

Schools and businesses can affordably tap into interactive working and learning with this 3,000-lumen, ultra-short-throw projector.

Make any surface interactive - including a tabletop - without the need for a screen or whiteboard. This complete package comes with everything that's needed to create a collaborative learning or working experience, including projector, digital pen and wall-mount.

#### **Large, fully interactive projection:**

Achieve an image size of up to 102 inches, fully interactive right to the corners. Notes or additions can be saved with the digital pen, giving complete control of the projection area. Annotate without casting a shadow thanks to the ultra-short-throw design, achieving a 70-inch projected image from just 13cm.

#### **Desktop collaboration:**

Mount the projector vertically, allowing collaborative work on documents or multimedia files on the tabletop to make group projects and classroom activities more engaging.

#### **Easy to use:**

Always easy to use, the projector is quick to set up and shut down with USB plug and play functionality plus quick start and instant off features, which avoid wasting valuable lesson time.

#### **High quality images:**

No matter what the interactive projector is used for, Epson's 3LCD technology ensures high-quality images with its equally high White and Colour Light Output for vivid, natural colours and deep blacks, even in daylight.

#### **KEY FEATURES**

- **Ultra-short-throw**  
Reduces shadows
- **Interactive**  
Works horizontally and vertically
- **Easy to use**  
Control with digital pen
- **Large image**  
Up to 102 inches
