

New Product Summary

Lightweight, super bright, micro-portable projector

Powered by 3LCD technology, the Epson EMP-1707 combines a lightweight, compact design with XGA resolution and an industry leading brightness of 2500 ANSI lumens. Packed with advanced features this projector is the ideal mobile presentation solution.

Perfectly projected images wherever you are

When you are on the move can you be sure the conditions will be right for your presentation?

With the Epson EMP-1707, clear and natural images are guaranteed in the lightest room, thanks to the innovative Epson E-TORL lamp technology which provides super bright images rated at 2500 ANSI lumens.

Your projected image will also be perfect in any sized room. Even in a small meeting room you will be able to project a 60" screen from a distance of only two meters.

A truly mobile solution

Weighing only 1.6kg and supplied with a compact, stylish carrying case this 3LCD projector is the perfect travel companion.

When you are on the move, peace of mind is ensured because ease-of-use and Epson's high reliability are designed in to the EMP-1707, backed up by the standard 3 year next day on site warranty.

Ready in seconds – simply plug and project

All that is needed to set up your projector is to plug it in, connect your source and within seconds you are ready to present. The projected image is instantly aligned thanks to automatic vertical keystone correction, and the projection level can be easily adjusted using the single foot release lever. When you have finished your presentation, simply switch off and pack away. With the instant off button there's no waiting around for the projector to cool down.

- **Incredibly bright and lightweight** - 2500 ANSI Lumens, only 1.6kg
