InFocus

Expand the palate

Your eyes will be excited to witness the revolutionary Work Big IN35, IN35W and IN37 digital multimedia projectors, featuring the latest DLP® BrilliantColor™ chipsets. Enjoy true-to-life color reproduction with unrivaled accuracy, and unlike LCD projectors which use only 3 hues, the IN35, IN35W & IN37 make use of up to 6 separate colors which perfects midrange clarity and brightness. These projectors are what creative professionals have been waiting for, and something audiences everywhere will enjoy. For the detail-savvy the IN35, IN35W & IN37 are compatible with UXGA (1600x1200) resolution, and offers higher native resolution than 720p HD display devices. Also, with 30 degrees of both Horizontal and Vertical keystone control these projectors will make a perfect square (or rectangular) image on your screen. You get the dependability and long life of DLP, the true colors and clarity which were previously missing, and zero sacrifices.

Widen your Horizons.

Experience bigger pictures with more vivid colors than ever before with the InFocus Work Big IN35W. This ambidextrous projector is the first to be armed with BrilliantColor™ technology as well as true WXGA resolution - a 16:10 image ratio at 1280x800 pixels. If you own a widescreen laptop, the IN35W is a perfect fit for your projector needs. The IN35W is empowered with 2500 lumens and thanks to the millions of DLP mirrors you can leave it on all-day without any adverse effects.

Reap the rewards

The new Work Big IN37 showcases the same seamless image adjustment and clarity as the IN35 & IN35W, but with 3000 lumens! This projector will fit in any room, and the onboard BrilliantColor™ technology yields greater contrast ratios than typical DLP output. You'll experience approximately 3x the image depth, and when combined with InFocus high-output light engines, the IN35, IN35W, & IN37 provide ample power with eye-pleasing colors for any presentation environment.

◀ These meeting room projectors are the first to integrate BrilliantColor™ with such impressive power.

Hide Nothing

These three projectors all feature the BrilliantColor™ chipset from DLP. Users and audience members are now free from fading colors and decreased contrast, while all LCD-based projector systems fall victim to this costly “battle against the clock”. Over time InFocus DLP projectors yield a lower expense and continually outperform LCD projectors. Designed for high-resolution video and data sources these innovative projectors will showcase every multimedia presentation as you’ve never witnessed – until today.

16:10 WXGA resolution is the standard > for most laptop computers, a bigger more beautiful image is now yours.

< Digital and analog video inputs combine with audio connectivity, RS-232 control and Kensington® security.

The IN35, IN35W & IN37 present:
