

## DH1017

Make a bright impact

- High resolution for stunning clarity
- Full HD 1080p - 4200 Lumens
- Ultimate Control - Full support for Crestron, Extron, AMX, PJ-Link and Telnet LAN commands
- Extensive connectivity - HDMI, DisplayPort, 2 x VGA

# DH1017

The Full HD DH1017 produces crystal clear, bright images, perfect for a broad range of applications including technical, advertising media and medical training where detail really matters.

Full support for Crestron Roomview, Telnet, Extron IP Link, AMX dynamic device discovery and PJ-Link protocols, allow almost all aspects of the DH1017 to be controlled across a network, keeping you in control, wherever you are

The environmentally friendly DH1017 has energy saving features including <0.5W standby mode and auto power off saving you both time and money. Our unique Optoma Colour guarantee ensures hassle-free, long-lasting projection.

## Crestron Roomview® - NETWORK CONTROL

RoomView® software provides a custom configurable interface to monitor, manage and control every device in every room remotely from any computer

- Manage up to 250 projectors at the same time (via master PC).
- Control and alter the projector settings using a simple web browser page including OSD menu control.
- Set up email alerts for warning message
- Ideal for large installations in both the educational and business environments.

## Full HD

Full HD (1920 x 1080) has more than twice the resolution of HD Ready (1280 x 720). DH1017 is compatible with HDTV broadcasts and high-definition media to project impressive full 1080p images and video in their original digital brilliance.

## RS232 Control

The extensive RS232 command set makes it simple and easy to control the DH1017 with any control system.

**AMX Compatibility – Dynamic Discovery**  
IP protocol is incorporated into the DH1017. This feature allows for easy installation with AMX control systems

## Extensive Connectivity

This native 1080p projector accepts a wide variety of computer and video input signals.

Connectivity includes: HDMI, DVI-D, dual VGA (SCART/ Component via adaptor), S-Video, Composite, VGA-Out, RS232, RJ45 and +12V trigger.

Two audio inputs for individual PC and video connections enable the DH1017 to function as an audio switcher and volume controller, thereby eliminating complicated and costly additional audio hardware and cabling.

## Clear, Focused Images

DarkChip3™ technology from Texas Instruments produces a stunning 10,000:1 contrast ratio for pin sharp graphics and crystal clear text. Crisper whites, ultra-rich blacks makes images come alive and text easier to read

- ideal for business and education presentation.

3000:1 contrast ratio

10,000:1 contrast ratio

## Environmentally Friendly

The DH1017 incorporates energy saving features to conserve power and extend the lamp life:

To achieve the maximum 3500hrs<sup>2</sup> lamp life time the projector should be operating in STD mode and the shut down timer should be enabled to automatically switch off the projector if it is accidentally left on when no longer required. Enabling the <0.5W Standby mode will ensure the minimum energy consumption when the projector is not being used.

## Extra Features

- Easy lamp replacement from the top cover
- Direct power on – start up time is significantly reduced as standby mode is bypassed when the power cable is inserted into an active power outlet. This eliminates the need to use the 'Power' button on the remote control or the projector keypad.
- Signal power on – the projector will power on when it receives a signal. This eliminates the need to use the 'Power' button on the remote control or the projector keypad.

- Auto power off – if after a pre-determined time the projector does not receive a signal, it will turn itself off automatically, conserving power and extending the life of the lamp.
- Key pad lock – once enabled prevents unauthorised adjustments ensuring the projector can only be controlled via the remote control.
- +12v Trigger – electric screen control
- Logo capture – customise your start up screen
- Easy to use remote with laser pointer, mouse control and direct source selection

## Virtually Maintenance Free = Lower Cost of Ownership

DH1017 provides lower cost of ownership, longer life and improved reliability. The filter-free projector design does not require regular filter cleaning or filter replacement, saving you time and money.

## Colour Guarantee

We are so confident that the DH1017 image colour quality will remain as good as the day you bought it that Optoma will guarantee it for five years.

## Amazing Colours

The DH1017 incorporates BrilliantColor™ technology to produce stunningly bright images with perfectly balanced life-like colours.

## 3D technology

Using the inherent speed of DLP® technology, Optoma Full 3D projectors can output video and images at an astonishing rate of 120Hz, allowing you to show full screen, full colour, stereoscopic 3D. The 3D effect is generated by splitting this signal into two standard video streams, one for each eye. Using DLP® Link™ technology, the 3D glasses synchronise with the image on screen to filter each stream to the correct eye. Your brain then combines the two streams to make them jump into life.

The DH1017 supports multiple 3D formats from various devices such as PC, Blu-ray 3D™, Sony® PS3, Microsoft® Xbox 360 or 3D TV broadcast system.

## PJ-Link Compatibility

## System integration control

Multiple DH1017 can be monitored over LAN and can also provide the user with an email message alert in case an error occurs or a lamp fails or needs to be replaced using Crestron Roomview. The web browser interface and full support for Telnet, Extron's IP Link, AMX dynamic device discovery and PJ-Link protocols, allow almost all aspects of the DH1017 to be controlled across a network, keeping you in control, wherever you are.
