

H105  
DLP® Projector

Bright & Portable 3D Home Entertainment Projector

# Experience bright movies and games with the H105 HD Ready 3D projector.

Prepare yourself for life-size 3D games, movies and sports! Project huge images larger than your TV right into your living room. Ideal for use with the latest HD players and consoles the bright H105 delivers immersive 3D visuals in exceptional HD quality.

Using the latest DLP technology the H105 displays bright, colourful images with exceptional light and shade detail only possible with a high contrast projector. You can even hook it up to external speakers for a greater audio experience. All this in such a compact size, means the H105 is also your perfect partner for sharing this mind-blowing experience with everyone, anywhere anytime! possible with a high contrast projector.

## Lights on Entertainment

The H105 produces fantastic images even when the lights are on. Designed to be used in the same way as your conventional TV, the high brightness H105 can be used for television and film watching or playing the latest motion-controlled games without even dimming the lights.

## Full 3D

Using the inherent speed of DLP technology, The Optoma H105 Full 3D projector can display true 3D content from almost any 3D display device, including 3D Blu-ray, PS3, Xbox and Sky3D.

## High Contrast

DarkChip3™ technology from Texas Instruments combined with Eco+ produces a stunning 20,000:1 contrast ratio. Bright scenes are crisp and clear, while dark scenes remain detailed with deep blacks which gives exceptional light and shade detail.

## 24p

Most movies are shot at 24 frames per second. To preserve the purity of the original image the H105 can accept High Definition sources at 24 frames per second and so to display movies exactly as the director intended.

## Amazing Colours

The H105 incorporates BrilliantColor™ multi-colour processing technology to bring stunning, vibrant colour to your screen. You can even fine tune colours for ultimate precision.

## BrilliantColor™

With

## Colour Guarantee

We are so confident that the H105 image colour quality will remain as good as the day you bought it that Optoma will guarantee it for five years.

## Long Lamp Life

The new lamp technology incorporated into the H105 extends lamp life up to an incredible 6500 hours<sup>2</sup>. If you watch a two hour movie every day then typically the lamp will last for over 9 years.

## Quick Resume

Save time by not waiting for the projector to cool down before it can power up again. If the projector is accidentally turned off, this feature allows the projector to be instantly powered on again, if selected within a period of 100 seconds.

# DLP® Technology – The greatest 3D home cinema experience!

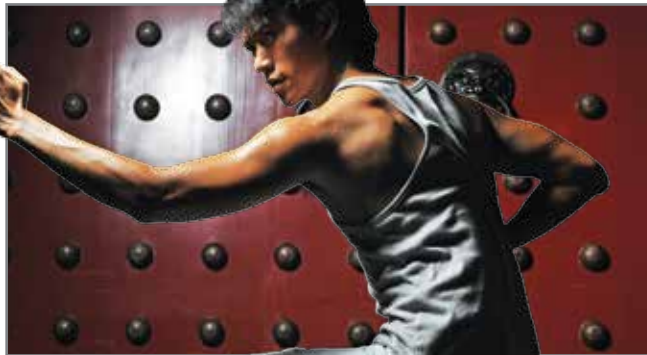

Unlike competing technologies, DLP® from Texas instrument uses millions of tiny mirrors to maximise the available light output, while the inherent speed & high ANSI contrast work in perfect harmony; eliminating crosstalk, to create the most vivid & compelling 3D experience available anywhere.

## Why use a projector for 3D?

It is a widely accepted fact that the bigger the image, the greater the 3D effect - for the best results it is essential to fill your field of vision, without having to be too close to the screen. Even a huge 50" TV can only create a window on the 3D world, whereas the immersion & excitement created by a projection screen makes you feel like you are part of the action!

## 3D Movies:

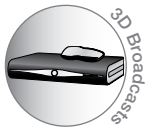

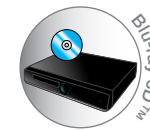

Now that all the latest 3D movies have arrived on Blu-ray 3D™ you can enjoy the same jaw-dropping 3D cinema experience at home, now in fantastic High definition.

## 3D Sports:

Couldn't get tickets for the big match? - The H105 brings the big picture home like never before. With more matches broadcast in 3D every season, you'll never miss the great moments in sporting history and you can re-live them time after time as though you were actually there.

## 3D Gaming:

Set your sights on the H105 for the greatest 3D gaming experience. With an impeccable response time you can line-up the perfect shot while sniper-rounds whizz past you; watch burning ships zoom off into the distance; dodge axe-wielding zombies lurching out of the screen – the possibilities are endless. Combine this with active-motion gaming for the closest thing to your very own virtual reality suite.
