DVD VIDEO RW DVD + ReWritable COMPACT disc SUPER VIDEO COMPACT disc DIGITAL AUDIO

Notations used in this guide

CAUTION	Indicates content that may cause the unit damage or malfunction.
TIP	Indicates additional information and points that may be useful to know regarding a topic.
☞	Indicates a page where useful information regarding a topic can be found.
❶ 1	Indicates operating methods and the order of operations. The procedure indicated should be carried out in order of the numbered steps.
⏻	Indicates remote control or main unit buttons.
"(Menu name)"	Indicates menu items and messages that are displayed on screen. Example: "Brightness"
DVD Video DVD Video	Depending on the type of disc, the functions and operations which can be performed may be different. These marks inform you of the type of disc being used. DVD Video Video CD Data CD Audio CD MP3/WMA JPEG DIVX Ext.Vid./Comp. DVD Video Video CD Data CD Audio CD MP3/WMA JPEG DIVX Ext.Vid./Comp.

Contents

Safety Instructions

All safety and operating instructions should be read before using the unit. After you have read all instructions, save this information for later reference.
The documentation and the unit use graphical symbols to show how to use the unit safely.
Please understand and respect these caution symbols in order to avoid injury to persons or property.

⚠ **Warning**	This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.
⚠ **Caution**	This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

Caution :

To reduce the risk of electric shock, do not remove cover (or back). No user-serviceable parts inside. Refer servicing to qualified service personnel.

This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Explanation of symbols

Symbols indicating an action that must not be done

Do not do	Do not disassemble	Do not touch	Do not wet	Do not use in wet areas	Do not place on an unstable surface

Symbols indicating an action that should be done

Instructions	Disconnect the plug from the outlet

2

Important safety instructions

Follow these safety instructions when setting up and using the projector :

• Read these instructions.

• Keep these instructions.

• Heed all warnings.

• Follow all instructions.

• Do not use this apparatus near water.

• Clean only with dry cloth.

• Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

• Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

• Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third grounding prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

• Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

• Only use attachments/accessories specified by the manufacturer.

• Use only with the cart stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

• Unplug this apparatus during lightning storms or when unused for long periods of time.

• Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as the power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

3

⚠ Warning

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.	**Do not use in wet areas**
Unplug the unit from the outlet and refer all repairs to qualified service personnel under the following conditions: • If smoke, unusual smells or unusual noises come from the unit. • If liquid or foreign objects get inside the unit. • If the unit has been dropped or the case has been damaged. Continuing to use under these conditions may result in fire or electric shock. Do not try to repair this unit yourself. Refer all repairs to qualified service personnel. Place the unit near a outlet where the plug can be easily unplugged.	**Disconnect the plug from the outlet**
Never open any covers on the unit except as specifically explained in this guide. Never attempt to disassemble or modify the unit. Refer all repairs to qualified service personnel. Electrical voltages inside the unit can cause severe injury.	**Do not disassemble**
Do not expose the unit to water, rain, or extensive humidity.	**Do not use in wet areas**
Use only the type of power source indicated on the unit. Use of a power source other than the specified may result in fire or electric shock. If you are not sure of the power available, consult your dealer or local electricity company.	**Do not do**
Check the specifications of the power cable. Using an inappropriate power cable could result in fire or electric shock. The power cable supplied with the unit is intended to comply with power supply requirements for the country of purchase. If using within the country of purchase, do not use any power cable other than the one supplied with the unit. If using the unit overseas, check the power supply voltage, outlet shape and electrical rating of the unit that conform to the local standards, and purchase a proper power cable in the country.	**Instructions**
Take the following precautions when handling the plug. Failure to comply with these precautions could result in fire or electric shock. • Do not overload outlets, extension cables or multi-socket devices. • Do not insert the plug into the outlet with dust present. • Insert the plug firmly into the outlet. • Do not handle the plug with wet hands. • Do not pull the power cable when disconnecting the plug. Always be sure to hold the plug when disconnecting it.	**Instructions**
Do not use the power cable that is damaged. Fire or electric shock may result. • Do not modify the power cable. • Do not place heavy objects on top of the power cable. • Do not bend, twist or pull the power cable excessively. • Keep the power cable away from hot electrical appliances. If the power cable becomes damaged (such as the wires becoming exposed or broken), contact your dealer for a replacement.	**Do not do**
If there is an electrical storm, do not touch the plug, otherwise you may receive an electric shock.	**Do not touch**

⚠ Warning

Do not place containers with liquids, water or chemicals on top of the unit. If the containers spill and the contents get inside the unit, fire or electric shock may result.	**Do not wet**
Never look into the unit lens when the lamp is switched on as the bright light can damage your eyes.	**Do not do**
Never push metallic or flammable objects or any other foreign materials through the air intake or air exhaust vents, fire or electric shock may result.	**Do not do**
A mercury lamp with high internal pressure is used as the unit's light source. Be sure to observe the instructions below. If the following points are not observed, injury or poisoning may result. • Do not damage the lamp or subject it to any impacts. • The gases inside mercury lamps contain mercury vapor. If the lamp breaks, ventilate the room to prevent the gases that are released from being inhaled or coming into contact with the eyes or mouth. • Do not bring your face close to the unit while it is in use. *If the lamp breaks and gases or fragments of broken glass from the lamp are inhaled or get into the eyes or mouth, or if any other ill effects are noticed, immediately seek medical advice.*	**Instructions**
Do not leave the unit or the remote control with batteries inside a vehicle with the windows closed, in places where they will be exposed to direct sunlight, or in other places that may become extremely hot. Thermal deformation or technical malfunction may occur, which could result in fire.	**Do not do**

⚠ **Caution**

Class 1 LASER Product Do not open the top cover. There are no user serviceable parts inside the unit.	Do not disassemble
Do not use the unit in places where there are lots of humidity or dust, near cooking or heating appliances, or in places where it may come into contact with smoke or steam. Do not use or store this unit outdoors for an extended length of time. Fire or electric shock may result.	Do not do
Do not block the slots and opening in the unit case. They provide ventilation and prevent the unit from overheating. • Material or paper may get stuck against the air filter underneath the unit while it is in use. Remove anything from underneath the unit that might get stuck against the air filter. If setting up the unit near a wall, leave a space of at least 20 cm between the wall and the air exhaust vent. • Ensure there is at least 10 cm between the air intake vent and any walls, and so on. • Do not place the unit on a sofa, rug, or other soft surface, or in a closed-in cabinet unless proper ventilation is provided.	Do not do
Do not place the unit on an unstable cart, stand, or table. The unit might fall down or tip over, and injury may result.	Do not place on an unstable surface
Do not stand on the unit or place heavy objects on it. The unit might collapse or fall down, and injury may result.	Do not do
Do not place anything that can become warped or damaged by heat near the air exhaust vents, or bring your hands or face close to the vents while projection is in progress. Because hot air comes out from the air exhaust vents, it may result in burns, warping or other accidents.	Do not do
Never try to remove the lamp immediately after use because it will be extremely hot. Before removing the lamp, turn off the power supply and wait the duration specified in this guide to allow the lamp to cool completely. The heat may cause burns or other injuries.	Do not do
Do not place the source of a naked flame, such as a lit candle, on or near the unit.	Do not do
Unplug the unit when it will not be used for extended periods. The insulation may deteriorate, which may result in fire.	Disconnect the plug from the outlet
Be sure to check that the power is turned off, the plug is disconnected from the outlet and all cables are disconnected before moving the unit. Fire or electric shock may result.	Disconnect the plug from the outlet

⚠ Caution

|	
Unplug the unit from the outlet before cleaning. This avoids electric shock during cleaning.	**Disconnect the plug from the outlet**
When cleaning the unit, do not use wet cloths or solvents such as alcohol, thinner or benzine. Water infiltration or deterioration and breakage of the unit case could result in electric shock.	**Instructions**
Incorrect battery usage may cause leakage of battery fluid and battery rupture, which could result in fire, injury or corrosion of the unit. When replacing batteries, take the following precautions. • Insert batteries so that the polarities (+ and -) are correct. • Do not use batteries of different types or mix old and new batteries. • Do not use any batteries other than those specified in this guide. • If the batteries leak, wipe away battery fluid with a soft cloth. If fluid gets on your hands, wash them immediately. • Replace the batteries as soon as they run out. • Remove the batteries if you will not be using the unit for a long period of time. • Do not expose batteries to heat or flame and do not put them in water. • Dispose of used batteries according to local regulations. • Keep these batteries out of the reach of children. Batteries are choking hazards and are very dangerous if swallowed.	**Instructions**
Do not set the volume too high from the outset. A loud sound may be produced suddenly that may cause damage to the speaker or your hearing. As a precaution, lower the volume before you switch off this unit then raise it gradually after you switch it back on.	**Do not do**
When using headphones, do not turn the volume up too loudly. You may adversely affect your hearing when listening at loud volumes over extended periods of time.	**Do not do**
Follow the maintenance schedule for this unit. If the interior of the unit has not been cleaned for a long time, dust may build up, which could cause fire or electric shock. Replace your air filter periodically as needed. Contact your dealer to clean the interior of the unit as needed.	**Instructions**

Use and Storage

Take note of the following advice in order to prevent malfunction and damage.

Notes on handling and storage

- Be sure to observe the operating temperatures and storage temperatures given in this guide when using and storing the projector.
- Do not set up the unit in places where it might be subjected to vibration or shock.
- Do not install the unit close to television, radio or video equipment that generates magnetic fields. This may adversely affect the audio and images of this unit, and may cause a malfunction. In the event that such symptoms occur, move the unit further away from any television, radio and video equipment.
- Do not operate the projector under any of the following conditions. If this is not observed, problems with operation or accidents may result.

While the projector is standing on its end
While the projector is placed with the top facing up
While the projector is placed with the bottom up

While the projector is tilted to either side

- Do not move this unit during playback.
  This may damage the disc or cause malfunction.
- Avoid using or storing this unit in cigarette or other smoke filled places, or in rooms containing a large amount of dust.
  This may cause degradation of the image quality.
- Do not touch the projection lens with your bare hands.
  If fingerprints or marks are left on the face of the lens, the image will not be projected clearly. When the unit is not in use, be sure to attach the lens cover.
- EPSON will not be held responsible for damage arising from projector or lamp failure outside the range of that which is covered in your warranty terms.
- You can store the unit in an upright position compactly on a shelf, etc., as it has storage feet on its side. When storing the unit in an upright position, place it on a stable surface with the storage feet at the bottom. Be sure to place the unit in the storage case supplied with the unit so that no dust enters the air intake vent.

Condensation

If you move this unit from a cold place into a warm room, or, if the room in which this unit is installed is heated rapidly, condensation (moisture) may form internally or on the lens surface. If condensation forms, it may not only cause incorrect operation such as weakening of the image, but also damage the disc and/or parts. In order to prevent against condensation, setup this unit in the room approximately one hour before it is to be used. If by some chance condensation does form, disconnect the power cable from the outlet, then wait one to two hours before use.

Lamp

A mercury lamp with high internal pressure is used as the unit's light source.
The characteristics of the mercury lamp are:
- The intensity of the lamp decreases with use.
- When the lamp reaches the end of its life, it will no longer light or may break with a loud noise.
- The life of the lamp may vary greatly depending on the individual lamp characteristics and the operating environment. You should always have a spare lamp ready in case it is needed.
- Once the lamp replacement period has elapsed, the possibility of lamp breakage incrcases. When the lamp replacement message appears, replace the lamp with a new one as soon as possible.
- This product includes a lamp component that contains mercury (Hg). Please consult your local regulations regarding disposal or recycling.
 Do not dispose of it with normal waste.

LCD panel

- The LCD panel is manufactured using extremely high-precision technology.
  However, black dots may appear on the panel, or some red, blue or green dots may light up extremely brightly at times. Furthermore, sometimes striped color irregularities or brightness irregularities may also appear. They are caused by the characteristics of the LCD panel, and are not a sign of malfunction.
- Screen burn may remain in the projected image when a high-contrast still image is projected for more than 15 minutes.
  If screen burn has occured, you should project a bright screen (if a computer is used: white screen, video: as bright an animation as possible) until the screen burn disappears. It takes approx. 30 to 60 minutes, depending on the extent of the screen burn. If the screen burn does not disappear, contact your dealer for advice. ☞ p. 76

When moving this unit

- Close the lens cover.
- Eject the disc.
- Retract the unit feet if extended.
- Carry the unit by holding the handle as shown in the following illustration.
Transportation cautions

- Many glass and precision parts are used within this unit. In order to prevent impact during transportation, re-use the box and protective packaging you received at the time of purchase. If you no longer have the original packing, protect the outside of this unit with shock absorbing material to protect it from impact, place it inside a strong box and make sure it is clearly labeled for the transportation of precision equipment.
- Close the lens cover and pack the unit.
- If using a courier service for transportation, inform them that this unit contains precision equipment and should be handled accordingly.
- * Your warranty does not cover any damages that may occur to this product during transportation.

Copyrights

Reproduction of a disc for the purposes of broadcast, projection in public, public musical performance, or rental (regardless of compensation, remuneration, or lack thereof) without the permission of the copyright owner, is strictly prohibited.

Discs and USB Storage

Discs

Readable disc types

The following discs can be played.

| Disc types	Symbols used in this guide	Explanation
DVD video ![DVD VIDEO]	DVD Video DVD Video	Commercially available software containing high-quality movies and forms of visual images. You cannot play DVD videos if the disc region code does not correspond to the region code label on the side of this unit.
DVD+RW DVD+R DVD+R DL DVD-RW DVD-R DVD-R DL ![RW DVD+ReWritable] ![RW DVD+R]	DVD Video DVD Video MP3/WMA MP3/WMA JPEG JPEG DivX DivX	DVD discs described on the left, recorded on another DVD recorder. • Can play a DVD disc containing video format images. • Can play a DVD disc containing VR format images. • Can play a disc if it has been "finalized" by the DVD recorder that has recorded the images. • Can play the following files recorded in the ISO 9660/UDF format: MP3/WMA/JPEG/MPEG1/2/4/DivX$^®$3/4/5/6/DivX$^®$ Ultra ![DivX] ![DivX ULTRA] • Can play only the first session although the unit supports multiple sessions.
Video CD ![COMPACT disc DIGITAL VIDEO] ![COMPACT disc SUPER VIDEO]	Video CD Video CD	Software containing images and sound. • Can play a Video CD (in version 2.0) with PBC (playback control). • Can play a Super Video CD (SVCD).
CD ![COMPACT disc DIGITAL AUDIO]	Audio CD Audio CD	The software containing sound and voice.
CD-R/RW CD+R/RW ![COMPACT disc DIGITAL AUDIO ReWritable] ![COMPACT disc DIGITAL AUDIO Recordable]	Data CD Data CD MP3/WMA MP3/WMA JPEG JPEG DivX DivX	CDs created with a CD recorder or a computer. • Can play the following files recorded in the ISO9660 level-1 or -2/UDF format: MP3/WMA/JPEG/Kodak Picture CD/FujiColor CD/MPEG1/2/4/DivX$^®$3/4/5/6/DivX$^®$ Ultra ![DivX] ![DivX ULTRA] • Supports the extended format (Joliet). • Supports multiple sessions. • Can play a disc recorded by packet writing.

- The performance and tonal quality of copy-control CD discs that do not conform to the compact disc (CD) standard cannot be guaranteed with this unit. CDs that conform to the CD standard will bear the following compact disc logo mark. Check what is displayed on the packaging of the audio disc.

  ![COMPACT disc DIGITAL AUDIO]

- This unit conforms to the NTSC and PAL television signal formats.
- In the case of DVD video, SVCD, and Video CD, playback functions may be intentionally limited by the software producers. As this unit plays back the contents of a disc certain functions may not work. Refer to the attached user information of the disc being played.
- DVD-R/R DL/RW, DVD+R/R DL/RW, CD-R/RW, and CD+R/RW discs may not be able to be played if they are scratched, dirty, warped, or if the recording status or recording conditions are unsuitable. Also, it may take the unit some time to read the disc data.
- CPRM (Content Protection for Recordable Media)compatible DVD-R discs recorded in the VR format cannot be played back on this unit.
- Only the audio of the following discs can be played back.
  - MIX-MODE CD   - CD-G   - CD-EXTRA
  - CD TEXT

Unreadable disc types

- The following discs cannot be played.
  - DVD-ROM
  - CD-ROM
  - PHOTO CD
  - DVD audio
  - SACD
  - DACD
  - DVD-RAM
- Round discs with a diameter other than 8 cm or 12 cm
- Irregularly shaped discs

Disc Handling

- Avoid touching the playback side with your bare hands.
- Be sure to store discs in their cases when not in use.
- Avoid storing your discs in places with high humidity or in direct sunlight.
- If the playback surface of the disc is dirty with dust or fingerprints, the image and audio quality may deteriorate. When the playback surface is dirty, gently wipe the disc clean with a soft dry cloth, starting from the center of the disc then moving outwards.
- Do not use cleaning products such as benzine, or anti-static products designed for analog records.
- Do not glue paper or attach stickers to a disc.

USB storage that can be played

- You can attach and play the following USB 1.1 based storage devices to the unit:
  - USB memory (only devices that are not equipped with the security function)
  - Multicard reader
  - Digital camera (if USB mass storage class is supported)
- Use a multicard reader to connect an SD memory card or other media to the unit.
- The FAT16 and FAT32 file systems are supported.
- Some system files may not be supported. If the media is not supported, format the media in the Windows system before use.

- This unit can play only one memory card even if multiple cards are mounted on the card reader. Mount only the card you wish to play.

Specifications of files that can be played

| File format	File extension*	Specifications
MP3	".mp3" or ".MP3"	Bit rate: 16 to 320K bps Sampling frequency: 11 kHz, 16 kHz, 22.05 kHz, 32 kHz, 44.1 kHz, 48 kHz
WMA	".wma" or ".WMA"	Bit rate: 64 to 192K bps Sampling frequency: 44.1 kHz, 48 kHz
DivX® DivX® Ultra	".divx" or ".DIVX", ".avi" or ".AVI"	Up to 3M bps Maximum number of pixels: 720 x 576 pixels Optimum frame rate: 30 fps A file may not be in the DivX® file format even if it has an ".avi" or ".AVI" file extension. In such a case, the file cannot be played.
JPEG	".jpg" or ".JPG"	Number of pixels: Up to 3027 x 2048 pixels No Motion JPEG is supported. JPEG data created by the DCF (Design rule for Camera File system) standard based digital camera is supported. Pictures may not be played back if the auto rotate function of digital still camera is used or if data is processed, edited or saved again using computer image editing software.

*If double-byte character is used for a file name, it will not be displayed correctly.

File size	4GB
Total number of files*	648 files (including folders) + 2 default folders
Total number of folders*	Up to 300 folders

*This figure is unlimited if "MP3/JPEG Nav" from the settings menu is set to "Without Menu".
Parts Name and Functions

Front

| Name	Function
❶ **Slide lens cover**	Close the lens cover to protect the lens when the unit is not in use. You can stop the projection completely by closing the lens cover during projection. However, if this state continues for 30 minutes, the unit lamp is turned off automatically. ☞ p. 18
❷ **Disc indicator**	Lights up green when a disc is inserted into the disc slot. ☞ p. 19
❸ **Eject button**	Press this button to eject a disc from the disc slot. ☞ p. 22
❹ **Remote control light-receiving area**	Receives signals from the remote control. ☞ p. 16
❺ **Disc slot**	Insert a disc you wish to play. ☞ p. 19
❻ **Feet**	The feet on the side of the projection lens can be extended by turning them. Extending the feet to the maximum extent tilts this unit by approximately 5 degrees. ☞ p. 21
❼ **Headphone jack**	Connects a headphone to the unit. ☞ p. 47
❽ **Speakers**	Placed on the left and right; supports Dolby Virtual Speaker. ☞ p. 48
❾ **Air intake vent**	Take the cooling air into the unit. If dust collects on the air intake vent it can cause the internal temperature of the unit to rise, and this can lead to operation problems and a shortening of the service life of optical parts. Clean it periodically. ☞ p. 63
❿ **Handle**	Hold this handle when carrying the unit. ☞ p. 9
⓫ **Projection lens**	Projects an image.

Name	Function
❶ **Computer input port**	Can be connected to the RGB output port of a computer. ☞p. 44
❷ **Component input port**	Can be connected to the component (YCbCr or YPbPr) output port of a video device. ☞p. 44
❸ **Video input port**	Can be connected to the ordinary image output port of a video device. ☞p. 43
❹ **Audio input port**	Can be connected to the audio output port of the connected video device or a computer. ☞p. 43, 44
❺ **Power inlet port**	Connect the power cable. 18
❻ **Digital Coaxial Audio-Out port**	Can be connected to an audio device with a digital coaxial audio input port. ☞p. 48
❼ **USB port**	Connects a USB 1.1-based USB memory or a multicard reader to play the MP3/WMA, JPEG, DivX® and other format storages. ☞p. 42
❽ **Security slot (ⓡ)**	Supports Kensington's micro saver security system. For details, access the Kensington website at http://www.kensington.com/.
❾ **Remote control light-receiving area**	Receives signals from the remote control. ☞p. 16
❿ **Speakers**	Placed on the left and right; supports Dolby Virtual Speaker. ☞p. 48
⓫ **Air exhaust vent**	The air outlet of the unit after cooling. ⚠ **Caution** Do not block the exhaust vents, and do not touch the exhaust vent immediately after projecting, or while projecting, since it becomes hot.
⓬ **Storage feet**	Used when placing the unit in an upright position. When storing the unit in an upright position, place it on a stable surface with the storage feet at the bottom. Be sure to place the unit in the storage case supplied with the unit so that no dust enters the air intake vent.

Preparing the Remote Control

Inserting the batteries

At the time of purchase, the batteries are not installed into the remote control. Insert the batteries provided with this unit, before use.

❶ Push in the catch on the rear of the remote control, then lift it upwards.

❷ Insert the batteries observing correct polarity.

❸ Close the battery cover.
⚠ Caution

Check the positions of the (+) and (-) marks inside the battery holder to ensure the batteries are inserted the correct way.

TIP If delays in the responsiveness of the remote control occur, or if it does not operate after it has been used for some time, it probably means that the batteries are becoming flat and need to be replaced. Have two spare AA-size alkaline (manganese) batteries ready to use when required.

Quick Start
Playback procedure

No complicated connections are necessary. You do not even need to select the television type or change the input.

You can enjoy your DVDs on the big screen by following these four easy steps.

The standard speakers support Dolby Virtual Speaker, and you can enjoy real stereo surround sound using the left and right speakers.

Position in front of the screen. ☞p. 18	Connect the power cable. ☞p. 18	Play a disc. ☞p. 19	Adjust the projection position, size, and volume. ☞p. 20

17
Installation

Projection distance and screen size

❶ Place the unit in a position that will enable the optimum size image to be projected on the screen.

When you use a 16:9 ratio, 80" type widescreen, for example, place the unit approximately 237 cm away from the screen.

150" 330×190cm (130×75in.)
100" 220×120cm (87×47in.)
80" 180×100cm (71×39in.)
60" 130×75cm (51×28in.)

Disc Playback

Playing a disc and projecting

DVD Video | Video CD | MP3/WMA | JPEG | DivX

① Insert the disc into its slot by facing the disc label upward.

If you are using a dual-side disc, face the side you wish to play downwards.

Insert an 8-cm disc into the disc slot center position.

A short beep sounds and the power comes on.

Inserting the disc makes the Disc indicator light up green.
CAUTION

Do not use discs with any CD/DVD label stickers stuck to them, and do not use discs that have condensation on them. This may cause malfunction or damage.

② Start playback.

The projection lamp lights up automatically, and projection begins. It takes approximately 30 seconds from when the lamp lights up until the image is projected brightly.

When the Menu appears:
DVD Video ☞ p. 26
Video CD ☞ p. 27
MP3/WMA DivX ☞ p. 29

TIP When using this unit at high altitudes, that is 1500 m or more above sea level, set "High Altitude Mode" to "On". ☞ p. 56

⚠ Caution

Never look at the lens after you have turned the unit power switch to On.
Close the lens cover before inserting or ejecting a disc.

Adjusting the projection position and volume

Adjust the volume and image being projected.

Fine-tuning the projection size (Zoom button)
To increase the size, press the "W" side.
To decrease the size, press the "T" side.

Stopping playback

DVD Video	Video CD	Audio CD	MP3/WMA	JPEG	DivX
Press ▪.

DVD Video Video CD Audio CD DivX After stopping, when you press ►, playback is resumed from the interrupted scene (resume).

Notes on resume play

- If you press ► when "Loading" is displayed on the screen, "Resume Play" is displayed and the disc is played from the last stop position.
- Remember that the resume play function is canceled if you press ▪ twice.
- You cannot resume playing a disc indicated as MP3/WMA JPEG on the File List and on VR formatted DVD Video.
- You can resume playing up to 10 discs that you have recently played even if you replace the discs.
- The position from where playback resumes may be slightly different to where playback was stopped.
- The audio language, subtitle language, and angle settings are memorized along with the stopping position.
- If you stop play when the disc menu is displayed, the resume play may fail.

Turning off the power

❶ When you have played back a disc, press ⏏ to eject the disc from its slot.

- Once you have pressed ⏏, if you want to play back the ejected disc again, you cannot push it back into the disc slot manually. Press ⏏.

❷ Press ⏻.

❸ If the lamp was on, the lamp turns off and the Power indicator on the main unit flashes orange (during cool-down).

❹ The confirmation buzzer beeps twice to indicate that cool-down has completed. Unplug the power cable from the electrical outlet.

If you only press ⏻ to turn off the power, electricity continues to be consumed.

❺ Close the lens cover.

Keep the lens cover in place when the unit is not being used to protect the lens from dirt and damage.

TIP The Power indicator flashes orange to indicate that the internal lamp cooling function (cool-down) is taking place. The buttons on the remote control and the main unit are disabled when cool-down is taking place (approx. 5 seconds).

CAUTION

Do not unplug the power cable during cool-down. This may reduce the lifespan of the lamp.

Basic Playback Operations

From here on, operations are explained primarily using the buttons of the remote control. You can also use the buttons with the same markings as those on the unit control panel to achieve the same effect.

Set the [Function] position before performing operations

Pause

DVD Video	Video CD	Audio CD	MP3/WMA	JPEG	DIVX
Press 〖 ❚❚ 〗 during playback.

- Press ⏯ on the operation panel. The play is paused and restarted each time you press ⏯ .
- To resume playback, press 〖 ▶ 〗.

Reverse search/forward search

DVD Video	Video CD	Audio CD	MP3/WMA	JPEG	DIVX

Press 〖 ◀◀ 〗 or 〖 ▶▶ 〗 during playback.

- There are five levels of reverse/forward search speeds that change each time the buttons are pressed.
- Press 〖 ▶ 〗 to return to normal playback.

> **TIP**
> Depending on the disc you use, the sound may not be audible during forward/reverse search.

Frame advance

| DVD Video | Video CD | DIVX |

Press [‖] during paused playback.

• A single frame is advanced each time you press [‖]. This unit does not have a frame return function.

• Press [▶] to return to normal playback.

Slow motion playback

| DVD Video | Video CD |

1 Press [‖] at the point where you want to begin slow motion playback in order to pause the image.

2 Press [▶▶].

• There are 4 levels of playback speed, selectable each time [▶▶] is pressed.

• When playing a **DVD Video**, slow motion review can be performed by pressing [◀◀]. There are 4 levels of rewinding speed that change each time [◀◀] is pressed.

• Press [▶] to return to normal playback.

• No sound is output during slow motion playback.

Temporarily using the projector's light as illumination (Break)

| DVD Video | Video CD | Audio CD | MP3/WMA | JPEG | Ext.Vid. /Comp. | DIVX |

The break function is useful if, in the middle of a movie, you want to get up or move around, get a drink, or some food, and so on. By simply pressing the [Break ☕] button you can pause the disc being played until you can get up to turn the lights on in the room.

Press [Break ☕] during playback.

- The projection lamp remains lit, whilst the projected image disappears. ☕ flashes in the lower right portion of the screen.
- The screen darkens after about five minutes if the unit is left in break mode without any operations being made. Additionally, after approximately 30 minutes have elapsed, power to the unit automatically turns off.
- Press [Break ☕] to return to the state before the break button was pressed. If the power has switched off, press ⏻ to switch the power back on.

> 💡 **TIP**
> - Operations cannot be performed when the disc menu is displayed.
> - When you press any of the following buttons, break mode is cancelled and the function of the button you pressed is performed.
>
>   ▶, ⏻, ■, ⏏, Source ⟳

Color Mode

| DVD Video | Video CD | Audio CD | MP3/WMA | JPEG | Ext.Vid. /Comp. | DIVX |

You can select a picture quality to correspond to the brightness and other conditions of your room.

① Press [Color Mode].

The currently selected color mode name is displayed on the screen.

> Dynamic

② While the color mode name is displayed, press [Color Mode] repeatedly until the desired color mode appears.

After waiting a few seconds, the color mode name disappears and the picture quality changes.

Dynamic : Suitable for use in a bright room with the outside light shielded.

↓

Living Room : Suitable for use in a room with dim lighting (Default setting).

↓

Theatre : Suitable for use in a pitch-dark room.

↓

Game : Suitable for playing a game with high speed movement in a bright room with the outside light shielded.

- Game is selectable only when Ext.Vid./Comp. is turned on.
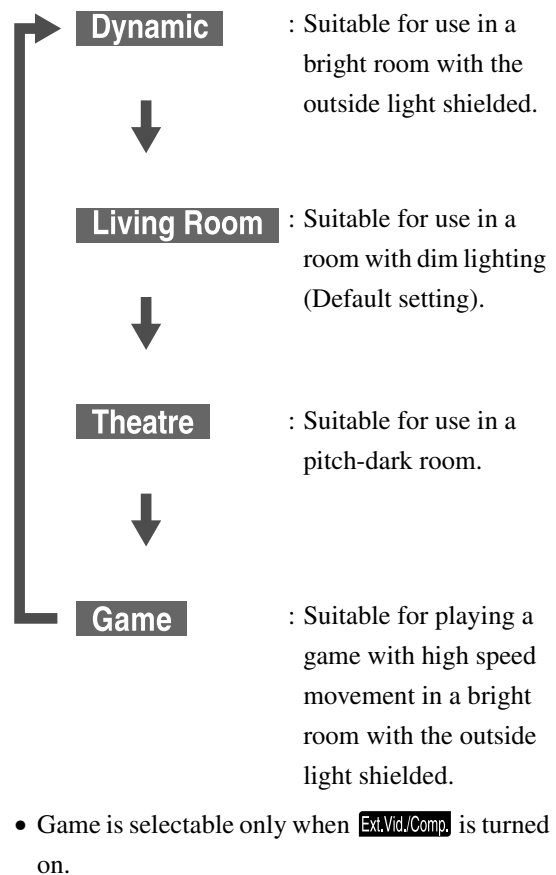

Mute

Press [Mute 🔇] during playback.

- Sound stops coming from the speakers and headphones.
- Press [Mute 🔇] to return to normal playback. The former volume is also restored when power to the unit is turned on again.

Playback from a DVD menu

Some `DVD Video` discs have the following kinds of original menus saved in them.

- **Root Menu:** When multiple titles (image and audio) have been recorded, this integrated disc information is displayed.
- **Menu:** Title-specific playback data (chapter, angle, audio, and subtitle menus) is displayed.

1 Press ◯ (Top Menu) or ◯ (Menu) during playback.

2 Press and select the item you want to see.

You can also select the title number or chapter number directly using the numeric buttons.

> **When using the numeric buttons**
> With the function/numerics toggle switch in the [1 2 3] position, press the following buttons.
>
> **Example)**
>
> 5: [5]   10: [1] → [0]
>
> 15: [1] → [5]   20: [2] → [0]
>
> Once you have finished entering numbers, return the function/numerics toggle switch back to the [Function] position.

3 Press Enter.

Playback a Video CD from the menu

Video CD
You can play a Video CD disc by selecting the desired chapter from any of the following two menus.

- **PBC (Playback control) function:** If a Video CD with "PBC (playback control) enabled" specified on the disc or jacket is inserted into the disc slot, a menu screen is displayed. You can select the scene or information you wish to see interactively from this menu.
- **Preview function:** You can select the desired track or scene and play it back in the following three formats.

Track Digest: Plays the first three or four seconds of each track sequentially. Six tracks are projected on a single screen page.

Disc Interval: The total disc time is divided by six, and the first three or four seconds of each interval are played. Six images are projected on a single screen page.

Track Interval: When a track is being played, it is divided by six and the first three or four seconds of each interval are played. Six images are projected on a single screen page.

PBC (playback control) playback

1 When playing a Video CD that contains PBC, the following kind of menu is displayed.

```
■ PLAY LIST
      M E N U
      Chapter1
      Chapter2
      Chapter3
```
2 Select the item you want to see using ⬇ ⬆ or the numeric buttons. ☞p. 26

The selected contents are played.

Advanced Operations

If you select "Others" from the settings menu and set "PBC" to "Off", the
disc is played directly without displaying the menu screen. PBC is "On"
by default. ☞p. 52

To play using the Preview function

1 If you press ◯ (Menu) while a video CD is playing, the following
Preview menu is displayed.

- You can also use Track Digest and Disc Interval by pressing ◯ (Menu) when
  stopped.

2 Select an item by pressing ⬇️⬆️, and press (Enter).

- If a disc contains six or more tracks, you can press ▶▶| |◀◀ to display
  the next or previous page when you select Track Digest.

- You can return to the initial menu by selecting "Menu" and pressing
  (Enter).

- You can close the Preview menu by selecting "Exit" and pressing (Enter).

3 Select the track you want to see using ▷ ◁ ⌄ ⌃,

and press (Enter).

The selected track is played.

JPEG, MP3/WMA and DivX® playback

| JPEG | MP3/ WMA | DIVX | Data CD |

Set the [Function] position before performing operations

EPSON

Although the **JPEG**, **MP3/WMA** or **DIVX** files stored in a disc and a USB storage device are played back by selecting the desired file from a File List, the function varies depending on the file, as follows.
- If a **JPEG** in the folder is selected, the JPEG files stored in the folder are played back starting from the selected file in Slideshow sequence.

- **MP3/WMA** files are automatically played back, starting from the first file. If you want to play back another file, select a file from the File List displayed.

If a Kodak Picture CD or FUJICOLOR CD is inserted into the disc slot, Slideshow playback is automatically performed.

1 When you play back a disc containing **JPEG**, **MP3/WMA** or **DIVX** files, or a USB storage device, the following File List is displayed.

2 Select a folder or file using ⌄ ⌃.

- When the File List is displayed, you can go to the next or previous page by using ▶▶| |◀◀. When you are on the first page, the |◀◀ button is ineffective and vice versa.

3 Press ► or (Enter) to begin playback.

If ◯ (Menu) is pressed while playing back **JPEG**, **MP3/WMA**, Kodak Picture CD or FUJICOLOR CD, the display returns to the File List.

Advanced Operations

29

- If ▇DivX▇ is displayed, you will return to the File List when you press
  [■] twice.

Slideshow Playback Operation

- The image switching interval depends on the selected image size.

- The Slideshow ends after projection of all JPEG files in the folder.

- You can rotate an image by pressing 〉〈.

- You can reverse the top and bottom of an image by pressing ⬥.

- You can reverse the right and left of an image by pressing ⬥.

- If you press [■] during Slideshow playback, the Slideshow is
  canceled and the thumbnail list is displayed.

- If you press ◯ (Menu) during Slideshow playback, the File List is displayed.

  If you select the desired JPEG file from the list and press [►], the
  Slideshow will start.

- A progressive JPEG file takes a longer time to start when compared
  with a baseline JPEG file.

- The JPEG files stored in a USB storage device are also played in the
  Slideshow.

Operations from the thumbnail list

- If a disc contains 12 or more JPEG files, you can display the previous
  or next page using [►►|] [|◄◄].

- When you select the desired thumbnail and press (Enter), the Slideshow
  restarts from the selected position.

- When you press ◯ (Menu), the File List is displayed. If you select the
  desired JPEG file from the list and press [►], the Slideshow will start.

When playing MP3/WMA audio

Once menu selection is complete and the audio begins, close the lens cover.
The projection lamp turns off and you can enjoy just the music being played.
Open the lens cover to turn the lamp back on.

Simultaneous MP3/WMA and JPEG playback

If a disc contains a mix of MP3/WMA and JPEG files, you can enjoy the
Slideshow with sounds.

When a disc containing both MP3/WMA and JPEG files is
inserted into the disc slot, the MP3/WMA files are automatically
played. If a JPEG file from the File List displayed is selected, the
Slideshow will start.

- The Slideshow ends after projection of all JPEG files in the folder.

- When you press ⬛ during simultaneous file play, the Slideshow is
  canceled and the file thumbnail list is displayed. When you select the
  desired thumbnail from its list and press (Enter), the Slideshow restarts
  from the selected position.

- You can return to the File List screen by pressing ◯ Menu during
  simultaneous file play. You can select the desired MP3/WMA file and
  press ▶. Then, when you select a JPEG file for Slideshow and press
  ▶, the selected items are played back simultaneously.
- If a USB storage device has both MP3/WMA and JPEG files, you can
  also enjoy the Slideshow with sound.

Notes on playback
- Depending on the recording and the characteristics of the disc it is possible that
  the disc may not be readable, or that disc reading may take some time.
- The time it takes to read a disc differs depending on the number of folders or files
  recorded on the disc.
- The order of the File List displayed on the screen may differ from the order
  displayed on the computer monitor.
- Files of a commercial MP3 disc may be played in the different order from those
  recorded on the disc.
- It may take some time to play MP3 files containing still picture data. The time-
  elapsed is not displayed until playback has commenced. Further, there are times
  when an accurate elapsed time is not displayed, even once playback has
  commenced.
- It is possible that data that has been processed, edited, or saved using computer
  image editing software might not play.
- When playing back a Slideshow, JPEG files may be played in a different order
  from that recorded on the disc, and you cannot change the order in which they are
  played back.

Playback by selecting the chapter or track number

| DVD Video | Video CD | Audio CD | MP3/ WMA | JPEG | DivX |

During playback or when paused, select the chapter or track number you wish to play by pressing the numeric buttons.

☞ "When using the numeric buttons" p. 26

> **TIP**
> * Audio CD MP3/WMA JPEG Can also be used when stopped.
> * Depending on the disc, certain operations may not be possible.

Repeat play and random play

| DVD Video | Video CD | Audio CD | MP3/ WMA | JPEG | DivX |

Set the [Function] position before performing operations
Depending on the type of disc, you can loop playback within a range of titles, chapters, or tracks, as in the table below.

Press [2] (Repeat) during playback.

The repeat mode changes whenever you press [2] (Repeat) and the repeat mode name and icon are displayed on the screen.

    ↻ Chapter

* Video CD is not available when playing back using the PBC function.

DVD Video

Screen display	Function	Contents
↻Chapter	Chapter repeat	Repeats the current chapter.
↻Title	Title repeat	Repeats the current title.

(If "Others" is selected from the settings menu and if "MP3/JPEG Nav" is set to "Without Menu")

Screen display	Function	Contents
Repeat One	File repeat	Repeats the current file.
Repeat All	Disc repeat	Repeats all files on the current disc.
Shuffle	Random play	Randomly plays all files on the disc.
Repeat Off	Repeat Off	Cancels repeat or random play.

Canceling repeat play

Press [2] (Repeat) repeatedly until "Repeat Off" is displayed on the screen.

TIP
- DVD Video does not allow use of the "Title repeat" function with some DVDs.
- You can also repeat the play from the playback information screen.
- The [2] (Repeat) button is ineffective during program play.

Program play

Set the [Function] position before
performing operations

You can set titles, chapters, and tracks to playback in your order of preference.

1 Press $\boxed{3}^{\text{Program}}$ during play or when paused.

The program screen will appear for you to set a playback sequence.

Program:Chapter(01-01)

1	__	6	__
2	__	7	__
3	__	8	__
4	__	9	__
5	__	10	__
	Exit		Next ▶▶|
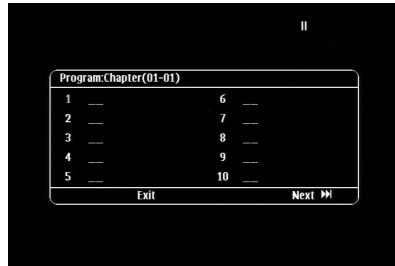

2 Using the numeric keys, enter title and track/chapter
numbers sequentially.

⚠ "When using the numeric buttons" p. 26

- Use ▶ ◀ ▲ ▼ to shift the cursor in respective directions.

- If the disc has 10 or more tracks/chapters, either press ▶▶| or select
  "Next" on the screen and press (Enter) to display the next page. To display
  the previous page, either press |◀◀ or select "Previous" on the screen
 and press (Enter).

- If you wish to delete a track or chapter you have entered, position the
  pointer on it and press (Enter).

- To close the program screen, select "Exit" from the program screen and
  press (Enter).

3 When you have set the playback sequence, select "Start"

from the screen and press (Enter).

- Playback starts in the set sequence.

- Once the set playback is fully complete, playback stops.

Canceling program play
- Press ▣.
- Turn the power switch off.
Resuming normal playback
Stop play and press ▶.

Zoom In

DVD Video Video CD JPEG

Set the [Function] position before performing operations
You can zoom (enlarge or compress) the projection image on the unit screen. If the enlarged image exceeds the screen size, you can display it by panning.

1 Press ^Zoom^ [6] during playback.

The magnification (or zoom rate) is displayed.

⌐ 1.6

2 Select the desired magnification by pressing ^Zoom^ [6] repeatedly.

- You can only enlarge JPEG images. You cannot reduce them.

- After you have enlarged the image, press ◁▷ ◁▷ ⌐⌐ ⌐⌐ to pan.

- To return to the original size, press ^Zoom^ [6] repeatedly until the Zoom Rate disappears.

Advanced Operations

Changing the audio language

DVD
Video

Video
CD

DIVX

When a disc has been recorded with multiple audio signals or languages, you can switch to the available audio signal or language of your preference.

1 Press (Audio ⊙») during playback.
The current audio settings are displayed on the screen.

2 Select the desired settings by pressing (Audio ⊙») repeatedly.

💡 **TIP**
- You can also switch from the playback information screen. ☞ p. 37
- If a language code (for example 6978) is displayed ☞ p. 53

Changing the subtitles display

DVD
Video

DIVX

You can choose whether or not to display subtitles for discs that have been recorded with subtitles. If a disc has multiple language subtitles, you can switch to the preferred language.

1 Press (Subtitle ▭) during playback.

The current subtitle settings are displayed on the screen.

2 Select the desired settings by pressing (Subtitle ▭) repeatedly.

- If the available subtitle is not found, the ⊘ icon is displayed.

💡 **TIP**
- You can also switch from the playback information screen. ☞ p. 37
- When using **DIVX**, you can switch between the embedded subtitle and the subtitle file data. Both of them can be displayed with 45 single-byte characters (27 double-byte characters) on 2 lines maximum. Any excess characters are not displayed.
  A subtitle file with any of the following extensions is valid:
  ".srt", ".smi", ".sub", ".ssa" and ".ass";
  The subtitle file name must be the same as the file name of the movie.

Changing the angle
For discs that have been recorded with multiple camera angles, you can switch from the main angle to a different camera angle of your preference, such as from above, or from the right, during playback.

1 Press ⟨Angle⟩ during playback.

The current angle is displayed on the screen.

2 Select the desired angle by pressing ⟨Angle⟩ repeatedly.

TIP   You can also switch from the playback information screen. ☞ p. 37

Carrying out operations from the playback information screen

DVD Video   Video CD   Audio CD   DIVX

Set the [Function] position before performing operations
You can check the current playback status and change your settings without stopping the play.

1 Press ⟨On Screen 1⟩ during playback.

The projected image is reduced, and the following information screen is displayed under it.

Menu	▶	
Title	01/01	
Chapter	01/01	
Audio	2ch	Others
Subtitle	Off	▼
Bitrate 01	Title Elapsed 0:00:39	

- When you are using a **Audio CD**, the playback time is switched as follows each time you press ⟨On Screen 1⟩: "Single Remain" → "Total Elapsed" → "Total Remain" → "Single Elapsed.

- When you are using a **DIVX** **MP3/WMA**, the playback time is switched as follows each time you press ⟨On Screen 1⟩: "Total Elapsed" → "Total Remain" → "-:--:--" (WMA does not support for Track Time)

2 Pressing ⌄⌃, position the pointer on the desired item and press (Enter).

- You can set the title/chapter/track number and time by using the numeric keys, and set the play start time.☞p. 26

- When the selected item appears, select the desired value using ⌄⌃ and press (Enter).

- Press ⌐OnScreen1 once and the playback information screen disappears.

- When you are using **DIVX** and "-:--:--" is displayed, you can set the play start time of the track by using numeric keys.

- You cannot use this function when play is stopped.

3 Press (Enter).

Playback starts with the selected title/chapter/track or specified time settings.

Contents on the playback information screen

Setting the sleep timer

DVD Video	Video CD	Audio CD	MP3/ WMA	JPEG	DIVX	Ext.Vid. /Comp.

Set the [Function] position before performing operations

When the time you set on the sleep timer has passed, the unit power switch is turned off automatically. You can prevent unnecessary power from being consumed if you fall asleep while watching a movie.
If the sleep timer is set to "Sleep Off" and if play is stopped or finished and the unit is not operated for approximately 30 minutes, the unit power switch is turned off automatically.

Press $\overset{\text{Sleep}}{\square}$.

- When you press $\overset{\text{Sleep}}{\square}$, the current sleep timer setting is displayed. When the sleep timer is displayed, select the desired setting using $\overset{\text{Sleep}}{\square}$.

Sleep Off : If the standby screen is projected and if the unit is not operated for approximately 30 minutes, its power switch is turned off automatically. If image signals are not entered in **Ext.Vid./Comp.** mode and if the unit is not operated for approximately 30 minutes, its power switch is turned off automatically (default setting).

Sleep 10 : After 10 minutes have elapsed, the power switches off.

Sleep 150 : After 150 minutes have elapsed, the power switches off.

Setting the sleep timer
The "Sleep" message is displayed on the screen approximately 20 seconds before automatic power off.

Changing the sleep timer
Press $\overset{\text{Sleep}}{\square}$ repeatedly and select the new time.

Checking the sleep timer setting
Once the sleep timer has been set, if you press $\overset{\text{Sleep}}{\square}$ once, the remaining time before sleep is displayed on the screen.

- Sleep timer settings are not memorized. If the power is switched off, the sleep timer is canceled.
- With discs that return to the menu once playback has completed, power to the unit will not turn off even when the "Sleep Off" mode is set.

Changing the aspect ratio

DVD Video | Video CD | JPEG | Ext.Vid. /Comp.

Set the [Function] position before performing operations

The unit automatically recognizes the aspect suitable for the input signal, and the image is projected in the appropriate aspect. If you want to change the aspect yourself, or if the aspect is not correct, you can change it in the following way.

Press ⬚ Aspect.
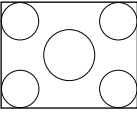

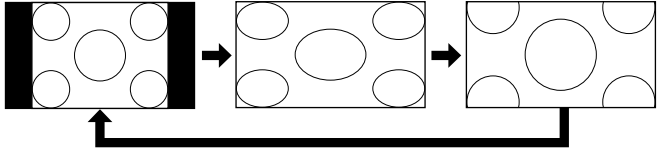

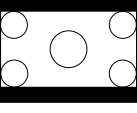

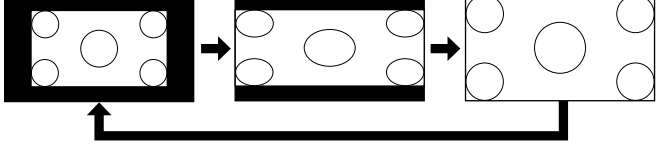

- Each time you press ⬚ Aspect the aspect ratio name is displayed on the screen and the aspect ratio is changed.

- The aspect ratio for disc settings and image signals can be changed in the following way.

When projecting by using the built-in DVD player
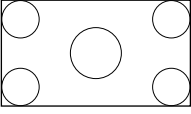

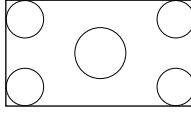

Screen Size	Aspect
16:9	Fixed to full size (16:9)
4:3	Normal Full Zoom
Letterbox	Normal Full Zoom

* JPEG Fixed to normal size when the Slideshow is executed.

When projecting component video (SDTV), composite video images

Screen Size	Aspect		
4:3	Normal	Full	Zoom
Letterbox	Normal	Full	Zoom

When projecting component video (HDTV) images

Screen Size	Aspect
16:9	Fixed to full size (16:9)

When projecting computer images

Wide panel computer images are always projected at the normal (wide screen) setting.

If wide panel computer images are not projected in the correct aspect, press the ^{Aspect} button to change to an appropriate aspect.

Playback by attaching a peripheral device

Connecting a USB storage device

You can attach a USB memory or multicard reader that conform to the USB 1.1 to the unit and play the following format files.

- MP3/WMA files
- JPEG files
- DivX® files

The file playback and your operations during play are the same as when you play files of a `Data CD` using the standard DVD player.
> **TIP**
> - When you connect a USB storage device to the unit, the source is changed to the USB and playback starts automatically when:
>   - a disc is being played or stopped on the standard DVD player.
>   - another video device, a TV set or a computer is connected to the unit and a disc is being played or stopped.
> - If you use a USB hub, the unit will not operate normally. Connect the USB storage device directly to the unit.

CAUTION

- When power to the unit is turned on with only a USB storage connected (no disc inserted in the disc slot), the USB storage is not recognized and "No Disc" is displayed. Even if you press ▶, it does not playback. In such a case, remove the USB storage and then reconnect.

- Do not remove the USB storage during a Slideshow. Stop the Slideshow by pressing ■, and remove the USB storage.

Connecting to another video device, a TV set, or a Computer

Aside from the built-in DVD player, this unit can project images by connecting to a computer or the following devices with a video output port.

- Video recorder   - Game machine   - Video device with built-in TV tuner   - Video camera and others

Video equipment signal format
The kind of video signal that can be output depends on the video equipment. The image quality differs depending on the video signal format. Generally speaking, the order of quality of the image goes as follows.
1. Component video → 2. Composite video

Check which signal system to use in the "Documentation" supplied with the video equipment that is being used. The composite video may be called "Image output".

TIP   If the equipment you are connecting has a unique connector shape, connect using the cable supplied with your equipment, or an optional cable.

CAUTION

- Turn off connected equipment. Damage may result if you try to connect when the power is on.
- Close the lens cover before connecting a device to the unit. If fingerprints or marks are left on the face of the lens, the image will not be projected clearly.
- Do not try to force a cable plug with a different shape the port. This may damage the unit or the equipment.

Projecting images from external video equipment or a computer
1 Open the lens cover and press (⏻).

2 When you press [⊡] (Source), the following menu appears on the screen.

The orange pointer points to the currently selected source. Select the desired source by pressing ⌄ ⌃, and press (Enter).

⊡ Source

DVD/USB
Component
Video
PC
3 Turn the device power switch on, and press the [Play] or [Playback] button on the video device.

If the lamp was off, it comes on automatically.

After a moment, the image is projected.

To return to the standard built-in DVD player
Make any of the following operations.

• Press [▶].

• Insert a disc into the disc slot.

• Select "DVD/USB" by pressing [⊡] (Source).

• Press (⏏).

When a computer image is not projected

You can switch the image signal destination from the computer by holding

down ⌨Fn and pressing ⌨F◯ (the key is usually labeled ▢ or 🖳).

✍ Computer "Documentation"

After switching, wait a few seconds for projection to start.

Examples of Switching Output			
Epson	Fn + F8	Toshiba	Fn + F5
NEC	Fn + F3	IBM/Lenovo	Fn + F7
Panasonic		Sony	
SOTEC		Dell	Fn + F8
HP	Fn + F4	Fujitsu	Fn + F10
Macintosh	Set mirroring or display detection. Depending on your OS, you can set them by pressing F7.		

Depending on the computer, each time the key to change the output is pressed, the display status may also change as follows.

Audio Settings

Listening with headphones

> ### ⚠ Caution
>
> - When listening with headphones, make sure the volume is not too high. You may damage your hearing when listening to sounds at high volume over an extended period of time.
> - Do not set the volume too high from the outset. A loud sound may be produced suddenly that may cause damage to your headphones or your hearing. As a precaution, lower the volume before you switch off this unit then raise it gradually after you switch it back on.

Connecting commercially available headphones.

To 🎧 jack
Headphones

> **TIP** Once you have connected your headphones to the headphone jack, no sound will come from the speakers. Stereo mode will be automatically selected. Sound mode selection is not possible when you are listening through the headphone. When you disconnect the headphone from the headphone jack, the Sound mode will automatically toggle to the selected Sound mode prior to the connection of headphone to headphone jack.

Advanced Operations

Connecting to audio equipment with a digital coaxial audio input port

You can connect to AV amplifiers and so on or equipment capable of making digital recordings when they are equipped with a coaxial digital audio input port. When connecting, use a commercially available coaxial digital cable.

Fully plug the audio cable connector into jack.

Digital Coaxial Audio-Out

To a digital coaxial audio input port

EPSON
When you turn the Dolby Virtual Speaker function on, you can enjoy real stereo sound although sound is usually provided through multiple speakers. When using the Dolby Virtual Speaker function, setup the unit so that the unit has to be placed in front of the viewer.
1 Press $\boxed{\underset{4}{\text{Surround}}}$.

The current settings are displayed on the screen.

Stereo

2 Select the desired settings by pressing ‎$\overset{\text{Surround}}{\boxed{4}}$ repeatedly.

┌─► Dolby VS   : Dolby Virtual Speaker mode
│   (default setting)
│   ↓
└── Stereo   : Stereo mode

When using the headphone the sound mode automatically changes to the Stereo mode as the Dolby Virtual Speaker mode is not applicable on headphone output. Sound mode will automatically toggle to the previous mode when the headphone removed.
Selecting the digital sound effects

Set the [Function] position before performing operations
You can select the sound effects appropriate to the musical genre of the current disc.

1 Press ‎$\overset{\text{Sound}}{\boxed{5}}$.

The current settings are displayed on the screen.
Concert

2 Select the desired settings by pressing ‎$\overset{\text{Sound}}{\boxed{5}}$ repeatedly.

The sound effects, which you can select according to the inserted disc or the connected source, are switched as follows:

DVD Video Video CD Ext.Vid./Comp.	Concert → Drama → Action → Sic-Fi (Science Fiction)
Other discs	Classic → Jazz → Rock → Digital

TIP   Select "Concert" or "Classic" sound effects for flat sound output.

Settings and Adjustments

Setup Menu Operation and Functions

The settings of this unit can be adjusted to suit the environment in which it is used.

Using the setup menu
1 Press ◯ during playback or when stopped.

The following setup menu is displayed.

2 Press ▷ ◁ and select the desired icon.

3 Press ⬇ ⬆ to select the item to be set, and then press ▶ ◀ to adjust.

• When options are displayed, select a desired option and press (Enter) to enable it.

4 After setup is complete, press [Visual Setup] to close the menu.

Visual Setup menu

Image page

Setting Item	Setting Contents
Brightness	Adjusts the image brightness.
Contrast	Adjusts the difference between light and shade in the images.
Color Saturation	Adjusts the color saturation for the images. (This is not displayed when a computer is connected.)
Tint	Adjusts the image tint. (This is not displayed when the external video or computer connected is not NTSC.)
Sharpness	Adjusts the image sharpness.
Color Temp.	Adjusts the entire image tint. High: Makes the image bluish. Low: Makes the image reddish.
Progressive Converts the interlace signals into progressive signals appropriate to the current picture.	Can only be set when one of the following five signals is input: 480i, 576i and 1080i in component video, or NTSC and PAL in composite video. Off: Suitable for fast action images. Video: Suitable for ordinary video images. **Film/Auto**: Uses 2-3 pull-down mode and converts 24/30-frame movie film, CG and animation images into appropriate progressive signals to produce natural image quality.

Option page

Setting Item	Setting Contents
Video Signal Sets the signal format of the video equipment connected to the Video input port.	Only displayed when "Video" is selected as the source. At the time of purchase, this is set to "Auto" so the video signal is recognized automatically. If interference appears in the projected images or no images appear when you select "Auto", select the appropriate signal manually.
Child Lock Use ⓤ on the main unit to lock the power-on.	On: Starts the Child Lock. To turn the power supply on, hold down ⓤ on the main unit for approximately 5 seconds or hold down ⓤ on the remote control. **Off**: Cancels the Child Lock.
Ceiling Projection	On: Projects images onto the ceiling using the optional Ceiling Reflector Kit. **Off**: Deactivates the ceiling projection.
High Altitude Mode Set this mode when you use this unit at high altitudes.	When using this unit at high altitudes, that is 1500 meters or more above sea level, turn this mode "On".
Zoom Select W/T on the operation panel of the main unit.	Adjusts the image size. Wide: Enlarges the image. Tele: Reduces the image.

Info page

Item	Contents
Information Displays the current status.	Lamp Hours: Total usage time of the lamp. 0H is displayed for 0 to 10 hours. Changes to units of 1 hour at 10 hours and above. The display turns yellow text when it is time to change the lamp. Source: Displays whether standard DVD player images are being projected, or images from external video equipment or a computer are being projected. Video Signal: This is displayed when "Video" is selected as the "Source", and displays the format of the video signal being input. Resolution: The resolution is displayed if the "Source" is other than "Video". The resolution of image signals from a computer and the component video signals that are being input are displayed. Status: Displays any error information. You may be asked for this information when you contact your service center.
Reset Lamp Hours	After you have replaced the unit lamp, initialize the lamp hour settings. The accumulated lamp operating time is cleared.

Appendix

Troubleshooting

Reading the indicators

You can check the status of this unit using the
indicators on the top panel.
Check each condition in the following table and follow
the steps to remedy the problem.
* If all indicators are not lit, the power cable is not
connected correctly or the unit is not powered.
When the ☼ or 🌡 indicators flash orange   **Warning**   ● : lit -☼- : flashing   ○ : off

Red Orange	-☼- ○ -☼- -☼- 🌡	**High Temperature alarm** You can continue projecting in this state. Projection stops automatically if subsequent high temperatures are registered.	Check the 2 items listed. • Move this unit away from the wall at least 20 cm. • Clean the air filter. ∠☞p. 63	If there is no improvement when you press ⏻ and switch the power on, discontinue use and disconnect the power cable from the electrical outlet. Contact your local dealer or the nearest address provided in the Inquiries. ∠☞p. 76
Green Orange	● -☼- -☼- ○ 🌡	**Lamp replacement notification** It is time to replace the lamp. Replace the lamp with a new one as soon as possible. Do not continue to use the lamp in this state, otherwise it may explode. ∠☞p. 66		

When ⏻ lights on red   **Error**

Red ● Red ☼ ☼ Red ☼ 🌡	**Internal failure** Wait for approximately 1 minute and 30 seconds. Then, disconnect and reconnect the power cable. If the indicator status does not change when ⏻ is pressed and the power turned on...	

If the error continues
Wait for approximately 1 minute and 30 seconds. Then, disconnect the power cable from the electrical outlet and contact your local dealer or the nearest address provided in the Inquiries. ☞ p. 76

Red ● ○ ☼ Red ☼ 🌡	**Fan related error/Sensor error**

Red ● ○ ☼ Red ● 🌡	**High temperature error (overheating)** The lamp turns off automatically and projection stops. Wait for approximately 5 minutes. When the Power indicator color changes to orange, check for the 3 points shown at right.	• Move this unit away from the wall by at least 20 cm. • Clean the air filter. ☞ p. 63 • When using this unit at high altitudes, that is 1500 m or more above sea level, set "High Altitude Mode" to "On". ☞ p. 56	If the indicator status does not change when ⏻ is pressed and the power turned on...

Red ● Red ☼ ☼ ○ 🌡	**Lamp error/Lamp failure/Lamp cuts out/Lamp cover open** Wait for approximately 1 minute and 30 seconds, and check for a blown lamp. ☞ p. 66 Clean the air filter and the air intake vent. ☞ p. 63

The lamp is not broken	Reinsert the lamp then turn on the main power switch on the main unit.	If the condition is not fixed once the lamp is re-inserted
The lamp is broken	Contact your dealer for further advice. ☞ p. 76	

When using this unit at high altitudes, that is 1500 m or more above sea level, set "High Altitude Mode" to "On". ☞ p. 56

	• Press the (Enter) button on the remote control if interference or flickering appear in the computer image being projected. "Running Auto Setup···" is displayed and synchronization, tracking, and position are automatically adjusted.	-
Image is truncated (large) or small	• The unit automatically recognizes the aspect ratio appropriate to input signals and projects images. If the aspect ratio is not selected correctly, press (Aspect) and select the aspect ratio appropriate to the input signal.	☞p. 40
	• Press the (Enter) button on the remote control if part of the computer image being projected is missing. "Running Auto Setup···" is displayed and synchronization, tracking, and position are automatically adjusted.	-
Image colors are not right	In the visual setup menu, set the "Video Signal" to the signal format appropriate to the device.	☞p. 56
Moving images being played back by the computer become black	Change the computer's image signal to external output only. ☞ Check the "Documentation" supplied with the computer for more information, or inquire to the computer's manufacturer.	-

Maintenance

This section describes maintenance tasks such as cleaning the unit and replacing consumable parts.

⚠ Caution

Before starting the maintenance, unplug the power cable from the electrical outlet.

Cleaning

Cleaning the air filter and air intake vent

When dust builds up on the air filter or the air intake vent, or the message "The unit is overheating. Make sure nothing is blocking the air vent, and clean or replace the air filter." is displayed, remove any dust from the air filter and the air intake vent using a vacuum cleaner.

> **CAUTION**
>
> If dust collects on the air filter or the air intake vent it can cause the internal temperature of the unit to rise, and this can lead to operation problems and a shortening of the service life of optical parts. It is recommended that you clean these parts at least once every three months. Clean them more often than this if the unit is used in particularly dusty environments.
Cleaning the main unit

Clean the surface by wiping it gently with a soft cloth. If the unit is particularly dirty, moisten a cloth with water containing a small amount of neutral detergent, firmly wring the cloth dry, wipe the unit softly with the cloth to remove stains, and then wipe it again with a soft, dry cloth.

> **CAUTION**
>
> Do not use volatile substances such as wax, alcohol, or thinner to clean the unit's surface. These can cause the unit to warp and make the coating finish peel off.

Cleaning the projection lens

Use a commercially available cloth for cleaning glasses to gently wipe the lens.

> **CAUTION**
>
> Do not rub the lens with harsh materials or subject the lens to impact shock, as it is fragile.

Appendix

Consumables replacement period

Air filter replacement period

When the air filter gets dirty or is broken

Lamp replacement period

- The message "Replace the lamp" appears on the screen when projection starts.
- The projected image gets darker or starts to deteriorate.

TIP
- In order to maintain the initial brightness and image quality, the lamp replacement message is displayed after about 2900 hours of use has passed. The time at which this message is displayed will vary depending on the color mode settings and the conditions under which this unit has been used.
- If you continue to use the lamp after this period, the possibility of the lamp breaking becomes greater. When the lamp replacement message appears, replace the lamp with a new one as soon as possible, even if it is still working.
- Depending on the characteristics of the lamp and on the way it has been used, the lamp may become darker or stop working before the lamp warning message appears. You should always have a spare lamp ready in case it is needed.

Optional Accessories and Consumables

The following optional accessories and consumables are available for purchase if required. This list of optional accessories is applicable as of September, 2007. Details of accessories are subject to change without notice and availability may vary depending on the country or area of purchase.

Consumables

Replacement lamp ELPLP44 (Lamp x1) Use as a replacement for used lamps.	Air filter ELPAF14 (Air filter x1) Use as a replacement for used air filters.

Optional accessories

50" portable screen ELPSC06 60" portable screen ELPSC07 80" portable screen ELPSC08 100" screen ELPSC10 A compact screen which can be carried easily. (Aspect ratio 4:3)	HD-15 cable ELPKC02 (1.8 m - for mini D-Sub 15-pin/mini D-Sub 15-pin) HD-15 cable ELPKC09 (3 m - for mini D-Sub 15-pin/mini D-Sub 15-pin) HD-15 PC cable ELPKC10 (20 m - for mini D-Sub 15-pin/mini D-Sub 15-pin) Use to connect the unit to a computer.
	Component video cable ELPKC19 (3 m - for mini D-Sub 15-pin/RCA male x 3) Use to connect a component video source.

Replacing the air filter

> **TIP**
> Dispose of used air filters properly in accordance with your local regulations.
> Filter: Polypropylene
> Frames: ABS resin

1 Turn the power switch off and when a short beep sounds, unplug the power cable.

2 Remove the air filter cover.

Place your finger in the hollow and lift upwards.
3 Take out the old air filter.
4 Install the new air filter.
5 Install the filter cover.
Replacing the lamp

⚠ Caution

The lamp is hot immediately after use. Once the power has been switched off, allow approximately one hour to pass before replacing the lamp to allow it to cool thoroughly.

---

1 Turn the power switch off, and when a short beep sounds, unplug the power cable.

---

2 Loosen the screws of the lamp cover attachment using the screwdriver that supplied with the replacement lamp. Slide the lamp cover horizontally, and then lift it up to remove it.

---
3 Loosen the lamp attachment screws.

---
4 Take out the old lamp.

---
5 Install the new lamp.
6 Tighten the lamp attachment screws firmly.
7 Install the lamp cover.
CAUTION

- Install the lamp and the lamp cover securely. For the safety of this unit, the lamp will not turn on if the lamp or the lamp cover is not installed correctly.
- This product includes a lamp component that contains mercury (Hg). Please consult your local regulations regarding disposal or recycling.
  Do not dispose of it with normal waste.

Resetting the lamp operating time

After the lamp has been replaced, make sure you initialize the Lamp Hours setting.
The unit has a built-in counter that keeps track of the lamp operating time and the lamp replacement message is displayed based on this counter.

---

1 Connect the power cable, and press ⏻.

---

2 Press ⬚ (Visual Setup) and when the menu appears, set the "Info" to "Reset Lamp Hours".

Reset Lamp Hours

OK to initialize Lamp Hours?

Yes   No

[◆]Item   [Enter]Execute   [Visual Setup]Exit
3 Select "Yes" and press (Enter) to initialize the setting.

Projection Distance and Screen Size

Refer to the following table and place the unit in a position which allows the best possible projection for the size of the screen.

Units: cm (ft.)

16:9 Screen Size		Projection Distance
		Minimum (Zoom Adjustment Wide) - Maximum (Zoom Adjustment Tele)
30"	66 x 37 (26 x 15)	85 - 116 (2.8 to 3.8)
40"	89 x 50 (35 x 20)	116 - 158 (3.8 to 5.2)
60"	130 x 75 (51 x 28)	177 - 240 (5.8 to 7.9)
80"	180 x 100 (71 x 39)	238 - 323 (7.8 to 10.6)
100"	220 x 120 (87 x 47)	299 - 405 (9.8 to 13.3)
120"	270 x 150 (106 x 59)	360 - 488 (11.8 to 16.0)
150"	330 x 190 (130 x 75)	452 - 611 (14.8 to 20.1)

Units: cm (ft.)

4:3 Screen Size		Projection Distance
		Minimum (Zoom Adjustment Wide) - Maximum (Zoom Adjustment Tele)
30"	61 x 46 (24 x 18)	105 - 143 (3.4 to 4.7)
40"	81 x 61 (32 x 24)	143 - 194 (4.7 to 6.3)
60"	120 x 90 (47 x 35)	217 - 295 (7.1 to 9.6)
80"	160 x 120 (63 x 47)	292 - 396 (9.6 to 13.0)
100"	200 x 150 (79 x 59)	367 - 497 (12.0 to 16.3)
120"	240 x 180 (94 x 71)	442 - 598 (14.5 to 19.6)
150"	300 x 230 (118 x 91)	554 - 749 (18.2 to 24.5)

* 1 You cannot connect to models where the VGA output port is not installed.

* 2 Letterbox signals

Even when signals other than those mentioned above are input, it is likely that the image can be projected. However, not all functions may be supported.

Small characters, and so on may not be visible.

Compatible MPEG format list

Extension	Video Codec	Audio Codec	Resolution
.AVI	MPEG-1/MPEG-2/ MPEG-4(Advanced Simple Profile)	PCM/ADPCM/MPEG/ MP3/WMA/AC3/DTS	PAL: 25 Hz 720 x 576 or less NTSC: 30Hz 720 x 480 or less
.VID/.DIV/ .DIVX(Home Theater)/ .XVID	MPEG-4(Advanced Simple Profile)	PCM/ADPCM/MPEG/ MP3/WMA/AC3/DTS	PAL: 25 Hz 720 x 576 or less NTSC: 30Hz 720 x 480 or less
.MPE/ .MPG/ .MPEG	MPEG-1/ MPEG-2	PCM/ADPCM/LPCM/ MPEG/MP3/WMA/ AC3/DTS	PAL: 25 Hz 720 x 576 or less NTSC: 30Hz 720 x 480 or less
.DAT	MPEG-1	MPEG I or II /layer II	PAL: 25Hz 352 x 288/704 x 576 NTSC: 30Hz 352 x 240/704 x 480
.VOB	MPEG-2	PCM/ADPCM/LPCM/ MPEG/MP3/WMA/ AC3/DTS	PAL: 25Hz 720 x 576 NTSC: 30Hz 720 x 480

The file format must meet the following requirements

- Resolution: up to 720 x 576

- GMC (global motion compensation) point: Up to one

- Bit rate: CD: 5.6 Mbps

            DVD: 19Mbps

            USB: 5.57 Mbps (However, this may be slower depending on the performance of the USB storage.)

Specifications

Product name	EH-DM2
Dimensions	320W x 135H x 230D mm (Including projections)
Panel size	0.55" wide
Display method	Polysilicon TFT active matrix
Resolution	409, 920 pixels (854W x 480H dots) x 3
Focus adjustment	Manual
Zoom adjustment	Digital type (Approx. 1:1.35)
Lamp (light source)	UHE lamp, 140W, Model No.: ELPLP44
Power supply	100 - 240VAC +/-10%, 50/60Hz, 2.5 to 1.1A

Power consumption	100 to 120VAC area	Operating: 225 W Standby: 5 W
	220 to 240VAC area	Operating: 225W Standby: 5 W

Operating altitude	Altitude: 0 m to 2286 m
Operating temperature	+5 to +35ºC (No condensation)
Storage temperature	-10 to +60ºC (No condensation)
Mass	Approximately 3.8 kg

Connectors	Input	Audio port	1	RCA pin jack
		Video port	1	RCA pin jack
		Component port	1	RCA pin jack
		Computer port	1	Mini D-Sub 15-pin
		USB port	1	Type A
	Output	Digital Coaxial Audio-Out port	1	RCA pin jack
		Headphone jack	1	3.5 mm mini-jack

Speakers	Maximum input 8W, Rated impedance 12 Ω ohms

Audio output	Analog audio output	1 speaker system:Practical, maximum output 8W + 8W (10% THD)
		1 headphone system: 25 mW/32 Ω ohms
		Dynamic range: 70 dB or more
	Digital audio output	Digital coaxial output

* The USB ports may not accept all USB-compatible devices.

Pixelworks DNX^{TM} IC is installed in this unit.

Tilted angle

0° - 15°   0° - 15°
The unit may fail or may cause an accident if it is tilted more than 15 degrees.
