWNLOAD WIFI-DOC

iPhone/iPad

Android

Keep up to date with the latest lesson plans and materials - simply email files to your device, open the attachment directly into WiFi-Doc and you'll be up and running in seconds.

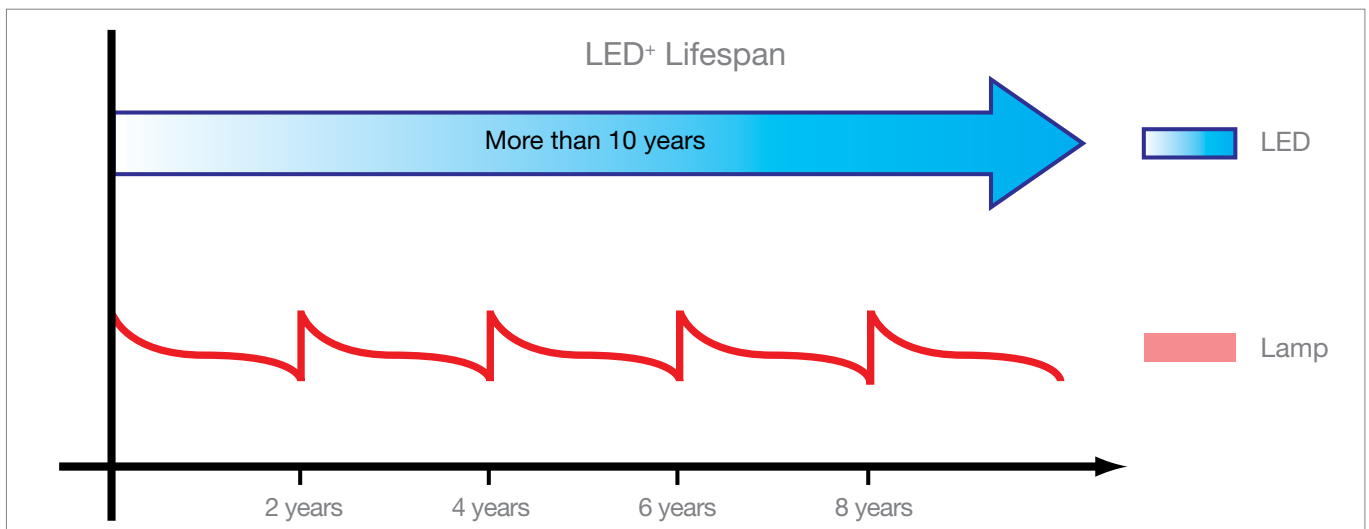

WiFi-Doc and other extended wireless features require the optional Optoma mini-WiFi dongle accessory.

"WiFi-Doc creates an enormously intuitive interface to engage and inspire your students... without the need for a PC or laptop."

Lamp Free LED+ - Longer life and less maintenance

With an exceptional life-span, cutting edge lamp-free LED+ technology completely eliminates the need for expensive replacement lamps. Saving you both time and money, whilst leaving you certain that your projector will be fully operational for many years to come.

HIGH BRIGHTNESS

Due to the exceptional colour fidelity created by LED+ technology; in many situations the perceived brightness of an LED+ projector can be up to twice the brightness of an equivalent lamp-based projector.

LED+

WHAT IS LED+ ?

Combining the benefits of both higher efficiency and higher brightness, our LED+ Lamp-free projectors use LEDs for Red and Blue, but generate Green by shining a blue LASER onto a green phosphor.

The Blue lasers used in Optoma LED+ projectors are more efficient and generates less heat than the red lasers typically used in other lamp-free projectors, leading to a quieter, longer-lasting and more efficient projector.

VIBRANT COLOURS

As much more of the light produced ends up on screen, less light is wasted; meaning that LED+ projectors are not only more efficient, but also give you incredibly rich and vibrant colours

Where Projectors Roam Free

ZX212ST/ZW212ST

INSTANT ON / OFF

After it is switched on, a lamp based projector will typically take several minutes to reach full brightness. LED+ technology reaches full brightness only seconds after you hit the power button, meaning you can get straight down to business.

HUGE IMAGES IN SMALL SPACES

LED+ projectors can project an impressive 60" from as little as 68cm from the screen, eliminating shadows on the screen allowing you to present with ease.

CONTROL AT YOUR FINGERTIPS

Keep their attention focussed on the right things using the simple, yet powerful remote with laser pointer and USB mouse control.

PLUG-AND-PRESENT

If you don't have a smartphone or tablet, don't worry... simply copy your documents, images and videos to a USB stick or SD card and display them using the on-board media players...without the need to convert them!

Easily navigate the friendly interface which automatically sorts your files, so you can quickly find them

MAKE YOURSELF HEARD

Producing less heat allows LED+ projectors to run cooler for longer... And with fewer cooling fans needed, they not only waste less energy, they can run quieter too...

...so that the integrated powerful 10W speakers can really fill the room with sound.

Cost savings with efficient Eco+ features

Eco+ technology brings together superb performance, improved life and energy saving features that are easy to use while saving you both time and money.

Consuming only a fraction of the power and less than 0.5W in standby, LED+ projectors are a big step forward in reducing our energy footprint and with no lamp, LED+ projectors are also completely free of mercury.

ECO+ DYNAMIC DIMMING

Dynamically dimming your projector's light source, Eco+ technology reduces power consumption to as little as 30%* reducing running costs and prolonging the life of your projector.

Bright scene
~100% Power consumption

Dark scene
~ 30% Power consumption

HIGHER CONTRAST

When combined with DarkChip3™ DLP® technology from Texas Instruments, Eco+ dynamic dimming gives you higher contrast than ever before. Pin sharp graphics, crystal clear text, crisper whites and ultra-rich blacks make images come alive and text easier to read.

100,000:1 Contrast Ratio

ECO+ MODE

Eco+ mode can be easily enabled via the remote

AUTO POWER OFF

There may be instances when the projector is left running when not in use. To help save energy, if the projector is left running and no source is detected, the "Auto Power Off" feature automatically turns off the projector after a set period of time.

ECO AV MUTE

Stay in control of your lessons with the Eco AV mute feature. Direct your class' attention away from the screen by blanking the image when no longer needed. This also instantly reduces the power consumption to 10%.

Eco AV mute off
100% Power consumption

Eco AV mute on
10% Power consumption

Stay in control

Not only simple to install, LED+ projectors can be monitored and controlled in numerous ways to ensure that they are also effortless to maintain.

Greatly reduce running costs - use the free network management software (Crestron RoomView™) to automatically switch ON/OFF up to 250 projectors from a single location.

CRESTRON ROOMVIEW™

RoomView® software provides a custom configurable interface to monitor, manage and control every device in every room remotely from any computer.

- Manage up to 250 projectors at the same time (via master PC).
- Control and alter the projector settings using a simple web browser page including OSD menu control.
- Set up email alerts for warning messages.
- Ideal for large installations in both the educational and business environments.

The easy-to-use interface allows you to manage all the units connected to the network in one place.

RETRO-FIT

If your school, college or university is looking to replace older projectors but already has interactive whiteboards, there is no need to make a large investment in new whiteboard hardware.

Optoma have put together a range of mounting solutions, including Promethean compatible mounts, to ensure that your existing infrastructure can remain intact.

PROMETHEAN COMPATIBLE MOUNTS

Available from:

RA Technology (Mangum Group)
Wakefield House, Wakefield Road,
Brighouse, West Yorkshire, HD6 1QL.

OPTOMA WALL MOUNT

OPCMW835 / OPCM835W

A wall mount for Optoma short throw projectors featuring a high quality telescopic arm and height adjustment plate for versatile installation with screens or interactive whiteboards in classrooms and offices.

REDUCED TOTAL COST OF OWNERSHIP

With so much technology packed into such a small package, it is hard to believe that it can all lead to huge long-term cost savings. Here's how:

- ✓ No lamp replacements
- ✓ No filter cleaning
- ✓ Reduced power consumption
- ✓ Easier to Install & maintain
- ✓ Automated power on/off schedules
- ✓ Real-time status monitoring

ZX212ST/ZW212ST

ZX212ST/ZW212ST SPECIFICATIONS

	ZX212ST	ZW212ST
Display Technology	Single 0.55" XGA DLP® Technology by Texas Instruments	Single 0.65" WXGA DLP® Technology by Texas Instruments
Native Resolution	XGA 1024 x 768	WXGA 1280 x 800
Projection Lens	F/2.8; f=7.02mm, Fixed Zoom	F/2.8; f=7.35mm, Fixed Zoom
Throw Ratio	0.626:1	0.52:1

For guide purposes only

¹ Depends on projector model and lamp. ² Brightness and light source lifetime will vary depending on selected projector mode, environmental conditions and usage. As is common with all projectors, brightness will decrease over the lifetime. ³ Typical light source life achieved through testing. Will vary according to operational use and environmental conditions. ⁴ Optoma guarantees that in normal use, Optoma DLP® colour quality will be indistinguishable from when new. Exclusions: (a) Guarantee is voided if the projector is subject to damage through misuse. (b) Guarantee may be voided in industrial or commercial entertainment environments where dust or smoke is excessive (c) Guarantee will not apply if light source brightness is below 50% due to wear or if the projector is not working due to other faults. (d) Over time all projector types will show a slight colour variance. Copyright © 2012, Optoma Europe Ltd.
