Multimedia Projector EB-992F/982W/972/118/W49

High Images Quality in Bright Classroom

Easy Setting

Bigger and Brighter Imag 🛄

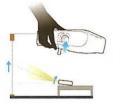

Worry Free For Maintenance

Auto Vertical Keystone

Auto Vertical Keystone automatically detects and corrects image distortion when the foot lever is used to adjust the height of a projected image, saving setup time.

Screen Mirroring with Mira cast® (EB-992F only)

Miracast support makes it easy to connect smart devices or laptops to a projector.

This feature can be used without additional options or the installation of an application for wireless connection. Quick wireless connection makes the presentation smart and eliminates annoying cabling.

Miracast® is a registered trademark of Wi-Fi Alliance®

Lamp Life

A long lamp life reduces maintenance and costs.

Lamps last up to 17,000 hours in ECO mode, the equivalent of 14 years' worth of use*.

• (6 hours) x (200 weekdays/year) x (14 years) — 17,000 hours lamp life in ECO mode.

Lens Shutter

The lens shutter can be used to quickly stop and start projection without actually turning power off and on. This feature temporarily blocks an image projected onto a whiteboard, allowing the whiteboard to be used as a whiteboard.

Horizontal Keystone Slider

The intuitive Horizontal Keystone Slider makes it easy to adjust the shape of an image to evenly rectangular when the projector is placed to the side of the projection area, saving setup time.

Various Interfaces

The projector supports a range of connectivity options, including HDMI, VGA, and USB.

These interfaces support connection to both the latest digital devices as well as to legacy analog products that are already in classrooms, without the need for adaptors.

WPA2 / WPA3-Enterprise

WPA2/WPA3-Enterprise provides a safe method of wireless connectivity so that projectors can connect to a business environment over a secure wireless network.

Home Screen

The home screen offers quick access to frequently used functions. Connected interfaces can be recognized at a glance and switched instantaneously. The information needed when setting up a wireless connection is projected on-screen, making connection fastandeasy.

White/Color Light Output

Up to 4,200 lm* brightness ensures visibility in bright conference rooms and classrooms.

•EB-982W: 4,200lm. EB-972: 4,1001m. EB-992F: 4,0001m, EB-118/W49: 3,800lm

Resolution

High-resolution projectors capture all the information from PCs and other devices, helping to ensure smooth communication.

<Higher resolution provides much information

Up to Four Screens at Once with iProjection

The Epson iProjection* app can be used to easily share and control contents from up to four connected devices simultaneously.

Epson iProjection eliminates the need for annoying cabling by transferring still images and files from smart devices to projectors, for smooth wireless projection.

Split Screen Function for Wired / Non-wired Devices

A split screen function enables the simultaneous projection of two images from separate devices through both wired and wireless connections. Lessons in the classroom can be made more engaging by connecting a projector with a camera and a PC or tablet.

Color Light Output

Epson's 3LCD technology delivers bright images in vivid color. Projectors should provide not only high white light output but also high color light output. If color light output is low, color images appear dull and dark.

Epson 3LCD projectors produce brighter colors than 1-chip DLP*competitors.

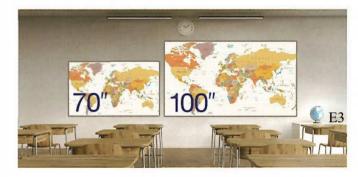

'DLP is a registered trademark or a trademark Texas Instruments in the US and/or other countries.

Bigger and Brighter Images

The 992F series deliver large, bright images that are clearly visible even from the back of a room, which makes for stress-free viewing.

Split Screen Function

A split screen function allows two separate image sources to be projected on a single screen. This function allows the projector to perform a dual role, eliminating the need for a second projector.

Optical Zoom

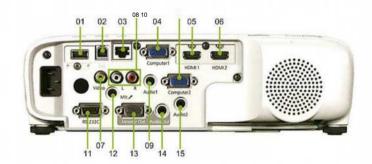

Optical zoom provides the projector's installation location desired picture size.

flexibility to adjust the while still maintaining the
