Projecting Pure Emotion

The ultimate movie experience.

No other projector combines the latest high-definition Mustang HD2+ DMD from Texas Instruments® and enhanced DCDi+™ FLI 2310 technology from Faroudja™, all engineered with the award-winning, best-selling InFocus® ScreenPlay platform. The ScreenPlay 7205 features a unique combination of technologies from InFocus Corporation—the world's leading projection company—for video quality that's not only unsurpassed, but unmatched. The ScreenPlay 7205 offers impeccable home theater images. No ifs, ands, or artifacts.

Pure image. Pure wow.

This native high-definition home theater projector will make you forget you're watching sports or a movie, and lets you experience all the action with larger-than-life characters that only projection can provide. And with all the combined state-of-the-art features, you can enjoy a home theater in a way that only projectors can deliver. Native 1280 x 720 resolution creates high-definition reality from any HD source, while a stunning 2200:1 contrast ratio displays crisp, pop-off-the-screen images against true blacks and detailed grayscale. Thanks to 1100 lumens of brightness, you will get brilliant, dramatic SMPTE (cinema standard) brightness on up to 126" (3.2-meter) wide screens. The HD2+ Mustang® DLP™ chip, the latest high-definition DMD from Texas Instruments, delivers the best performance in video projection. The enhanced

DCDi+™ FLI 2310 from Faroudja gives you progressive scan with enhanced noise reducers, color enhancers and a unique 2:2 pull down—never before seen in home theater projectors—for the smoothest view, with virtually non-existent scan lines and no discernable flicker. This combination of new technology, nestled in the already solid engineering legacy of the ScreenPlay series, delivers such reality, it will leave you thunderstruck.

All the best, only in a ScreenPlay projector.

Never before and nowhere else have such innovative features been combined to deliver image quality that's so stunning. InFocus, the company that built the first-ever single chip DLP™ projector and continues its legacy as the world's largest manufacturer of DLP™ products, brings technologies together in a breakthrough home theater projector solution that incorporates Emmy® award-winning technology from Texas Instruments® and the Academy®-Award-winning Faroudja DCDI™ deinterlacer. This DCDI™ is exclusive to InFocus ScreenPlay, delivering 2:2 pull down and improved graphic enhancers, which work together with award-winning, best-selling InFocus engineering, to deliver flawless images that simply can't be duplicated.

Amaze the most discerning eyes.

For home theater that takes you into a new onscreen reality, nothing equals the InFocus ScreenPlay 7205. With more than enough state-of-theart technologies to please the most discerning videophile and based on award-winning, best-selling ScreenPlay engineering, latest-generation innovations put you right in the middle of all the action. The ScreenPlay 7205 delivers the latest innovations and components available only to InFocus in a performance package that satisfies the most demanding home theater enthusiasts.

Ultimate ease.

Like all InFocus projectors, the InFocus ScreenPlay 7205 was designed to be easy to set-up and operate. A simple keypad and intuitive home theater remote gives you more time to enjoy your theater. For installations, an intuitive, 12-language, icon-based menu lets you simply scroll and select. The ScreenPlay 7205 comes calibrated to D65 color mastering standards for perfect HD colors.

Ultimate product.

Based on the award-winning platform that took top-honors at CEDIA in 2002—voted better than any plasma, better than any flat-panel LCD, better than any other projector—the InFocus ScreenPlay 7205 is available for thousands less than others in its class. Years of dedicated and focused engineering from InFocus, the largest projection manufacturer in the world, makes all this innovation possible at a breakthrough price.

InFocus innovation brings it all home.

Just because InFocus has engineered so much cutting-edge technology in the InFocus ScreenPlay 7205, it does not mean it is out of reach for the home theater enthusiast. The InFocus commitment to innovation and leadership produces amazing home theater products at corresponding economies of scale. At InFocus, large format digital displays isn't just a category—it's all we do, all the time. As you would expect, InFocus projectors are reliable and durable, delivering the best projection with ease of set up and use. The InFocus ScreenPlay series of home theater projectors is stunning evidence of this commitment.

New enhanced lens.

The projector comes standard with an all glass, Zeiss designed 1.3x zoom lens which incorporates a 72mm filter thread in the focus ring and can be used to add neutral density filters, to customize the light output without sacrificing color or contrast.

The InFocus commitment.

Experience for yourself why InFocus Corporation is the worldwide leader in large format digital displays. Our dedication to quality and customer satisfaction is reflected in service options that will bring you a greater return on your investment. InFocus ScreenPlay projectors come with a standard two-year limited factory warranty, including parts and labor, and a 90-day lamp replacement. Our customer support offers you premium service and convenience, whatever your needs.
