VPL-EX225, VPL-EX221

BrightEra **HDMI**

VPL - DX/DW Series

Full-featured ultraportable

Good TCO, Energy-efficient Design and Operational Convenience

The VPL - D Series and VPL - E Series delivers a full range of brightness options to meet virtually any type of education or business projection environment

• Auto Mode (Auto Brightness Adjustment Function)

The brightness of the lamp's output is automatically adjusted depending on the brightness of the projected image, to avoid unnecessary power consumption. When showing darker images that don't require high brightness, lamp output decreases.

• Lamp Dimming Function

The VPL - D Series and VPL - E Series projectors are equipped with a lamp dimming function. After 10 seconds of a static signal feed, the lamp dims by approximately 15% which is hardly noticeable.

If one of these projectors is left powered on while not in use, after a set period of time it will automatically detect no change of signal input and will dim the lamp to as low as approximately 30% of original brightness to significantly reduce energy consumption.

Lamp dimming scheme

* Lamp high mode. The values are approximate.

VPL - EX/EW Series

Energy and cost efficient

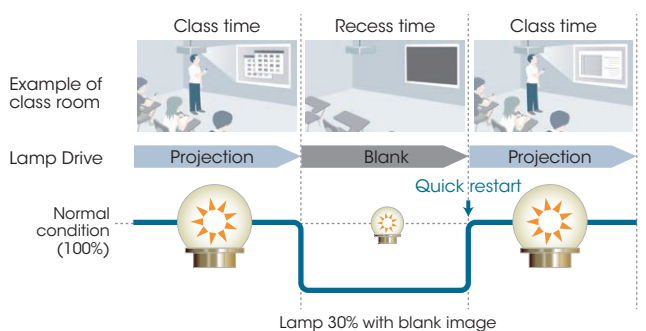

Sony's VPL - D Series and VPL - E Series data projectors are economically designed for optimum energy efficiency, thanks to their Auto Power Saving function with lamp control technology, energy saving design, and long-lasting lamp. Additionally a variety of network functions such as Web Control and Network Presentation can be performed. Rich inputs and outputs are provided, to suit a broad range of applications.

The VPL - D Series and VPL - E Series models with native WXGA resolution, can present clear and dynamic images on a widescreen with high brightness (up to 3,200 lumens for D - Series and 3,700 lumens for E - Series), while the models with high picture quality in native XGA resolution can also present up to similar high brightness.

Delivering superb images along with simple operation, Sony's VPL - D Series and VPL - E Series projectors provide an excellent balance between quality and cost, ideal for use in education or business.

• Blank

The VPL - D Series and VPL - E series projectors can temporarily disable video signal output. This function can be easily operated with just the touch of a button on the supplied Remote Commander unit. In addition, this function allows blank image projection with low power consumption using lamp control technology.

The values are approximate.

Energy Saving design

The VPL - D Series and VPL - E Series projectors offer remarkably low power consumption, allowing users to make significant savings on their electricity expenses.

ECO MODE Key

With a single push of the ECO MODE key on either the projector or the supplied Remote Commander™ unit, users can select an energy-saving setting from the ECO Mode menu.

Long-lasting Lamp

By incorporating a high-performance lamp and advanced lamp-control technology, the VPL - D Series and VPL - E Series projectors deliver an extremely long lamp replacement time of 7,000 hours. (Approximate recommended period, in low mode.)

Lamp and Filter

Synchronized Maintenance Available on VPL - E Series Only

The expected lamp maintenance time for each model can reach up to 7,000 hours* depending on the selected lamp mode, and dust filters require the same maintenance interval. Synchronizing the timing of lamp and filter maintenance enables users to reduce the numbers of "ladder climbs" for maintenance.

A Variety of Network Functions

- Via LAN Cable or Wirelessly

Web Control

When VPL - D Series and VPL - E Series* projectors are installed in a local area network (LAN), their versatile network functions are available to any PC on that network.

Installation can be via a LAN cable, and there is no need to install any additional network software on the PC.

* Available on All VPL - E Series, VPL-DW125, VPL-DX145, & VPL-DX125.

Network Presentation

When VPL - D Series and VPL - E Series*¹ projectors are installed on a LAN, presentations can be projected from any PC on the network - whether connected via a LAN cable or wirelessly.*²

Up to four users can project PC images simultaneously; up to eight users*³ can connect to one projector.

*¹ Available on All VPL - E Series, VPL-DW125, VPL-DX145, & VPL-DX125.

*² IFU-WLM3 dongle is required. For VPL - D Series, it is included. For VPL - E Series, the dongle is an optional accessory.

*³ For both models, up to seven users for wireless.

USB Media Viewer

By attaching a USB memory device*¹ to the VPL - D Series and VPL - E Series*² USB connector, the operator can directly project data files stored on the USB memory device. Supported file formats are JPG, BMP, PNG, TIF, and GIF.

*¹ USB memory device is not included.

*² Available on All VPL - E Series, VPL-DW125, VPL-DX145, & VPL-DX125.

Broad Range of Applications Available on VPL - E Series Only

Convenient, Simple Projector Adjustment

The projectors' 1.6x* flexible standard zoom lens allows the projector to fit wide range of installations, and simplifies replacement of an existing projector.

* The VPL-EX221 is a 1.2x zoom projector; the VPL-EW225, VPL-EX241, and VPL-EX245 are 1.3x zoom projectors.

Throw ratio*	1.0:1	1.5:1	2.0:1
VPL-EW275 (1.6x)	1.10:1	1.79:1	
VPL-EW225/EX241/EX225 (1.3x)	1.37:1		1.80:1
VPL-EW245/EX275/EX271/EX245 (1.6x)	1.40:1		2.27:1
VPL-EX221 (1.2x)	1.47:1		1.77:1

1.5:1-1.8:1: Typical 1.2x compact projectors throw ratio

* Throw distance=Throw ratio x Screen width. The values are approximate

Multiple Inputs & Outputs

The VPL - D Series come with 1W speaker and interfaces include RGB, HDMI, RJ-45, USB Type-A, USB Type-B*¹.

The VPL - E Series projectors include a high wattage speaker (16W)*² and a variety of interfaces including 2xRGB, HDMI, S-Video, RS-232C, RJ-45, USB Type-A, USB Type-B and Microphone inputs*².

Both series accept a wide variety of inputs signals, greatly expanding system connection possibilities.

*¹ Available on VPL-DW125, VPL-DX145, & VPL-DX125.

*² Available on VPL-EW275, VPL-EW245, VPL-EW225, VPL-EX275, VPL-EX245, & VPL-EX225.

Superb Picture Quality

Brilliant Color Performance

The VPL - D Series and VPL - E Series projectors adopt a 3LCD projection system incorporating three LCD panels. This system enables each projector to present bright and natural images. By combining an advanced generation of inorganic LCD panels that utilize Sony's BrightEra™ technology with a 3LCD projection system, the projectors offer high picture quality and brightness.

12-bit 3D Gamma Correction

The VPL - D Series and VPL - E Series projectors incorporate 12-bit 3D gamma correction circuitry to perform highly accurate gamma correction, achieving smoother gradations and a richer gray scale.

Film mode

Smooth, high-quality images are reproduced using a high-performance processor for I/P conversion. Source signals suitable I/P conversion are processed automatically, and extremely accurate images are reproduced.

Other Features

Closed Captioning

Official teletext broadcasting, developed by the NCI, USA

Network and Control

Controls and monitors projector status compatible with various control systems.

*1 The figures are the expected maintenance time and not guaranteed. They will depend on the environment or how the projector is used. *2 The values are estimate. *3 This value is average. *4 Available for the VESA Reduced Blanking signal. *5 Not available in standby. From INPUT A and INPUT B. *6 Works as an audio switcher function. Output from a selected channel; not available in standby. *7 Will be applied.

Q Can these new models work with network presentation?

A Yes, for selected models*¹ presentations can be projected from any PC on the network – whether connected via LAN cable or wirelessly.*² Up to four users can project PC images simultaneously and up to eight users*³ can connect on one projector.

Q Why the new models are more energy saving?

A They come with these energy efficient features :

- ✓ **Eco Mode Key**
Users can easily select power-saving Eco Modes. The most energy-efficient mode is accessible through a single button-push and further adjustments are available through an easily understood menu system.
- ✓ **ECO Lamp Dimming**
Reduce power consumption without user detection or after a user pre-set time, reduce brightness and power consumption up to 30% power usage for ultimate power eco saving.
- ✓ **Auto Dimming Mode**
Adjust brightness depending on picture. The darker the picture, the less energy used by the lamp. (Max 70% Lamp power reduction based on image).
- ✓ **ECO Picture Mute – (Instant off / Instant On)**
New Picture Mute reduced power consumption down to 30% power usage, saving cost and lamp hours. No need to power complete off and turn back on that does increase power consumption and time consuming.

✓ **Eco Gauge**

At time of projector shut down an ECO achievement indication (gauge) appears to show the user how well they have used their projector. The more Eco features used, the better the ECO green leaf mark. (Calculated by use of Eco Functions and actual lamp wattage)

Q What technology prolongs the lifespan of your projectors?

A In the latest lamp technology, the new driving scheme reduces gap expansion that reduces brightness gradation and a new cooling system allows uniformity in the temperature of the glass bulb which prevents the glass from clouding. Hence delivering an extremely long lamp replacement time of 7000 hours*⁴, which is highest in its category. If your projector is in storage, please turn it on every month for 20 minutes to prolong the life span of your unit.

Q How to select correct projector for existing room size?

A Sony has developed an interactive tool – ‘Projector Simulator’ that helps you determine which projector is suitable. This tool is available in Google Play and iTunes App Store.

Search for "sony projection simulator" in Google Play

Search for "sony projection simulator" in iTunes App Store

*¹ Available on All VPL – E Series, VPL-DW125, VPL-DX145, & VPL-DX125. *² IFU-WLM3 dongle is required. For VPL – D Series, it is included. For VPL – E Series, the dongle is an optional accessory.
*³ For both models, up to seven users for wireless. *⁴ Approximate recommended period in low mode.
