## DATASHEET / BROCHURE

Powerful 9,000-lumen WUXGA 3LCD laser projector offering outstanding image sharpness and brightness, and long-lasting, low maintenance performance.

The EB-L1490U installation laser projector offers powerful 9,000-lumen WUXGA performance with rich, vivid colours, for large rooms and venues, as well as reliable fit and forget performance. With flexible installation and low maintenance, this 4K-enhanced projector offers a perfect solution for scenarios where only maximum performance and durability will do.

### Laser-sharp images

Ensure that your presentations, images and videos pack a punch with the vivid, sharp projection offered by this 3LCD laser projector. Designed for larger venues, its high resolution WUXGA images are vivid and bright, even in daylight, while inorganic phosphor wheel technology provides superior light and heat resistance to deliver excellent reliability.

### 4K enhancement

For a next-level viewing experience, the projector features ingenious 4K enhancement technology, giving images exceptional sharpness and clarity, and ensuring that text in presentations is clearly legible.

### Flexible positioning

Thanks to a wide range of motorised lenses, including optional ultra-short-throw (UST) lens, the projector benefits from true 360° installation flexibility, allowing it to be placed virtually anywhere - without loss of brightness or distortion of image. The projector also has a built-in camera to ensure accurate calibration and capture diagnostic images (this can be fully disabled to prevent remote access).

### Versatile software

Epson Professional Projector Tool software allows you to set up multi-projector installations straight out of the box, simply and quickly, as well as using advanced techniques such as projection-mapping and edge-blending.
