## BIG NEWS FOR BIG PRESENTATIONS

Looking for brilliant performance, innovative features and high-end technology? The Epson EB-Z8000-series gives you that and more.

Introducing the first-ever 3LCD WUXGA projector

Epson brings you the world's first dual lamp WUXGA Epson EB-Z8000WU and the new WXGA Epson EB-Z8050W. Both models feature innovative new lamps and 3LCD technology suitable for any large venue or event.

Bringing together 3LCD and optical technology

Epson brings 20 years of technology to a unique range of high brightness projectors. All 3LCD projectors use a 3-chip, solid-state optical engine to deliver incredibly bright, true-to-life colour, creating an astonishing level of realism. The three colour images are combined using a prism to form a full-colour image consisting of millions of colours. With pure 3LCD plus the powerful 6000 lumens dual lamp system, you enjoy the best picture quality and projector performance.

Colour Light Output, the new metric for projector brightness

Epson provides Colour Light Output specification data. Colour Light Output measures a projector's ability to deliver colour, providing users with a simple, accurate and easy way to evaluate projector colour performance.
