Product overview

The ultraportable and compact ASUS S1 Mobile LED Projector features an internal rechargeable 22Wh battery that delivers up to 3 hours of projection time, and allows the S1 to function as a 6,000mAh power bank for charging mobile devices. A best-in-class short throw ratio allows the S1 to project 41-inch images from just 1 meter from the screen.

The use of an LED light source provides the S1 with Instant On/Off capabilities with almost no warm up or cool down times. ASUS SonicMaster audio-enhanced technology provides quality sound; while the MHL port lets users connect the S1 to mobile devices as a projection source while charging them at the same time.

Why you need the S1

Using an S1 for business can be a smart move that yields big results. You don't need to haul bulky projectors everywhere you go. Just invest in a portable projector, load it with your presentation and show your clients what your firm can do for them.

Using an S1 for entertainment purposes a brisk move that shares big screen fun. Any large flat vertical surface can serve as your screen, and having its own battery means you won't have to look for power sockets.

Key Product Features Overview

S1 Mobile LED Projector

Mobile Projector and Pocket Charger in One

Ultra portability thanks to a compact design with a built-in battery

Ultra-light Weight

Compact dimensions (W110.5 x D102 x H30.7 mm) and 342g in weight

Embedded Battery

Built-in rechargeable 22Wh battery for up to 3-hour projections in battery mode

Power Bank

6000mAh Power Bank - USB Charging even when the S1 is off

LED light source with best-in-class short throw ratio

Short Throw
41" @ 1m

Short throw projections of 41" from just 1 meter from the screen

Instant On/Off

5 seconds on and instant off

200 lumens, long-life LED light source with 100% NTSC color gamut

Incredible, award-winning design

product design award

2014

Zen-inspired design, crafted with a sleek and stylish concentric-circle finish for a modern look

The fullest multimedia experience

An HDMI input port lets users connect the S1 to various IT, multimedia and mobile devices

MHL provides a single-cable video and power connection for compatible smartphones; while also charging the device

ASUS SonicMaster audio technology for excellent sound

Show, AS YOU GO

The S1 has compact dimensions that measure just 110.5 x 102 x 30.7mm (4.35 x 4.02 x 1.21 inches) and has a desktop footprint no larger than two business cards put side by side. It weighs just 342g (0.75 pounds).

The S1 comes with a built-in rechargeable 22Wh battery and can be used as a 6000mAh power bank to charge mobile devices even when the S1 is switched off. Its 6000mAh battery is the largest capacity in the pocket projector class.

Its lightweight, cable-free design makes it extremely portable and easily slips into your briefcase for easy-to-setup presentations on the go.

Make full use of your S1

Project images or videos on any flat, vertical surface with the S1 for best results, we recommend a **light colored wall (preferably smooth and white)**. The projector can show up to 100 inches, you can adjust the size of the projected image by simply moving the S1 towards or away from the projection surface. **Dimming room lights** will also improve projection quality.

The cable-free features allows you to use the S1 anywhere, and you don't even have to worry about where the nearest power socket is.

Large, bright, and clear projections on-the-go

Despite the S1's compact size, updated DLP technology and a 200 lumens light source delivers bright, clear projections.

The S1 has a 1.1:1 short-throw ratio lens provides 41-inch images from a distance of 1 meter, it's perfect for presentations in small meeting rooms, classrooms or coffee shops. It is ideal for those who conduct presentations in confined space.

Launch the presets by pressing

The S1 has 6 preset modes which enables users to adjust display brightness depending on the situation.

6 preset modes:

Standard mode

This is the brightest mode for general use

Battery mode

It allows you to optimize power consumption (50 lumens) while running on battery power.

Theater mode

This is recommended for playing videos.

Presentation mode

This is suited for quick use. It provides a higher brightness (70 lumens) when running on batteries and will last up to 100mins.

Flashlight

It produces a steady beam of white light which can be used as a torch. This is only available under the battery mode.

Emergency light

This emits a white pulse when the S1 is running on batteries and has no input signal. It serves as an S.O.S. beacon when you are in need of help.

Save your money and time

The S1's LED light source has a 30,000-hour lifespan, so you can use the S1 for eight hours a day for up to 10 years without needing a replacement lamp.

It also gives the S1 an Instant On/Off capability as there is no need for it to warm up or cool down. This lets you present your ideas or share videos almost immediately.

Simple navigation menus allow you to operate the S1 without having to read through complex manuals.

Easily navigate through menus or operate your projector via the panel buttons

4 steps to set up your S1

- 1 Connect the LED projector to the power adapter.

- A** Connect the power cord to the power adapter.
- B** Connect the AC power cord to a power source
- C** Connect the DC power connector to your LED projector.

- 2 Connect the LED projector to your device.

- A** HDMI/MHL
- B** Audio output power
- C** Power output (5V/1A)

- 3 Press the power button.

- 4 Open the lens cover and adjust the focus ring.

- A** Open the lens cover by moving the lever to the left.
- B** Adjust the image by moving the focus ring up or down.

Seamless connection to your mobile devices

Users can easily connect the S1 to various IT, multimedia and mobile devices through the HDMI port.

The MHL port allows you to mirror everything on your phone onto the projected image by simply connecting your MHL-enabled phone to your ASUS S1 projector. It also charges your device while in use.

What benefit does MHL bring to the S1?

MHL specification is an HD video and digital audio interface for connecting MHL-enabled phones and portable devices to home entertainment products. **It supports digital audio/video and simultaneously provides power to the mobile device.**

How does HDMI benefit the S1?
HDMI lets you view HD content from HD-DVD or Blu-ray Disc players and other input devices. HDMI carries both video and audio signals in a single cable for easy set-up.

 *SonicMaster*

Clearer sounds deliver truer experience

ASUS SonicMaster delivers optimized hardware and precision-tuned software for professional-grade audio.

It delivers true high fidelity sound via distinct directional audio detection – all musical instruments are heard, delivering rich and diverse audio.

Stylish and durable design

ASUS designers penned the S1's Zen-inspired lines and gave its sleek, modern chassis a stylish concentric-circle finish. Finished in aluminum, this premium design helped the S1 win the 2014 CES Innovations Award and 2014 iF product design award.

The use of aluminum aids in heat dissipation and prevents the S1 from overheating. The lens cap has also been designed to protect the lens from damage as well as dust.

What are the benefits of an aluminum chassis?

The use of aluminum aids in heat dissipation and prevents the S1 from overheating. Also, aluminum is not prone to warping even at temperature extremes. The S1 is extruded from one piece of aluminum for additional durability and strength.

Protective sleeve

The protective sleeve keeps your S1 safe when in your bag or briefcase. It has a cut-out slot for the USB port so you can charge your mobile device even when your S1 is not in use.

Lens cap benefit:

Protects the lens from damage as well as dust
