Specifications

True XGA/SVGA, 1100 ANSI Lumens

Model Name	SL705X/S	SL703S
Panel	0.7"DMD™ x 1, XGA/SVGA	0.7"DMD™ x 1, SVGA
Native Resolution	XGA (1024 x 768) / SVGA(800 x 600)	SVGA(800 x 600)
Image Size	22" to 300"	30" to 300"
Throw Ratio	60"@2m	60"@2m
Zoom Ratio	1:1.2	Fixed
Projection Distance	0.8m~10m	1m~10m
Lens	Manual Zoom, F=2.6 to 3.1	Fixed, F=2.6
Weight	3.8 lbs (1.7kg)	3.4 lbs (1.5kg)
Projection System	DLP™	
Resolution Supported	640x350 to 1280x1024	
Brightness	1100 ANSI Lumens	
Uniformity	85%	
Contrast Ratio	600:1	
Color	Full 16.7 million color palette	
Aspect Ratio	4:3/16:9 screen selectable	
Horizontal Frequency	20~88 kHz	
Vertical Scan Rate	20~100 Hz	
Projection Position	Front/Rear, Table/ Ceiling	
Lamp	120 W VIP, 1500 hours lamp life	
Audio Noise	<34db	
Input Terminals	RGB: Analog-D-sub 15 pin x 1 Video: Composite Video x 1	S-Video: Mini DIN 4 pin x 1 Audio: mini jack x 1
Output Terminals	1 Watt Speaker x 1	
Video Compatible	NTSC / PAL / SECAM / NTSC 4.43	
Dimensions	220 x 52 x 175mm (W x H x D)	
Auto Switching Power Supply	100 to 240 VAC, 50 to 60 Hz	
Power Consumption	185W (Max.)	
On-Screen Display Languages	English/French/German/Italian/Spanish/Traditional chinese/Simplify Chinese	
Functions	Digital Keystone: Auto Digital Zoom: Blank Mute: Source Detection P-Scan (EDTV): HDTV	Freeze: Volume Laser Pointer (SL705X/S) PIP (Picture in Picture)
Accessories (Standard)	User's Guide Remote Control PWR Cord-(UK, US, Pan-Europe) VGA Cable Compact Leather Case S-video Cable RCA-PC Audio Cable Presentation Wizard (SL705X/S)	Quick Start Card Battery 3-2 Converter Deluxe Soft Carry Case Video Cable Audio Cable HDTV Cable (SL705X/S)
Accessories (Optional)	Mac Adapter	Mac Adapter HDTV Cable Presentation Wizard

BENQ SL705X/S

Lights up eyes, Turns on smiles.

BENQ SL705X/S may be small in size - it weighs in at just 3.8lbs(1.7kg) - but it is very big on features. DLP™ technology, a 600:1 contrast ratio and XGA/SVGA native resolution ensure distinct, crystal-clear pictures and its HDTV compatibility delivers an outstanding video experience. **BENQ SL705X/S** is your best choice for both professional business presentations at the office or unsurpassed cinematic enjoyment in the home.

As Easy As 1-2-3

BENQ SL705X/S is simplicity itself to set up and use. It's as simple as 1-2-3. All you need are just three buttons:

1. Power on.
2. Auto adjustment.
3. Keystone correction, and you are fully set up to give a presentation that's full of impact.

- **Auto** - Automatically detects the signal source and configures the **BENQ SL705X/S** to the computer's frequency, displaying images flawlessly.

- **Keystone** - Corrects a trapezoidal image caused by a tilted projection angle back to the perfect square shape. So that you can start your presentation with a perfectly shaped square image.

A New Standard in Visual Comfort

- **HDTV / 16:9 Wide-Screen**
The **BENQ SL705X/S** is a breakthrough in visual comfort. The built-in HDTV compatibility (720p, 1080i) ensures that picture quality matches that of digital TVs. What's more, the image is projected in a 16:9 wide-screen ratio, the dimensions most comfortable to the human eyes.

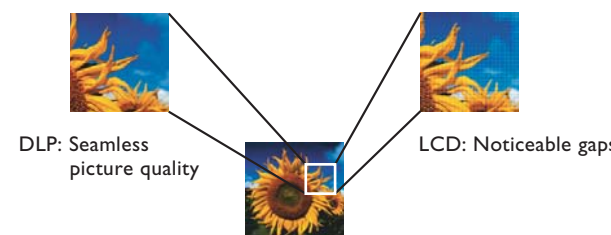

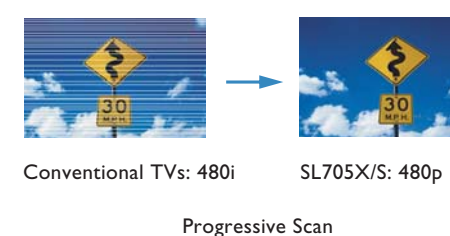

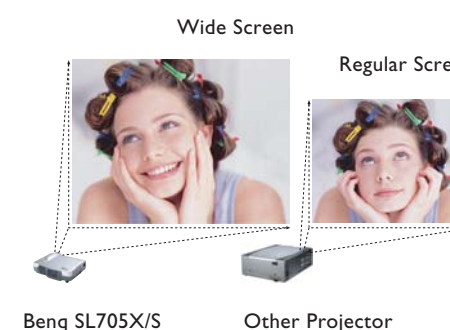

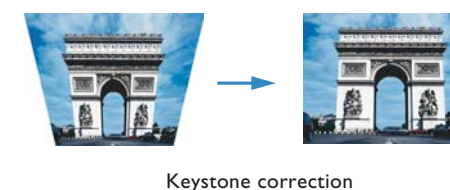

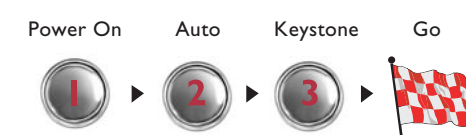

- **High Density Digital Progressive Scanning (P-Scan)**
BENQ SL705X/S uses high density progressive scanning with double the number of scan lines found in conventional televisions. (480i 480p). This eliminates flicker and produces a much more stable, exquisitely detailed picture so that even when watching for a long time, your eyes will not feel tired.

- **DCMS Dynamic Color Management System**
DCMS ensures the image color remains true to real life by using greater color accuracy and richer color saturation to give you ideally vivid and beautiful images.

DLP™ technology

- **600:1 Ultra High Contrast Ratio**
Using DLP™ technology, the contrast ratio of **BENQ SL705X/S** surpasses general LCD projectors, delivering pictures with visual depth, sharper text and more detail in darker portions of the image.

- **Seamless Picture Quality**
Enhanced by state-of-the-art DLP™ technology by Texas Instruments, **BENQ SL705X/S** delivers images that are crystal clear and sharper than ever by eliminating the "screen door" effect - the noticeable gaps in large image that used to appear in LCD projector images. Say goodbye to the big gaps that often appear with increased image size and say hello to seamless picture quality!

- **60"@2m Wide-Angle Lens**
The special wide-angle lens allows you to project a 60" image from just 2 meters; the biggest image is 300" wide diagonally. Never again will you have to put up with small presentations in small conference rooms.

- **Compact & Quiet**
Whisper quiet at 34db, weighing a mere 1.7kg (3.8lbs) with a B5 paper footprint, this little projector is truly a go-anywhere presentation heavy-weight.

Powerful Tools. Simple Operation

- **Presentation Wizard**
No more messy mouse cables: the Presentation Wizard uses an infra-red receiver, allowing you to control images from a distance. Also, there is a laser pointer to highlight important areas, and the projected image can be turned off instantly, diverting the audience's attention back to you. You can give all your attention to your presentation. Without any of the hassle.

- **Picture in Picture (PIP)**
BENQ SL705X/S is able to accept two picture signals simultaneously and this means you can frame one picture within a larger picture, allowing your audience to grasp all the information. Just another feature that can help you increase the impact of your presentation.

- **Digital Zoom**
You can enlarge a section of the picture, emphasizing important areas.

- **Blank**
Turn the image on and off to divert the audience's attention between you and the screen. And you can gradually fade the images back in whenever you like.

- **Freeze**
Freeze the frame of a video presentation whenever you want to show a still image.
