So small, such high quality, new microportable creates a new category of projector

The world's first microportable projector with such light weight, small size and high performance, the Compaq MP1600 Microportable Projector meets the traveling professional's needs for easy portability, simple plug-and-play setup and high picture quality. Now it's easier than ever to make a successful presentation and leave a great impression—all at a competitive price.

Designed for travelers such as sales representatives, training specialists, middle and upper management professionals and marketing consultants, the MP1600 Microportable Projector is as easy to set up as a monitor. Its plug-and-play—also known as "plug-and-present"—technology works across a wide range of Compaq and third party devices, instantly recognizing the host PC and automatically adjusting the necessary settings.

An integral part of the Compaq family of products designed to help mobile professionals achieve a competitive advantage for their business, the MP1600 Microportable Projector works together with our notebooks and handheld portable solutions as well as Compaq desktops and workstations, to give traveling professionals the ease of use, quality, reliability and enhanced productivity they need.

- → Aggressive pricing for high lumination[1]
- → Robust compatibility with Compaq and third party PCs
- → Compaq design for easy operation
- → Compaq quality and reliability help presenter leave a good impression
- → 2-year Worldwide Limited Warranty[2] and outstanding Compaq support

COMPAQ

Better answers

Small, lightweight portable projector leads the industry

The Compaq MP1600 Microportable Projector leads the industry in the two criteria most used to evaluate projectors—lumens per pound and price per lumen. At 600 lumens and only 4.2[4] pounds, it provides a brighter image for its weight than any competing projector. And it has one of the lowest prices per lumen on the market.[1] Digital Light Processing (DLP™) technology from Texas Instruments provides a high resolution (XGA) that is brighter and more uniform than other projectors, for the terrific picture quality that always makes a great impression.

Features

Less weight and bulk
→ Only 4.2[4] pounds and 175 cubic inches (8.25" H x 3" W x 9" D) for easy and convenient travel[3]
→ Fits in notebook carrying case along with notebook computer
→ Users can carry more sales materials or lighten their load
→ Magnesium casing provides lightweight durability
→ Security lock keeps the projector safe when left unattended

Compact form factor
→ Enables presentations in space-constrained areas
→ Eliminates the need to rearrange items to make room for projector
→ Leaves room to spread out papers or look at samples during presentations

Superior plug-and-play
→ Projector instantly recognizes host device settings, automatically synchronizing for fast and easy setup
→ Includes VGA and DFP inputs, with cables
→ Quick setup improves effectiveness of presentation

→ Easy operation with standard Compaq 3-button controls and on-screen display, including zoom and keystone correction
→ The bulb can be replaced quickly and easily by the user. Cool-down time is approximately 5-10 minutes

Outstanding compatibility
→ Projector provides seamless compatibility with Compaq portable PC platforms, including *Armada®* and *Prosignia®* notebooks and C-Series™ and *Aero®* PC Pro handhelds, and with Compaq desktop platforms, including *Deskpro®* EN and EP Series and *Compaq Professional Workstations*
→ Compatible with mainstream third party portable PCs
→ Device compatibility assured with analog VGA and digital DFP (future availability) interfaces

Ability to add video
→ An optional Video Module lets users plug the projector into a VCR, DVD player or camcorder
→ The module enables toggling between computer and video to show a clip as part of a presentation
→ Audio is provided through notebook PC or other external device

Case for portability and presentations
→ The standard leather carrying case, specially designed for the Compaq MP1600 Microportable Projector, lets the user make presentations without removing the projector
→ When unzipped, the case lies flat while the projector plugs into a PC
→ The projector is secured to the case: stability foot at the front slides under a fabric loop; the rear is secured by a Velcro® patch
→ Compartments hold wires, Video Module, extra lamps and other accessories, plus quick-setup cards and business cards

Warranty
→ A 2-year Worldwide Limited Warranty covers parts and labor[2]
→ Advanced Unit Replacement program offers next business day replacement of a defective unit during the first year of the warranty[2]
→ Mail-in repair service is provided during the second year[2]
→ Warranty also provides toll-free 24x7 hotline support[2]
→ Optional Video Module is covered by the same warranty as the projector[2]
→ Projector Lamp is covered by a 90-day or 1000-hour warranty[2] (For the user's convenience, a clock in the projector records the number of hours the lamp has been used)

Projected images are sharp and bright in any light

Extraordinary convenience is the hallmark of the Compaq MP1600 Microportable Projector. Designed for presenting electronic slide shows, interactive meetings and technical demonstrations to small to medium-size audiences, it has the efficiency and ease of use that help the presenter establish credibility, generate interest, demonstrate resourcefulness and increase influence with viewers. So small it fits into a notebook computer case—with the computer—and as easy to set up as a monitor, the Compaq MP1600 Microportable Projector is always ready to make a great impression.

Performance	MP1600 Microportable Projector	Models
Brightness	➜ With 600 lumens, the MP1600 provides twice the power of projectors twice its size ➜ The display is bright enough for easy visibility in any light—graphics won't fade as the room light increases	**Projector** ➜ Compaq MP1600 Microportable Projector 386202-001
Uniformity	➜ The amount of light is uniform from the middle to the edges of the projected image ➜ Uniform brightness enables high-resolution presentations, with sharp images from corner to corner ➜ Uniformity increases the perception of overall image brightness	**Related Options** ➜ Video Module 116298-001 ➜ Replacement Bulb 118052-001
Resolution	➜ High resolution XGA (1024 x 768) setting provided through Digital Light Processing (DLP) technology is optimal for presentations because it displays more information than lower resolutions ➜ AutoSynch Technology automatically adjusts the presentation to fill the screen, scaling up to XGA from VGA or SVGA and down from SXGA ➜ The projector also provides 832 x 624 Macintosh® compatibility	
Seamless Picture	➜ Display technology eliminates the "screen door" effect on most front projectors ➜ Seamless picture creates incredibly sharp images	
Contrast	➜ Projector provides 12 times the contrast of most LCD projectors ➜ High contrast images (400:1) are sharp, colorful and easy to read	
Image Projection	➜ The distance from the projector to the screen can range from 3 to 30 feet ➜ Because the lens is mounted at the top of the projector, keystone effect is minimal—less than 3 percent distortion ➜ Keystone can be corrected with digital controls
