

Multimedia Projector

MODEL PLC-XE31

Owner's Manual

Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

◆ **Antitheft Function**

- This projector is equipped with an Antitheft alarm function which works when detecting a vibration to prevent the projector from being stolen. (p 48, 50 - 52)
- You cannot operate the projector without remote control. Keep the remote control securely at hand, then the projector becomes less likely to be stolen.
- Adopt easily recognized orange cabinet for security.

◆ **Security Function**

The Security function guards the projector from an unauthorized person with the Alarm (p. 48) and the PIN code lock. (pp. 19, 47, 48)

◆ **Logo Function**

The Logo function allows you to customize the screen logo to show the projector is your property. (pp. 43, 44)

◆ **Compact Design**

This projector is designed compact in size and weight. It is easy to carry and work anywhere you want to use.

◆ **Compatibility**

The projector accepts various video and computer input signals including; Computers, 6 Color systems (PAL, SECAM, NTSC, NTSC4.43, PAL-M, or PAL-N), Component video, S-Video and RGB scart.

◆ **Simple Computer System Setting**

The projector has the Multi-scan system to conform to almost all computer output signals quickly. (p. 27)

◆ **Quick Termination**

The AC power cord can be plugged out right after turning off the projector without waiting for the projector is cooled down. (p. 20)

◆ **Digital Zoom (for Computer)**

The digital zoom function allows you to focus on the crucial information during a presentation. You can expand the images approx. 16 times of screen size and compress them approx. half of the screen size. (p. 34)

◆ **Noise Reduction Function**

The Noise reduction function helps you to reduce the contained noise on the screen. (p. 40)

◆ **Blackboard Function**

Blackboard* can be used as a projection screen. (pp. 31, 38)

* The board color is limited to Green.

◆ **Multilanguage Menu Display**

Operation menu is available in 16 languages; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, or Japanese. (p. 42)

◆ **Switchable Interface Terminal**

The projector provides a switchable interface terminal. You can use the terminal as computer input or monitor output conveniently. (p. 45)

◆ **Power Management**

The Power management function reduces power consumption and maintains the lamp life. (p. 45)

You can turn on or operate the projector ONLY via the remote control. Make sure not to lose the remote control.

✓ **Note:**

- The On-Screen Menu and figures in this manual may differ slightly from the product.
- The contents of this manual are subject to change without notice.

Trademarks

Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.

To the Owner

Before operating this projector, read this manual thoroughly and operate the projector properly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time.

Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section in the end of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center.

	CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN	
CAUTION : TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.		
	THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.	
	THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT.	

NOTE: This symbol and recycle system are applied only to EU countries and not applied to the countries in the other area of the world.

Your SANYO product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre.

In the European Union there are separate collection systems for used electrical and electronic products.

Please help us to conserve the environment we live in!

Safety Precaution

WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- This projector produces intense light from the projection lens. Do not stare directly into the lens as much as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.
- Install the projector in a proper position. If not, it may result in a fire hazard.
- Provide appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum clearance must be maintained. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

- If the projector is not to be used for an extended time, unplug the projector from the power outlet.

CAUTION ON HANGING FROM THE CEILING

When hanging the projector from the ceiling, clean air intake vents, air filters, or top of the projector periodically with a vacuum cleaner. If you leave the projector without cleaning for a long time, the dust will block the operation of the cooling function, and it may cause a breakdown or a disaster.

DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.

CAUTION

Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75.

Ne peut être utilisé dans une salle d'ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.

Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

- When the power cord or plug is damaged or frayed.
- If liquid has been spilled into the projector.
- If the projector has been exposed to rain or water.
- If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
- If the projector has been dropped or the cabinet has been damaged.
- When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Voor de klanten in Nederland

Bij dit produkt zijn batterijen geleverd. Wanneer deze leeg zijn, moet u ze niet weggoien maar inleveren als KCA.

Air Circulation

Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

CAUTION

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.

- Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.
- Keep the exhaust vent at least 3'(1m) away from any objects.
- Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used.
- Do not put anything on the cabinet. The materials put on the cabinet will not only get damaged but also cause fire hazard by heat.

Cooling fans are provided to cool down the projector. The fans' running speed is changed according to the temperature inside the projector.

Installing the Projector in Proper Position

Install the projector properly. Improper Installation may reduce the lamp life and cause a fire hazard.

Do not tilt the projector more than 20 degrees from side to side.

Do not point the projector up to project an image.

Do not point the projector down to project an image.

Do not put the projector on either side to project an image.

Moving the Projector

When moving the projector, replace the lens cover and retract the adjustable feet to prevent damage to the lens and cabinet. When the projector is not in use for an extended period, put it into a suitable case to protect the projector.

When handling the projector, do not drop, bump, subject it to strong forces or put other things on the cabinet.

USE CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

- Do not drop or bump the projector, otherwise damages or malfunctions may result.
- When carrying the projector, use a suitable carrying case.
- Do not transport the projector by using a courier or transport service in an unsuitable transport case. This may cause damage to the projector. To transport the projector through a courier or transport service, consult your dealer for their information.
- Do not put the projector in a case before the projector is cooled enough.

Federal Communication Commission Notice

Note : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Numbers : PLC-XE31
Trade Name : Sanyo
Responsible party : SANYO FISHER COMPANY
Address : 21605 Plummer Street, Chatsworth, California 91311
Telephone No. : (818)998-7322

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada :

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

AC Power Cord for the United Kingdom :

This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus \diamond . If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions.

If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed.

The end of the flexible cord should be suitably prepared and the correct plug fitted. (See Over)

WARNING : A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.

The Wires in this mains lead are coloured in accordance with the following code:

Green-and-yellow Earth
Blue Neutral
Brown Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol \perp or coloured green or green-and-yellow.

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

WARNING : THIS APPARATUS MUST BE EARTHED.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

Part Names and Functions

Front

- ① Antitheft alarm setting buttons
- ② Infrared Remote Receiver
- ③ Zoom Ring
- ④ Projection Lens
- ⑤ Focus Ring
- ⑥ Lens Cover
(See p. 54 for attaching)
- ⑦ Exhaust Vents
- ⑧ Indicators
- ⑨ Speaker
- ⑩ Air Intake Vent
- ⑪ Power Cord Connector
- ⑫ Terminals and Connectors

Back

- ⑬ Lamp Cover
- ⑭ Air Intake Vents
(back and bottom)
- ⑮ Air Filters
- ⑯ Battery Compartment
(For Antitheft alarm function)
- ⑰ Adjustable Feet

CAUTION

Hot air is exhausted from the exhaust vent. Do not put heat-sensitive objects near this side.

Bottom

Rear Terminal

① USB (Series B)

In order to operate the computer with the remote control during a presentation, connect the USB port of the computer to the projector with a USB cable. (p. 16)

② SERVICE PORT

This jack is used to service the projector.

③ COMPUTER IN 1 / COMPONENT IN

Connect output signal from a computer, RGB scart 21-pin video output, or component video output to this terminal. (pp. 16, 18)

When the cable is of the longer variety, it is advisable to use this terminal and not COMPUTER IN 2 / MONITOR OUT.

④ COMPUTER IN 2 / MONITOR OUT

This terminal is switchable and can be used for input from a computer or output to the other monitor.

Set the terminal up as either Computer input or Monitor output properly. (Used for Monitor out, this terminal outputs only incoming signal from COMPUTER IN 1 / COMPONENT IN terminal.) (pp. 16, 45)

⑤ S-VIDEO IN

Connect the S-VIDEO output from video equipment to this jack. (p. 17)

⑥ AUDIO IN

Connect the audio output from video equipment connected to ⑤ or ⑨ to this jack. (When the audio output is monaural, connect it to L (MONO) jack.) (p. 17)

⑦ AUDIO OUT(VARIABLE)

Connect an external audio amplifier to this jack. (p. 16-18)

This terminal outputs sound from AUDIO IN terminal (⑥ or ⑧).

⑧ COMPUTER/ COMPONENT AUDIO IN

Connect the audio output (stereo) from a computer or video equipment connected to ③ or ④ to this jack. (p. 16, 18)

⑨ VIDEO IN

Connect the composite video output from video equipment to VIDEO jack. (p. 17)

* RESET button

A built-in micro processor which controls this unit may occasionally malfunction and need to be reset. Press the RESET button with a pen, then the projector shuts down and restarts. Do not use the RESET function excessively.

Top Control

① POWER indicator

Emit a red light until the projector gets ready to be turned on.
It turns red when the projector is in the stand-by mode.
It remains green while the projector is under operation.
(pp. 19, 20, 62)

② WARNING indicator

Emit a red light when the projector detects abnormal condition.
This also blinks red when the internal temperature of the
projector exceeds the operating range. (pp. 53, 62)

③ LAMP REPLACE indicator

Turn yellow when the life of the projection lamp draws to an
end. (pp. 56, 62)

Antitheft Alarm Setting Buttons

These buttons are used for Antitheft alarm function. (pp. 50-52)

- ① **F button**
Used for Antitheft alarm setting.
- ② **Button 1-3**
Used for Antitheft alarm setting.
- ③ **ALARM indicator**
Blinks red to indicate the battery condition or key operation.

Remote Control

- ① **POWER ON-OFF button**
Turn the projector on or off. (pp. 19, 20)
- ② **VIDEO button**
Select VIDEO input source. (pp. 24, 35)
- ③ **COMPUTER button**
Select COMPUTER input source. (pp. 24, 26, 36)
- ④ **MENU button**
Open or close the On-Screen Menu. (p. 21)
- ⑤ **Point ▲▼◀▶ (VOLUME + / -) buttons**
 - Select an item or adjust the value in the On-Screen Menu. (p. 21)
 - Pan the image in Digital zoom + mode. (p. 34)
 - Adjust the volume level. (Point ◀▶ buttons) (p. 24)
- ⑥ **SELECT button**
 - Execute the selected item. (p. 21)
 - Expand or compress the image in Digital zoom mode. (p. 34)
- ⑦ **D.ZOOM ▲▼ buttons**
Zoom in and out the image. (pp. 25, 34)
- ⑧ **PAGE ▲▼ buttons**
Scroll back and forth pages on the screen when giving a presentation. Connect the projector and your computer with a USB cable to use these buttons. (p9, 16)
- ⑨ **FREEZE button**
Freeze the picture. (pp. 24)
- ⑩ **NO SHOW button**
Temporarily turn off the image on the screen. (p. 25)
- ⑪ **LAMP CONTROL button**
Select the lamp mode. (pp. 25, 46)
- ⑫ **MUTE button**
Mute the sound. (p. 24)
- ⑬ **P-TIMER button**
Operate the P-timer function. (p. 25)
- ⑭ **IMAGE button**
Select the image level. (pp. 25, 31, 38)
- ⑮ **AUTO PC button**
Automatically adjust the computer image to its optimum setting. (pp. 25, 28)
- ⑯ **KEYSTONE button**
Correct the keystone distortion. (pp. 23, 42)

You can turn on or operate the projector ONLY via the remote control.
Make sure not to lose the remote control.

- To ensure safe operation, please observe the following precautions :
- Do not bend, drop the remote control or expose the remote control to moisture or heat.
 - For cleaning, use soft dry cloth. Do not apply benzene, thinner, splay or any chemical material.

Remote Control Battery Installation

- 1** Open the battery compartment lid.

- 2** Install new batteries into the compartment.

Two AA size batteries

For correct polarity (+ and -), be sure battery terminals are in contact with pins in the compartment.

- 3** Replace the compartment lid.

To insure safe operation, please observe the following precautions:

- Use (2) AA or LR6 type alkaline batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture or heat.
- Do not drop the remote control.
- If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries.
- Risk of explosion if a battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.

Operating Range

Point the remote control toward the projector (Infrared Remote Receiver) when pressing any button. Maximum operating range for the remote control is about 16.4' (5m) and 60° in front of the projector.

Installation

Positioning the Projector

For projector positioning, see the figures below.
The projector should be set horizontally to the flat screen.

✓ **Note:**

- The brightness in the room has a great influence on picture quality.
It is recommended to limit the ambient lighting in order to get the best image.
- The values below are approximate and may vary from the actual sizes.

Screen Size (W x H) mm	40"	100"	150"	200"	300"
4 : 3 aspect ratio	813 x 610	2032 x 1524	3048 x 2286	4064 x 3048	6096 x 4572
Zoom (min)	5.6' (1.7m)	14.4' (4.4m)	21.7' (6.6m)	28.9' (8.8m)	43.3' (13.2m)
Zoom (max)	4.6' (1.4m)	11.8' (3.6m)	18.0' (5.5m)	23.9' (7.3m)	36.1' (11.0m)

Adjustable Feet

Projection angle can be adjusted up to 10.0 degrees with the adjustable feet.

- 1 Lift the front of the projector and pull upward the feet lock latches on both sides of the projector.
- 2 Release the feet lock latches to lock the adjustable feet and rotate the adjustable feet to adjust the position and tilt.
- 3 To retract the adjustable feet, lift the front of the projector and pull and undo the feet lock latches. Keystone distortion of the projected image can be corrected by menu operation. (pp. 23, 42)

Connecting the AC Power Cord

This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system.

Consult your authorized dealer or service station if you are not sure of the type of power being supplied.

Connect the projector with all peripheral equipment before turning the projector on. (See pp. 16-18 for connection.)

CAUTION

For safety, unplug the AC power cord when the projector is not in use. When this projector is connected to an outlet with the AC power cord, it is in Stand-by mode and consumes a little electric power.

Connect the AC power cord (supplied) to the projector. The AC outlet must be near this equipment and must be easily accessible.

NOTE ON THE POWER CORD

AC power cord must meet requirement of the country where you use the projector. Confirm the AC plug type with the chart below and proper AC power cord must be used. If supplied AC power cord does not match your AC outlet, contact your sales dealer.

Projector side	AC outlet side		
 <p data-bbox="207 1268 407 1350">To power cord connector on your projector.</p>	<p data-bbox="509 1073 781 1100">For the U.S.A. and Canada</p>  <p data-bbox="570 1283 756 1335">To the AC outlet. (120 V AC)</p>	<p data-bbox="846 1073 1117 1100">For Continental Europe</p>  <p data-bbox="938 1297 1125 1350">To the AC outlet. (200 - 240 V AC)</p>	<p data-bbox="1235 1073 1377 1100">For the U.K.</p>  <p data-bbox="1279 1276 1466 1329">To the AC outlet. (200 - 240 V AC)</p>

Connecting to a Computer

Cables used for connection

- VGA Cables (Mini D-sub 15 pin) (Only one cable is supplied.)
 - USB Cable *
 - Audio Cables (Mini Plug: stereo) *
- (* = Not supplied with this projector.)

✓ **Note:**

- Input sound to the **COMPUTER / COMPONENT AUDIO IN** terminal when using the **COMPUTER IN 1 / COMPONENT IN** and the **COMPUTER IN 2/MONITOR OUT** terminal as input.
- When connecting the **AUDIO OUT** to external audio equipment, the projector's built-in speaker is disconnected.
- When the cable is of the longer variety, it is advisable to use the **COMPUTER IN 1 / COMPONENT IN** and not the **COMPUTER IN 2 / MONITOR OUT**.
- See p. 65 for ordering optional parts.

 Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.

Connecting to Video Equipment

Cables used for connection

- Video and Audio Cable (RCA x 3) *
 - S-VIDEO Cable *
 - Audio Cable (Mini Plug: stereo) *
- (* = Not supplied with this projector.)

✓ **Note:**

- When connecting AUDIO OUT to external audio equipment, the projector's built-in speaker is disconnected.
- See p. 65 for ordering optional parts.

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.

Connecting to Component Video Equipment

Cables used for connection

- Audio Cables (Mini Plug :stereo) *
 - Scart-VGA Cable *
 - Component Cable *
 - Component-VGA Cable *
- (* = Not supplied with this projector.)

✓ **Note:**

- When connecting AUDIO OUT to external audio equipment, the projector's built-in speaker is disconnected.
- See p. 65 for ordering optional parts.

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.

Turning On the Projector

- 1 Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.
- 2 Connect the projector's AC power cord into an AC outlet. The POWER indicator becomes red.
- 3 Press the POWER ON-OFF button on the remote control. The POWER indicator becomes green and the cooling fans start to operate. The preparation display appears on the screen and the count down starts.
- 4 After the countdown, the input source that was selected last and the Lamp mode status icon (see p. 46) appear on the screen.
If the projector is locked with a PIN code, PIN code Input Dialog Box appear. Enter the PIN code as instructed below.

Enter a PIN code

Select a number by pressing the Point ◀▶ buttons and fix the number with the SELECT button. The number changes to "*". If you fixed an incorrect number, move the pointer to "Set" or "Clear" once by pressing the Point ▼ button, then return to "PIN code". Enter the correct number again. Repeat this step to complete entering a four-digit number. "1234" is set as the initial PIN code at the factory.

When the four-digit number is fixed, the pointer is automatically move to "Set". Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, "PIN code" and the number (****) turn red and disappear. Enter the correct PIN code all over again.

What is PIN code?

PIN code is a security code using Personal Identification Number that allows the person who knows it to operate the projector. Setting PIN code prevents others except the specific users from operating the projector.

A PIN code consists of a four-digit number. Refer to PIN code lock function in Setting on pp. 47, 48 for locking operation of the projector with your PIN code.

CAUTION ON HANDLING PIN CODE

If you forget your PIN code, the projector can no longer be started. Set a new PIN code with special care, take a memo and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center.

The preparation display disappears after 30 seconds.

Selected Input Source and Lamp Mode

(See p. 46 for Lamp mode.)

PIN Code Input Dialog Box

After the OK icon disappears, you can operate the projector.

✓Note:

- When the Logo select function is "Off", the logo is not shown on the screen. (p. 43)
- When the "Countdown off" or "Off" is selected in the Display function, the countdown is not shown on the screen. (p. 42)
- During the countdown period, all operations are invalid.
- If the correct PIN code number is not entered for 3 minutes after the PIN code dialog box appeared, the projector is turned off automatically.

Turning Off the Projector

- 1 Press the POWER ON-OFF button on the remote control, and "Power off?" appears on the screen.
- 2 Press the POWER ON-OFF button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep operating. (You can select the level of fan quietness and rotation speed. See p. 49.) At this time you can disconnect the AC power cord even if the fans are still running.
- 3 When the projector has cooled down enough to be turned on again, the POWER indicator becomes red.

TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF.

✓ Note:

- When the On start function is "On", this projector is turned on automatically by connecting the AC power cord to an AC outlet. (p. 46)
- Do not operate the projector continuously without rest. Continuous use may result in shortening the lamp life. Turn off the projector and give it a rest about an hour in every 24 hours.
- The running speed of cooling fans is changed according to the temperature inside the projector.
- Do not put the projector in a case before the projector is cooled enough.
- If the WARNING indicator blinks or emits a red light, see "Warning Indicator" on p. 53.
- While the POWER indicator is blinking, lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator becomes red to be turned on again.
- To cool the projector, cooling fans keep running for a certain time even after the AC plug is disconnected from the AC outlet.

The message disappears after 4 seconds.

How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. Refer to the following pages regarding each adjustment and setting procedure.

- 1 Press the MENU button to display the On-Screen Menu.
- 2 Press the Point ◀▶ buttons to select a Menu icon. Press the Point ▲▼ buttons to select an item.
- 3 Press the SELECT button to show the item data. To adjust the data, press the Point ◀▶ buttons. Refer to the following pages for each adjustment.

To close the On-Screen Menu, press the MENU button again .

✓Note:

- The selected item is not active until the SELECT button is pressed.

For video source

Zoom and Focus Adjustment

Rotate the Zoom Ring to zoom in and out.
 Rotate the Focus Ring to adjust the projected picture focus.

Keystone Correction

If a projected picture has keystone distortion, correct the image with Keystone adjustment.

Press the KEYSTONE button on the remote control. The keystone dialog box appears.

Correct keystone distortion by pressing the Point ▲▼ buttons. Keystone adjustment can be memorized. (p. 42)

- The arrows are white when there is no correction.
- The direction of the arrow which are being corrected turns red.
- The arrows disappear at the maximum correction.
- If you press the KEYSTONE button on the remote control once more while the keystone dialog box is being displayed, the keystone adjustment is canceled.

Reduce the upper width with the Point ▲ button.

Reduce the lower width with the Point ▼ button.

Remote Control

Sound Adjustment

Direct Operation

Volume

Press the VOLUME+/- buttons on the remote control to adjust the volume. The volume dialog box appears on the screen for a few seconds.

Mute

Press the MUTE button on the remote control to cut off the sound. To restore the sound to its previous level, press the MUTE button again or press the VOLUME+/- buttons. Mute function is also effective for AUDIO OUT jack.

Menu Operation

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Sound Menu icon.
- 2 Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to select, and then press the SELECT button.

Volume

Press the Point ▶ button to turn up the volume, and press the Point ◀ button to turn down the volume.

Mute

Press the Point ◀▶ buttons to cut off the sound. Dialog box display is changed to "On" and the sound is cut off. To restore the sound to its previous level, press the Point ◀▶ buttons again.

Remote Control

Press the MUTE button to set the Mute function On or Off. The display disappears after 4 seconds.

Sound Menu

Remote Control Operation

Use the remote control for some frequently used operations. Just pressing one of the buttons enables you to make the operation easily and you do not have to call up the On-Screen Menu.

COMPUTER / VIDEO button

Press the COMPUTER or VIDEO button to select the input source. For more detail, see pp. 26, 35, 36.

FREEZE button

Press the FREEZE button to freeze the picture on the screen. To cancel the Freeze function, press the FREEZE button again or press any other button.

Remote Control

✓ Note:

- See the next page for the other buttons.

AUTO PC button

Press the AUTO PC button to operate the Auto PC function.
For more detail, see p. 28.

D.ZOOM buttons

Press the D.ZOOM buttons to zoom in and zoom out the images.
For more detail, see p. 34.

NO SHOW button

Press the NO SHOW button to black out the image. To restore to normal, press the NO SHOW button again or press any other button. When a projected image is captured and set as "User" in the Logo selection (p. 43), the screen changes each time you press the NO SHOW button as follows.

black out → the captured image → normal →

KEYSTONE button

For detail, see p. 23.

IMAGE button

Press the IMAGE button to select an image level of the screen.
For more detail, see pp. 31, 38.

P-TIMER button

Press the P-TIMER button. The timer display "00 : 00" appears on the screen and the timer starts to count time (00 : 00 ~ 59 : 59).

To stop the P-Timer, press the P-TIMER button. Press the P-TIMER button again, then the P-timer display disappears.

LAMP CONTROL button

Press the LAMP CONTROL button to select the lamp mode for changing the brightness of the screen.

- ☹ NormalNormal brightness
- ☹_A AutoBrightness according with the input signal
- ☹ EcoLower brightness reduces the lamp power consumption and extends the lamp life.

Remote Control

✓ **Note:**

- See the previous page for the other buttons.

Computer Input

Input Source Selection

Direct Operation

Select either Computer 1 or Computer 2 by pressing the COMPUTER button on the remote control. Before using COMPUTER button, select the correct input source through Menu operation as described below.

Remote Control

Menu Operation

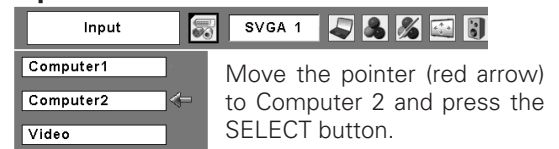

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Input Menu icon.
- 2 Press the Point ▲▼ buttons to move the red arrow pointer to either Computer 1 or Computer 2, and then press the SELECT button.
- 3 After the Source Select Menu appeared for Computer 1, move the pointer to RGB and then press the SELECT button.

✓ Note:

- Computer 2 is not displayed when the COMPUTER IN 2/MONITOR OUT terminal is set as Monitor out. (p. 45)
- Computer 2 (COMPUTER IN 2 / MONITOR OUT) can accept only RGB signal.

Input Menu

Computer System Selection

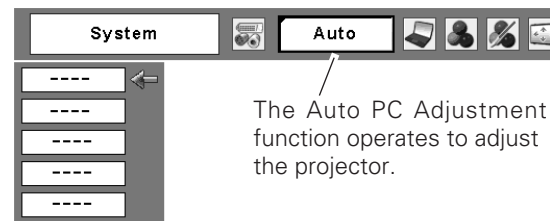

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA, SXGA, WXGA, or UXGA with its Multi-scan system and Auto PC Adjustment. If Computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional setting. (Signal formats provided in this projector is shown on p. 63)

One of the following messages may appear when:

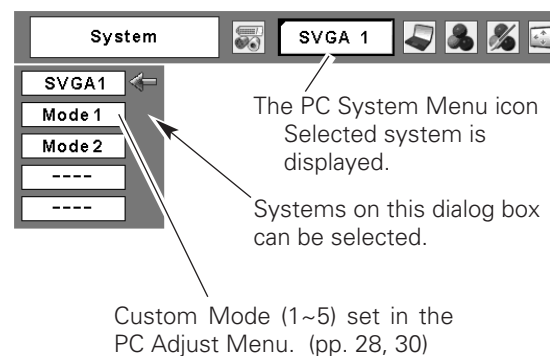

- Auto** The projector cannot recognize the connected signal conforming to the provided PC Systems. "Auto" is displayed on the PC System Menu icon and the Auto PC Adjustment function works to display proper images. If the image is not projected properly, adjust manually. (pp. 29, 30)
- There is no signal input from computer. Check the connection between your computer and the projector. (See "Troubleshooting" p. 58)
- Mode 1** The preset system is manually adjusted in the PC Adjust Menu. The adjusted data can be stored in Mode 1~5. (pp. 29, 30)
- SVGA 1** PC Systems provided in this projector is selected. The projector selects a proper system provided in the projector and displays it.

*Mode 1 and SVGA 1 are examples.

PC System Menu

PC System Menu

Selecting Computer System Manually

PC system can also be selected manually.

- 1** Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the PC System Menu icon.
- 2** Press the Point ▲▼ buttons to move the red arrow pointer to the system that you want to set, and then press the SELECT button.

Auto PC Adjustment

Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots, Horizontal, and Vertical to conform to your computer. Auto PC Adjustment function can be operated as follows.

Direct Operation

The Auto PC adjustment function can be operated directly by pressing the AUTO PC button on the remote control.

Remote Control

Menu Operation

Auto PC Adj.

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to "PC Adjust Menu".
- 2 Press the Point ▲▼ buttons to move the red framed pointer to "Auto PC Adj." and then press the SELECT button twice.

To store adjustment parameters

Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, the setting can be done just by selecting Mode in the PC System Menu (p. 27). See "Store" on p. 30.

✓ Note:

- *Fine sync, Total dots, Horizontal, and Vertical of some computers cannot be fully adjusted with this Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required. (pp. 29, 30)*
- *The Auto PC Adjustment cannot be operated when 480i, 575i, 480p, 575p, 720p, 1035i, or 1080i is selected in the PC System Menu (p. 27)*

PC Adjust Menu

Manual PC Adjustment

Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC Adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has 5 independent memory areas to memorize those parameters which are manually adjusted. You can recall the setting for a specific computer.

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the PC Adjust Menu icon.
- 2 Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to adjust and then press the SELECT button to display the adjustment dialog box. Press the Point ◀▶ buttons to adjust the value.

Fine sync

Cut out flicker from the image displayed. Press the Point ◀▶ buttons to adjust the value. (From 0 to 31)

Total dots

Adjust the number of total dots in one horizontal period. Press the Point ◀▶ buttons to adjust number to match your PC image.

Horizontal

Press the Point ◀▶ buttons to adjust the horizontal picture position.

Vertical

Press the Point ◀▶ buttons to adjust the vertical picture position.

Current mode

Press the SELECT button to show H-sync freq. and V-sync freq. of the connected computer.

Clamp

Adjust clamp level. When the image has dark bars, try this adjustment.

PC Adjust Menu PC Adjust Menu icon

IMAGE button

Menu Operation

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Image Select Menu icon.
- 2 Press the Point ▲▼ buttons to move the red framed pointer to the level that you want to set and then press the SELECT button.

Dynamic

Picture level suitable for viewing picture in a bright room.

Standard

Normal picture level preset on this projector.

Real

Picture level with improved halftone for graphics.

Blackboard(Green)

Picture level suitable for the image projected on a blackboard. See above for further description.

Image 1~4

User preset image in the Image Adjust Menu (p. 33).

Image Select Menu

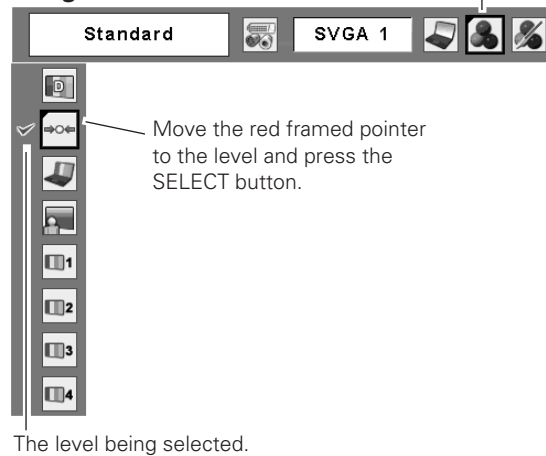

Image Level Adjustment

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Image Adjust Menu icon.
- 2 Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to adjust, and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point ◀▶ buttons.

Contrast

Press the Point ◀ button to decrease the contrast and the Point ▶ button to increase contrast. (From 0 to 63.)

Brightness

Press the Point ◀ button to adjust the image darker and the Point ▶ button to adjust the image brighter. (From 0 to 63.)

Color temp.

Press the Point ◀ button or the Point ▶ button for Color temp. level that you want to select. (XLow, Low, Mid, or High)

White balance (Red)

Press the Point ◀ button to lighten the red tone and the Point ▶ button to deepen the red tone. (From 0 to 63.)

White balance (Green)

Press the Point ◀ button to lighten the green tone and the Point ▶ button to deepen the green tone. (From 0 to 63.)

White balance (Blue)

Press the Point ◀ button to lighten the blue tone and the Point ▶ button to deepen the blue tone. (From 0 to 63.)

Sharpness

Press the Point ◀ button to soften the image and the Point ▶ button to sharpen the image. (From 0 to 15.)

Gamma

Press the Point ◀▶ buttons to get better balance of contrast. (From 0 to 15.)

Reset

To reset the adjusted data, select Reset and press the SELECT button. The confirmation box appears and then select "Yes". All adjustments return to their previous figures.

Image Adjust Menu

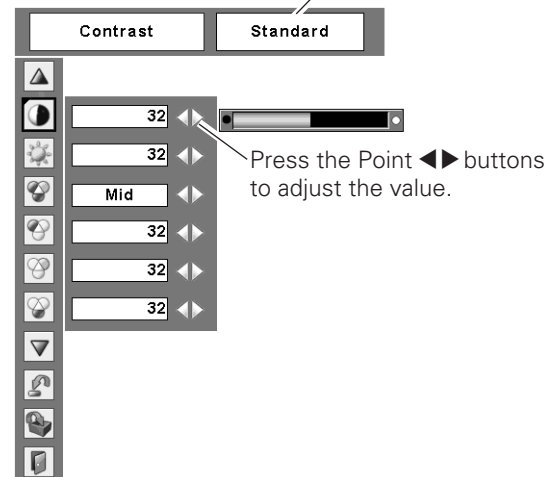

Image Adjust Menu icon

Move the red framed pointer to the item to be selected and then press the SELECT button.

Selected Image level

Press the Point ◀▶ buttons to adjust the value.

✓ Note:

- After adjusting any of the White balance Red, Green or Blue, the Color temp changes to "Adj".

 **Store**

To store the adjusted data, select Store and press the SELECT button. Select a level from Image 1 to 4 with the Point ▲▼ buttons and press the SELECT button. The confirmation box appears and then select "Yes". Stored data can be called up by selecting "Image" in the Image Level Selection on p. 31.

 **Quit**

Exit the Image Adjust Menu.

Screen Size Adjustment

This projector has the picture screen resize function, which enables you to customize the image size.

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Screen Menu icon.
- 2 Press the Point ▲▼ buttons and move the red framed pointer to the function that you want to select and then press the SELECT button.

 **Normal**

Provide the image to fit the screen size.

 **True**

Provide the image in its original size. When the original image size is larger than the screen size (1024 x 768), this projector enters panning mode automatically. Pan the image with Point ▲▼◀▶ buttons. When adjusted, the arrows turn red. When reached to the correction limit, the arrows disappear.

 **Wide**

Provide the image to fit wide video aspect ratio (16 : 9) by expanding the image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

 **Full screen**

Provide the full screen image.

Screen Menu

✓ **Note:**

- This Screen Menu cannot be operated when 720p(HDTV), 1035i (HDTV), or 1080i (HDTV) is selected in the PC System Menu (p. 27).
- This projector cannot display any resolution higher than 1600 X 1200. If your computer's screen resolution is higher than it, reset the resolution to the lower before connecting to the projector.
- The image data in other than 1024 x 768 is modified to fit the screen size in initial mode.
- True, Full screen, and Digital zoom +/- cannot be selected when 480i, 575i, 480p, or 575p is selected in the PC System Menu (p. 27).

For zooming in and out the images

Digital zoom +

When the Digital zoom + is selected, the On-Screen Menu disappears and "D. zoom +" is displayed. Press the SELECT button to expand the image size. And press the Point ▲▼◀▶ buttons to pan the image. The Panning function can work only when the image is larger than the screen size.

A projected image can be also expanded by pressing the D.ZOOM ▲ button on the remote control.

Digital zoom -

When Digital zoom - is selected, the On-Screen Menu disappears and "D. zoom -" is displayed. Press the SELECT button to compress image size.

A projected image can be also compressed by pressing the D.ZOOM ▼ button on the remote control.

To exit the Digital zoom +/- mode, press any button except the D.ZOOM ▲▼ buttons, SELECT, and Point button.

To return to the previous screen size, select a screen size in the Screen Size Adjustment or select an input source from the Input Source Selection (p. 26) again, or adjust the screen size with the D.ZOOM ▲▼ buttons.

✓ Note:

- The panning function may not operate properly if the stored Mode in the PC Adjust Menu is used. (p. 30)
- The minimum compression ratio can be limited depending on the input signal or when the Keystone function is working.
- True, Full screen, and Digital zoom +/- cannot be selected when 480i, 575i, 480p, or 575p is selected in the PC System Menu (p. 27)
- Digital zoom +/- cannot be selected when Full screen or True is selected.

Remote Control

Video Input

Input Source Selection (Video, S-Video)

Direct Operation

Select Video by pressing the VIDEO button on the remote control.

Before using VIDEO button, select the correct input source through menu operation as described below.

Menu Operation

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Input Menu icon.
- 2 Press the Point ▲▼ buttons to move the red arrow pointer to Video and then press the SELECT button to display the Source Select Menu .
- 3 Move the pointer to the source that you want to select and then press the SELECT button.

Auto

When selecting Auto, the projector automatically detects incoming video signal, and adjusts itself to optimize its performance. The projector selects connection in the following order:

1. S-Video
2. Video

Video

When video input signal is connected to the VIDEO jack, select Video.

S-Video

When video input signal is connected to the S-VIDEO jack, select S-Video.

Remote Control

Move the pointer to Video and press the SELECT button.

Source Select Menu (VIDEO)

Move the pointer to the source that you want to select and press the SELECT button.

Input Source Selection (Component, RGB Scart 21-pin)

Direct Operation

Select Computer 1 by pressing the COMPUTER button on the remote control.

Before using COMPUTER button, select the correct input source through Menu operation as described below.

Menu Operation

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Input Menu icon.
- 2 Press the Point ▲▼ buttons to move the red arrow pointer to Computer 1 and then press the SELECT button.
- 3 After the Source Select Menu appeared for Computer 1, move the pointer to Component or RGB(Scart) and then press the SELECT button.

Component When the input source is coming from video equipment connected to the COMPUTER IN 1 / COMPONENT IN terminal with a Component-VGA Cable, select Component.

RGB (Scart) When the input source is coming from video equipment connected to the COMPUTER IN 1 / COMPONENT IN terminal with a Scart-VGA Cable, select RGB (Scart).

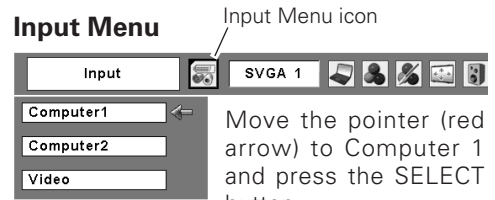

✓ **Note:**

- Computer 2 is not displayed when the COMPUTER IN 2/MONITOR OUT terminal is set as Monitor out. (p. 45)
- Computer 2 (COMPUTER IN 2 / MONITOR OUT) can accept only RGB signal.

Remote Control

Input Menu

Source Select Menu

Move the pointer to Component or RGB(Scart) and press the SELECT button.

Video System Selection

- 1 Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the AV System Menu icon.
- 2 Press the Point ▲▼ buttons to move the red arrow pointer to the system that you want to select and then press the SELECT button.

Video or S-Video

Auto

The projector automatically detects incoming video system, and adjusts itself to optimize its performance. When Video System is PAL-M or PAL-N, select system manually.

PAL / SECAM / NTSC / NTSC4.43 / PAL-M / PAL-N

If the projector cannot reproduce proper video image, it is necessary to select a specific broadcast signal format among PAL, SECAM, NTSC, NTSC 4.43, PAL-M, and PAL-N.

Component

Auto

The projector automatically detects incoming video signal, and adjusts itself to optimize its performance.

COMPONENT VIDEO SIGNAL FORMAT

If the projector cannot reproduce a proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i, and 1080i.

✓ Note:

- The AV System Menu cannot be selected when selecting RGB(Scart).

(p. 23)

StoreStore the keystone correction even when the AC power cord is unplugged.

Reset.....Reset the keystone correction when the AC power cord is unplugged.

Blue back

Press the Point ◀▶ buttons to switch on/off. When this function is "On," a blue image is displayed while the input signal is not detected.

Display

Press the Point ◀▶ buttons to switch on/off. This function decides to display On-Screen Displays.

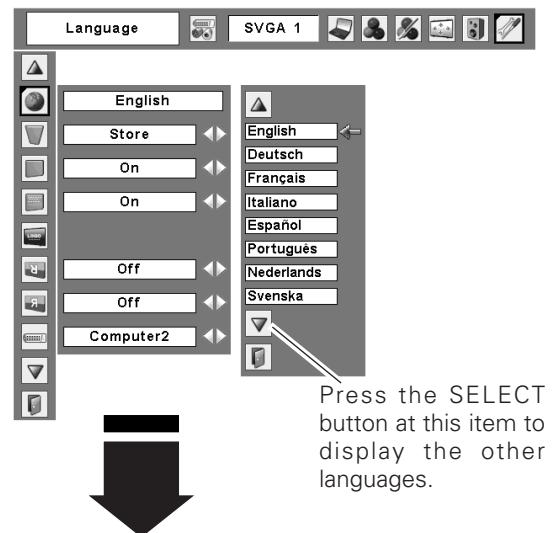

OnDisplay all the On-Screen Displays. Use this function when you want to project images after the lamp becomes bright enough. This mode is set as a default..

Countdown off.....Display the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.

OffDo not show On-Screen Displays. except;

- On-Screen Menu
- "Power off?"
- P-Timer
- "No signal" for Power management item (p. 45)
- "Please wait..."
- White arrows for panning mode (pp. 33, 34)

Setting Menu (Language)

 **Logo (Logo and Logo PIN code lock settings)**

This function allows you to customize the screen logo with Logo select, Capture, and Logo PIN code lock functions.

✓Note:

- When "On" is selected in Logo PIN code lock function, Logo select and Capture functions cannot be selected.

 **Logo select**

This function decides the start-up display as follows:

- UserThe image you captured
- DefaultThe factory-set logo
- Off.....Countdown only

Logo select

 **Capture**

This function enables you to capture the image being projected and use it for a start-up display or interval of presentations.

After capturing the projected image, go to the Logo select function and set it to "User". Then the captured image is displayed when turning on the projector next time or pressing the NO SHOW button. (p. 25)

To capture the image, select "Yes". To cancel the Capture function, select "No".

Capture

Select "Yes" to capture the projected image.

Select "Yes" to stop capturing.

✓Note:

- Before capturing an image, select "Standard" in the Image Select Menu to capture a proper image. (pp. 31, 38.)
- A signal from a computer can be captured up to XGA(1024 x 768). A signal from video equipment can be captured except for 720p, 1035i, and 1080i.
- When capturing the image that has been adjusted by the Keystone function, the adjusted data is automatically reset and the projector captures an image without keystone adjustment.
- When the Logo PIN code lock function is "On", Capture menu cannot be selected.
- When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.

Logo PIN code lock

This function prevents an unauthorized person from changing the screen logo.

- Offthe screen logo can be changed freely from the Logo select menu. (p. 43)
- Onthe screen logo cannot be changed without the Logo PIN code.

If you want to change the Logo PIN code lock setting, enter a Logo PIN code along the following steps. The initial Logo PIN code is set "4321" at the factory.

Enter a Logo PIN code

Select a number by pressing the Point ◀▶ buttons and fix the number with the SELECT button. The number changes to "*". If you fixed an incorrect number, move the pointer to "Set" or "Clear" once by pressing the Point ▼ button, then return to "Logo PIN code". Enter the correct number again.

Repeat this step to complete entering a four-digit number.

When the four-digit number is fixed, the pointer automatically moves to "Set". Press the SELECT button so that you can change the Logo PIN code lock setting.

If you entered an incorrect Logo PIN code, "Logo PIN code", the numbers (****) turn red and disappear. Enter a correct Logo PIN code all over again.

Change the Logo PIN code

Logo PIN code can be changed to your desired four-digit number. Select "Logo PIN code change" with the Point ▼ button and press the SELECT button. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it at hand. If you lost the number, you could no longer change the Logo PIN code setting. For details on PIN code setting, refer to relevant instructions of the PIN code lock function on pp. 47, 48.

CAUTION:
WHEN YOU HAVE CHANGED THE LOGO PIN CODE, TAKE A MEMO AND KEEP IT SECURELY. SHOULD THE LOGO PIN CODE BE LOST OR FORGOTTEN, THE PROJECTOR CAN NO LONGER BE OPERATED.

Logo PIN code lock

Logo PIN code lock Dialog Box

After a correct Logo PIN code is entered, the following dialog box appears.

Select On/Off by pressing the Point ◀▶ buttons or change the Logo PIN code.

Ceiling

When this function is "On," the picture is top/bottom and left/right reversed. This function is used to project the image from a ceiling mounting the projector.

Rear

When this function is "On," the picture is left/right reversed. This function is used to project the image to a rear projection screen.

Terminal

The COMPUTER IN 2/MONITOR OUT terminal on the back of the projector is switchable for computer input or monitor output. (p9) Select Computer 2 or Monitor Out with the Point ◀▶ buttons.

- Computer 2computer input
- Monitor Out . . .monitor out

Terminal function is not available when selecting Computer 2 to the input source. Change the input source to the others (Computer1 or Video) so that the Terminal function is available. (pp. 26, 35, 36)

Power management

For reducing power consumption as well as maintaining the lamp life, the Power management function turns off the projection lamp when the input signal is interrupted and no button is pressed for a certain period.

When the input signal is interrupted and no button is pressed for 30 seconds or more, the timer display with "No signal" appears. The countdown starts to turn off the lamp.

Select one of the operations.

- Ready When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp is turned on if the input signal is reconnected or any button on the remote control is pressed.
- Shut down. When the lamp has been fully cooled down, the power is turned off.
- Off. Power management function is off.

Then set the countdown timer with the Point ◀▶ buttons.

Ceiling

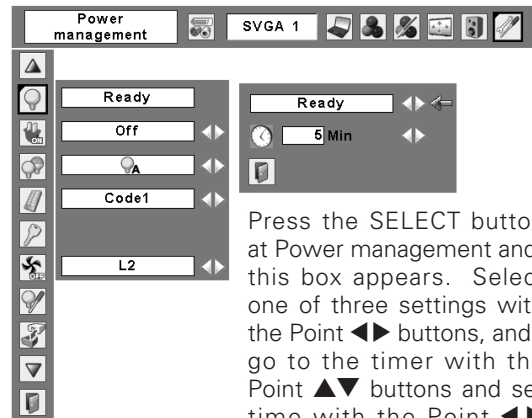

Rear

Power management

Time left before Lamp is off.

Press the SELECT button at Power management and this box appears. Select one of three settings with the Point ◀▶ buttons, and go to the timer with the Point ▲▼ buttons and set time with the Point ◀▶ buttons.

On start

When this function is “On”, the projector is automatically turned on just by connecting the AC power cord to an outlet.

✓ Note:

- Be sure to turn the projector off properly (see “Turning Off the Projector” on p. 20). If the projector is turned off in the incorrect sequence, the On start function does not operate properly.

Lamp control

You can change the brightness of the screen.

- NormalNormal brightness
-  AutoBrightness according with the input signal
-  EcoLower brightness reduces the lamp power consumption and extends the lamp life.

Remote control

This projector provides two different remote control codes; the factory-set, initial code (Code 1) and the secondary code (Code 2). This switching function prevents remote control interference when operating several projectors or video equipment at the same time.

When operating the projector in “Code 2”, both the projector and the remote control must be switched to “Code 2”.

To change the code for the projector;

Select either “Code 1” or “Code 2” in this Setting Menu.

To change the code for the remote control;

Press and hold both the MENU and IMAGE buttons together for 10 seconds or more. After changing the code, make sure the remote control operates properly.

✓ Note:

- When different codes are set on the projector and on the remote control, any operation cannot be made. In that case, switch the code on the remote control to fit the code on the projector.

On start

Remote control

Press and hold MENU and IMAGE buttons for 10 seconds or more.

 **Security (Alarm and PIN code lock settings)**

This function allows you to use PIN code lock and Alarm function to set the security for the projector operation.

 **PIN code lock**

This function prevents the projector from being operated by an unauthorized person and provides the following settings for security options.

- Off.....The projector is not locked with the PIN code.
- On1.....Require to enter the PIN code every time turning on the projector.
- On2.....Require to enter the PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without the PIN code.

Whenever to change the PIN code lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. "1234" is set as the initial PIN code at the factory.

Enter a PIN code

Select a number by pressing the Point ◀▶ buttons and fix the number with the SELECT button. The number changes to "*". If you fixed an incorrect number, move the pointer to "Set" or "Clear" once by pressing the Point ▼ button, then return to "PIN code". Enter the correct number again.

Repeat this step to complete entering a four-digit number.

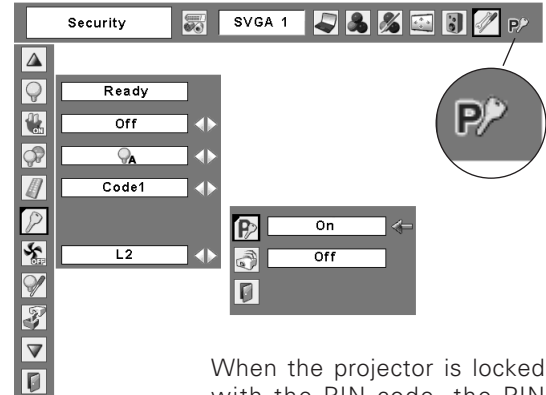

When the four-digit number is fixed, the pointer automatically moves to "Set". Press the SELECT button so that you can change the following PIN code lock settings.

If you entered an incorrect PIN code, "PIN code" and the number (****) turn red and disappear. Enter a correct PIN code all over again.

To Change the PIN code lock setting

Select Off, On1, or On2 with the Point ◀▶ buttons and then move the red framed pointer to "Quit" with the Point ▼ button. Press the SELECT button to close the dialog box.

PIN code lock

When the projector is locked with the PIN code, the PIN code lock mark appears on the menu bar.

Enter a PIN code

The input numbers change to "*" for security.

When the pointer automatically moves to "Set", press the SELECT button.

To Change the PIN code

The PIN code can be changed to your desired four-digit number.

Select "PIN code change" with the Point ▼ button, and press the SELECT button to display the New PIN code input dialog box.

Select a number with the Point ◀▶ buttons and fix the number with the SELECT button. Repeat it to complete entering a four-digit number. When the four-digit number is fixed, the pointer automatically moves to "Set". Then press the SELECT button.

CAUTION:
WHEN YOU HAVE CHANGED THE PIN CODE, TAKE A MEMO AND KEEP IT SECURELY. IF YOU FORGET YOUR PIN CODE, THE PROJECTOR CAN NO LONGER BE STARTED.

Alarm

Make some settings for the Antitheft alarm function. (pp. 50-52)

Press the SELECT button at Alarm icon to display the Alarm setting box.

When the Antitheft alarm function is set, "On" is displayed. When the function is released, "Off" is displayed. See p. 50 to set or release this function.

Select Sensitivity or Ringing time with the Point ▲▼ buttons, and set each item with the Point ◀▶ buttons.

Sensitivity

- LowLess sensitive
- MediumNormal sensitivity
- HighHighly sensitive (default setting)

Ringing time

- 10 secondsDefault setting.
 Ring about 10 seconds.
- 60 secondsRing about 60 seconds.
- Long timeRing until the end of the battery life.

✓ **Note:**

- The Alarm icon becomes gray and cannot be selected when the Antitheft alarm function is "On", a battery is not installed, or the battery is coming to the end of its life.
- While the Alarm icon is selected, the Antitheft alarm setting buttons on the side panel cannot be operated.
- When selecting "Long time" in Ringing time, the length of alarm ringing time differs depending on the battery life.

Change the PIN code lock setting

Select a desired setting with the Point ◀▶ buttons.

Change the PIN code

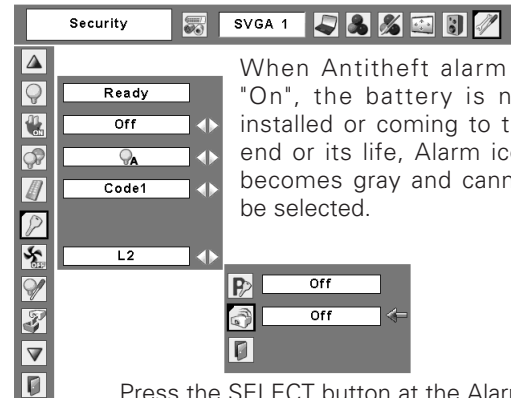

Select PIN code change and press the SELECT button. The New PIN code input dialog box appears.

The entered numbers are displayed for confirmation.

Alarm

When Antitheft alarm is "On", the battery is not installed or coming to the end of its life, Alarm icon becomes gray and cannot be selected.

Press the SELECT button at the Alarm icon to display the Alarm setting box.

Set Sensitivity or Ringing time with the Point ◀▶ buttons.

 **Fan**

This function provides the following alternatives in the cooling fans' operation after turning off the projector. (p. 20)

- L1Normal operation
- L2Slower and lower-sound than the normal operation (L1), but it takes longer to cool the projector down.

 **Lamp counter**

This function is used to reset the lamp replacement counter. When replacing the projection lamp, reset the lamp replacement counter by using this function. See p.57 for operation.

 **Factory default**

This function returns all setting values except for the user logo, PIN code lock, Logo PIN code lock and the lamp counter to the factory default settings.

 **Quit**

Exit the Setting Menu.

Factory default

Select Factory default and this box appears. Select "Yes", and the next box appears.

Select "Yes" to activate it.

Antitheft Alarm Function

How to Use the Antitheft Alarm Function

The Antitheft alarm function is to prevent the projector from being stolen. With this function on, the alarm rings when an unauthorized person tries to move the projector.

✓Note:

- This function is not a guarantee against stealing.
- The alarm does not ring while the AC power cord is connected even if the projector detects vibrations.
- Pressing the button is always accompanied by a sound. If any sound is not produced after pressing the button, you need to press it again.

Install a battery

Before operating the Antitheft alarm function, install a battery in the projector. (see p. 52 for installation)

Set and release the Antitheft alarm function

Set the alarm

Press the F button twice to turn the alarm function on. The ALARM indicator blinks for a few seconds and the projector enters the warning mode.

While the Antitheft alarm function is on, the projector emits a low-pitched sound when detecting a vibration. When the projector does not detect a vibration for a few seconds after the sound, it goes back to the warning mode. When the projector detects more vibrations after the low-pitched sound, the alarm starts ringing.

✓Note:

- You can test the alarming sound without setting the alarm. Press and hold the F button then the alarm starts ringing. The length of the ringing time is what you set on the "Ringing time". (p. 48)
- If you want to stop the alarm while it is ringing, insert the AC power cord or press the F button and enter the four-digit PIN code.

Release the alarm setting

1 Press the F button and enter the four-digit PIN code within about 10 seconds. (The default PIN code is "1111".) When the alarm is released, you hear high-pitched confirmation sound.

When entering an incorrect PIN code, you hear low-pitched sound. If you enter an incorrect PIN code 3 times, the alarm starts ringing.

Side Control

Settings

Change the PIN code

- 1** Press the F button and enter the four-digit PIN code within about 10 seconds. The ALARM indicator blinks red for a few seconds and high-pitched confirmation sound is made.
- 2** While the indicator is blinking, enter new PIN code then you will hear the high-pitched confirmation sound and the ALARM indicator is off.

When typing an incorrect PIN code, you will hear low-pitched sound. If you enter incorrect PIN codes 3 times, the alarm starts ringing.

A PIN code for Antitheft alarm function is the combination of 1, 2, or 3. Enter the PIN code with the button 1, 2, and 3. The default PIN code is set as "1111".

Side Control

CAUTION:
WHEN YOU HAVE CHANGED THE PIN CODE, WRITE DOWN THE NEW PIN CODE AND KEEP IT SECURELY. IF YOU FORGET YOUR PIN CODE, SOME SETTINGS OF THE ALARM FUNCTION CAN NO LONGER BE CHANGED.

How to install the battery

To use the Antitheft alarm function, you need to install a battery. (Use a CR2 3V lithium battery.)

To install the battery, remove the screw and open the battery cover on the bottom of the projector.

When the battery is installed properly, the ALARM indicator blinks for about 10 seconds.

After placing the battery, put the cover back and secure it with the screw.

When the life of the battery draws to an end, the ALARM indicator flashes and warning sound is made at some intervals.

Replace the battery with following the procedures above.

✓ Note:

- Even after changing the battery, the PIN code you have changed and settings you have made are effective.
- When changing the battery, set the Antitheft alarm function off. Otherwise the alarm starts ringing when you try to open the battery cover.

Loosen the screw and open the battery cover.

Install the battery then replace the battery cover and secure it with the screw.

To insure safe operation, please observe the following precautions:

- Do not keep the battery mixing with wire or metal products to avoid causing a short.
- Keep the battery away from babies and children to prevent them from swallowing it.
- Do not charge the battery.
- Do not disassemble, or apply pressure to transform the battery.
- Avoid contact with water or liquid.
- Do not expose to moisture or heat.
- If the battery has leaked, carefully wipe the battery compartment clean and install new battery.
- Do not replace the battery with an incorrect type or in an incorrect direction.
- Dispose of used battery after insulating the battery with putting insulating tape on either or both sides on the top/bottom of the battery.
- Dispose of used battery with following local regulations.

Maintenance and Cleaning

Warning Indicator

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

The projector is shut down and the WARNING indicator is blinking red.

When the temperature inside the projector reaches a certain level, the projector is automatically shut down to avoid overheating. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the POWER ON-OFF button.

✓ **Note:**

- After the temperature inside the projector returns to normal, the WARNING indicator still continues to blink. When the projector is turned on again, the WARNING indicator stops blinking.

Then check the matters below:

- Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if ventilation slots are not blocked.
- Is the projector not installed near the ventilation duct of air-conditioning equipment which may be hot? Install the projector away from the ventilation duct of air-conditioning equipment.
- Are the air filters clean? Clean the air filters periodically. (p. 54)

The projector is shut down and the WARNING indicator emits a red light.

When the projector detects an abnormal condition, it is automatically shut down to protect the inside and the WARNING indicator is red. In this case, disconnect the AC power cord and reconnect it, and then turn the projector on once again for check. If the projector cannot be turned on and the WARNING indicator emits a red light, disconnect the AC power cord and contact the service station for check and repair.

CAUTION

DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER THE ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.

Cleaning the Air Filters

Air filters prevent dust from accumulating on the optical elements inside the projector. Should the air filters become clogged with dust particles, it reduces cooling fans' effectiveness and may result in internal heat build up and adversely affect the life of the projector. Clean the air filters following the steps below.

- 1 Turn off the projector, and disconnect the AC power cord from the AC outlet.
- 2 Turn over the projector and remove the air filters by pulling the latches upward.
- 3 Clean the air filters with a brush or rinse them softly.
- 4 When cleaning the air filters by rinsing, dry them well. Replace the air filters properly. Make sure that the air filters are fully inserted.

CAUTION

Do not operate the projector with the air filters removed. Dust may accumulate on the optical elements degrading picture quality. Do not put small parts into the air intake vents. It may result in malfunction of the projector.

RECOMMENDATION

We recommend avoiding dusty/smoky environments when operating the projector. Usage in these environments may cause poor image quality.

When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector. This condition may degrade the quality of a projected image.

When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Attaching the Lens Cover

When moving this projector or while not using it over an extended period of time, replace the lens cover.

Attach the lens cover according to the following procedures.

- 1 Pass the string through a hole of the lens cover.
- 2 Turn over the projector and remove the screw with a screwdriver.
- 3 Attach the string with lens cover to a hole at the bottom of the projector and secure it with a screw.

Air filters
Pull up and remove.

✓ Note:

- When reinserting this air filter, be sure that the slit part is facing the outer side.

Cleaning the Projection Lens

Follow these steps to clean the projection lens.

- 1** Disconnect the AC power cord before cleaning.
- 2** Softly wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use lens cleaning paper or a commercially available air blower to clean the lens. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.
- 3** When the projector is not in use, replace the lens cover.

Cleaning the Projector Cabinet

Follow these steps to clean the projector cabinet.

- 1** Disconnect the AC power cord before cleaning.
- 2** Softly wipe the projector body with a soft, dry cleaning cloth. When it is heavily soiled, use a small amount of mild detergent and finish with a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.
- 3** When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.

Lamp Replacement

When the life of the projection lamp of this projector draws to an end, the LAMP REPLACE indicator emits a yellow light. If this indicator lights yellow, replace the lamp with a new one promptly.

Top Control

This indicator is yellow when the life of the projection lamp draws to an end.

WARNING:
TURN OFF THE UV LAMP BEFORE
OPENING THE LAMP COVER

CAUTION

Allow a projector to cool, for at least 45 minutes before you open the Lamp cover. The inside of the projector can become very hot.

CAUTION

For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

Follow these steps to replace the lamp.

- 1 Turn off the projector and disconnect the AC power cord. Allow the projector to cool for at least 45 minutes.
- 2 Remove the screw with a screwdriver, and remove the lamp cover.
- 3 Remove 2 screws of the lamp with a screwdriver and pull out the lamp by grasping the handle.
- 4 Replace the lamp with a new one and tighten the 2 screws back into position. Make sure that the lamp is set properly. Replace the lamp cover and tighten the screw.
- 5 Connect the AC power cord to the projector and turn on the projector.
- 6 **Reset the lamp replacement counter.**
See "Lamp Replacement Counter" on the next page .

ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- **Model No. of your projector** : **PLC-XE31**
- **Replacement Lamp Type No.** : **POA-LMP102**
(Service Parts No. 610 328 6549)

Lamp Replacement Counter

Be sure to reset the Lamp replacement counter after the lamp is replaced. When the Lamp replacement counter is reset, the LAMP REPLACE indicator stops lighting.

- 1 Turn the projector on, press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Setting Menu icon.
- 2 Press the Point ▲▼ buttons to move the red framed pointer to the Lamp counter function and then press the SELECT button. The first dialog box appears and shows the total accumulated time of the lamp usage and the reset option. If you select "Reset", a "Lamp replacement counter Reset?" appears. Select "Yes" to continue.
- 3 Another confirmation dialog box appears, select "Yes" to reset the Lamp replacement counter.

✓ Note:

- Do not reset the Lamp replacement counter without implementation of lamp replacement. Be sure to reset the Lamp replacement counter only after replacing the lamp.

LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.
- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.
- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector's AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

- Make sure you have properly connected the projector to peripheral equipment as described on pp. 16-18.
- Make sure all equipment is connected to AC outlet and the power is turned on.
- When you operate the projector with a computer and it does not project an image, restart the computer.

Problem:

- Solutions

No power

- Plug the power cord of the projector into the AC outlet.
 - See if the POWER indicator lights red.
 - Wait 90-120 seconds after the projector is turned off when turning the projector back on. The projector can be turned on after the POWER indicator turns red. (See on p. 20.)
 - Check the WARNING indicator. If the WARNING indicator lights red, the projector cannot be turned on. (See on p. 53.)
 - Check the projection lamp. (See p. 56.)
-

Image is out of focus.

- Adjust focus of the projector. (See p. 23.)
 - Provide proper distance between the projector and the projection screen. (See p. 14.)
 - Check the projection lens to see if it needs cleaning. (See p. 55.)
 - Moving the projector from a cool to a warm place may result in moisture condensation on the projection lens. In such cases, leave the projector off and wait until condensation evaporates.
-

No image

- Check the connection between your computer or video equipment and the projector. (See pp. 16-18)
 - See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer's instruction manual for the setting.
 - It takes about 30 seconds to display an image after turning on the projector. See if the selected system is corresponding with your computer or video equipment. (See pp. 27 and 37)
 - Select correct input source once again through menu operation. (See pp. 26, 35 and 36)
 - Make sure the temperature is not out of the specified Operating Temperature (41 °F ~ 95 °F (5 °C ~ 35 °C)) .
-

**Image is Left/Right reversed.
Image is Top/Bottom reversed.**

- Check the Ceiling / Rear function. (See p. 45.)
 - Check the Ceiling function. (See p. 45.)
-

No sound

- Check audio cable connection from audio input source.
 - Adjust the audio source.
 - Press the Volume+ button. (See p. 24.)
 - Press the Mute button. (See p. 24.)
-

<i>Some displays are not seen during the operation.</i>	–Check the Display function. (See p. 42.)
<i>PIN code dialog box appears at start-up.</i>	–PIN code lock is being set. Enter a PIN code (1234 or numbers you have set). (See pp. 19, 47, 48.)
<i>Computer 2 cannot be selected.</i>	–Select Computer 2 at the Terminal function. (See p. 45.)
<i>The Terminal function cannot be selected.</i>	–The Terminal function cannot be selected after Computer 2 is selected. Select other input source such as Computer 1 or Video with the COMPUTER button or the VIDEO button on the remote control so that the Terminal function can be selected.
<i>The Remote Control does not work.</i>	<ul style="list-style-type: none"> –Check the batteries. –Make sure no obstruction is between the projector and the remote control. –Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4' (5m). –Make sure the code of the remote control is conformed to the projector. (See p. 46.)
<i>Cooling fans are still running after the AC plug is disconnected.</i>	–This is normal condition. Fans keep running for a certain time even after disconnecting the AC plug.

WARNING :

High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Give the model number and explain about the problem. We will advise you how to obtain service.

The CE Mark is a Directive conformity mark of the European Community (EC).

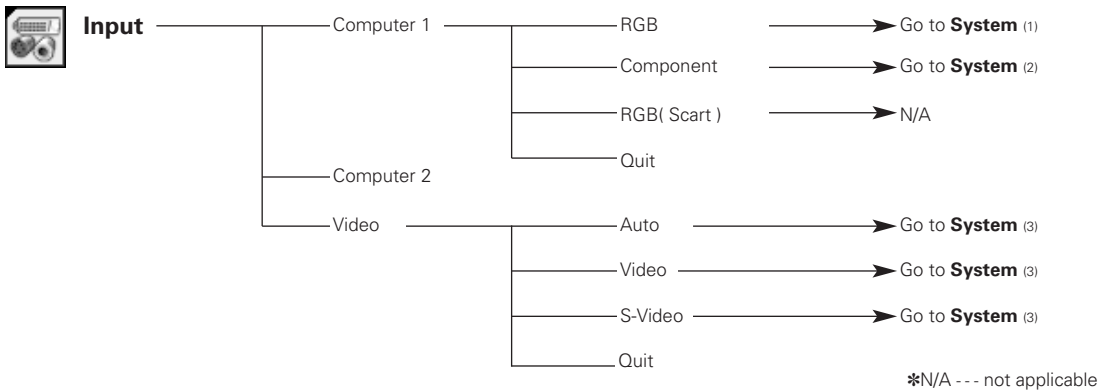

This symbol on the nameplate means the product is Listed by Underwriters Laboratories Inc. It is designed and manufactured to meet rigid U.L. safety standards against risk of fire, casualty and electrical hazards.

Technical Specifications

Mechanical Information

Projector Type	Multi-media Projector
Dimensions (W x H x D)	9.66" x 2.3" x 6.82" (294.5mm x 69.5mm x 208mm) (Not including adjustable feet)
Net Weight	5.5 lb (2.5kg)
Feet Adjustment	0° to 10.0°

Panel Resolution

LCD Panel System	0.6" TFT Active Matrix type, 3 panels
Panel Resolution	1,024 x 768 dots
Number of Pixels	2,359,296 (1,024 x 768 x 3 panels)

Signal Compatibility

Color System	PAL, SECAM, NTSC, NTSC4.43, PAL-M, PAL-N
High Definition TV Signal	480i, 480p, 575i, 575p, 720p, 1035i, and 1080i
Scanning Frequency	H-sync. 15 ~ 100 KHz, V-sync. 50 ~ 100 Hz

Optical Information

Projection Image Size (Diagonal)	Adjustable from 40" to 300"
Projection Lens	F 1.65 ~ 1.81 lens with f 22.5 mm ~ 27 mm with manual zoom and focus
Throw Distance	4.6' - 43.3' (1.4m - 13.2m)
Projection Lamp	170W

Interface

Video Input Jack	RCA Type x 1
S-Video Input Jack	Mini DIN 4 pin x 1
Audio Input Jacks	RCA Type x 2
Computer Input 1 / Component Input Terminal	Analog RGB (Mini D-sub 15 pin) Terminal X 1
Computer Input 2 / Monitor Output Terminal	Analog RGB (Mini D-sub 15 pin) Terminal X 1 (In / Out switchable)
Computer/ Component Audio Input Jack	Mini Jack (stereo) x 1
Service Port Connector	Mini DIN 8 pin x 1
USB Connector	USB Series B receptacle x 1
Audio Output Jack	Mini Jack (stereo) x 1 (Variable)

Audio

Internal Audio Amp	1.0W RMS
Built-in Speaker	1 speaker, ø1.1" (28mm)

Power

Voltage and Power Consumption	AC 100 ~ 120 V (2.9A Max. Ampere), 50 / 60 Hz (The U.S.A and Canada) AC 200 ~ 240 V (1.4 A Max. Ampere), 50 / 60 Hz (Continental Europe and The U.K.)
-------------------------------	--

Operating Environment

Operating Temperature	41 °F ~ 95 °F (5 °C ~ 35 °C)
Storage Temperature	14 °F ~ 140 °F (-10°C ~ 60 °C)

Remote Control

Battery	AA or LR6 1.5V ALKALINE TYPE x 2
Operating Range	16.4' (5m) / ±30°
Dimensions	1.9" (W) x 0.87" (H) x 5.7" (D) (49mm x 22mm x 145.3mm)
Net Weight	3.53 oz (100 g) (including batteries)

Antitheft Alarm

Battery	CR2 3V LITHIUM BATTERY x 1
---------	----------------------------

Accessories

Owner's Manual (CD-ROM)
 Quick Reference Guide
 AC Power Cord
 Remote Control and Batteries
 Battery for Antitheft alarm function
 VGA Cable
 Lens Cover with String
 PIN Code Label
 Alarm Label

- The specifications are subject to change without notice.
- LCD panels are manufactured to the highest possible standards. Even though 99.99% of the pixels are effective, a tiny fraction of the pixels (0.01% or less) may be ineffective by the characteristics of the LCD panels.

Optional Parts

The parts listed below are optionally available. When ordering those parts, give the item name and Model No. to the sales dealer.

	<i>Model No.</i>
COMPONENT-VGA Cable	: POA-CA-COMPVGA
SCART-VGA Cable	: POA-CA-SCART
Laser Pointer Remote Control Unit	: POA-RCKIT03
Presentation Kit	: POA-RCKIT04

Configurations of Terminals

COMPUTER INPUT/COMPONENT INPUT/MONITOR OUTPUT TERMINAL (ANALOG)

Terminal : Analog RGB (Mini D-sub 15 pin)

1	Red (R/Cr) Input / Output	9	----
2	Green (G/Y) Input / Output	10	Ground (Vert.sync.)
3	Blue (B/Cb) Input / Output	11	Ground / ----
4	----	12	----
5	Ground (Horiz.sync.)	13	Horiz. sync. Input/Output (Composite H/V sync.)
6	Ground (Red)	14	Vert. sync.
7	Ground (Green)	15	----
8	Ground (Blue)		

SERVICE PORT CONNECTOR

Terminal : Mini DIN 8-PIN

	Serial
1	R X D
2	----
3	----
4	GND
5	RTS / CTS
6	T X D
7	GND
8	GND

USB CONNECTOR (Series B)

1	Vcc
2	- Data
3	+ Data
4	Ground

PIN Code Label

While the projector is locked with the PIN code...

Put the label below (supplied) on in a prominent place of the projector's body while it is locked with a PIN code.

While the Antitheft alarm function is set...

Put the label below (supplied) on in a prominent place of the projector's body while the Antitheft alarm function is set.
