

HOME CINEMA  
PROJECTORS  
A POWERFUL PERFORMANCE

XV-Z10

**SHARP**

The Sharp XV-Z10 Home Cinema projector brings 16:9 Widescreen entertainment into the home in an impressive, yet affordable fashion. Utilising technology from Sharp's award winning projector range, the XV-Z10 makes the viewing experience truly spectacular.

Films, sporting events, or console games all come to life in vivid and dynamic detail thanks to the 1000ANSI Lumens and 700:1 contrast ratio.

The unique, joystick-controlled 360° lens shift ensures incredibly easy set-up. Additionally, it enables the flexibility and convenience of being able to position the projector off centre

from the screen. Unlike other projectors, there is no need to have the XV-Z10 in the middle of the room for the best picture. Its compact size means it's also easy to store, but its stylish design certainly won't look out of place.

Thanks to its short throw lens, an outstanding 100" diagonal screen size can be generated from just 3m, making it ideal for use in any room.

Whether connected to DVD, video, satellite, digi-box, PC or games console, the XV-Z10 provides a fantastically entertaining experience.

### XV-Z10

#### SPECIFICATION:
