APPLICATION VERSATILITY

Although exceptionally portable, the SE2U supports front, rear and even ceiling installations. So no matter how unique your application is, the SE1U is a perfect match and will deliver dynamic images guaranteed to dazzle any size audience.

PLUG AND PROJECT SIMPLICITY

Relax. With the SE2U, Mitsubishi has taken the worry out of your next presentation. In fact, the user-friendly SE2U is so easy and reliable to operate, you can focus your undivided attention on the audience, not the projector. Plug it in and start the show. It's that simple!

VERTICAL DIGITAL KEYSTONE CORRECTION

Absolutely essential for portable projectors, Digital Keystone Correction reduces image distortion by allowing for vertical correction to create a more natural-looking picture even when it is difficult to set up the unit perfectly perpendicular with the screen. This important feature allows you to project at an angle without worrying about trapezoid image distortion or zigzagging.
