Powerful LCD installation projector with an RB laser light source supports new, demanding projection applications.

Powerful Tools

- Multi-display support with Picture by Picture/Picture in Picture.
- TileMatrix (internal multi-screen splitter) enables 4Kx2K resolution utilizing 4 projectors without the need for external hardware.
- Built-in daisy chain capabilities support multi-display applications.
- Seamlessly blend multiple images with integrated edge blending capabilities.

Integrated

- 4K Ready - Display stunning 4K 60P content using Sharp's proprietary high performance video processing/scaling chip without the loss of critical details.
- Integrated software applications such as AMX Beacon, Crestron Roomview, Extron XTP and PJ Link allow for complete control system support.
- Learning of basic control of competitors product reduces the need for reprogramming of a control system lowering the cost of your installation by eliminating the need for costly reprogramming of a control system. (Supports competitors commands, call Sharp for complete list.)

Flexible

- Enjoy greater installation flexibility with motorized bayonet style lenses providing quick and easy exchanges. Lens throw distances range from 4.25 to 141ft.
- Roll-free installation capabilities make this projector ideal for almost any install environment, including portrait orientation.

Laser

- RB (Red and Blue) Laser system achieves 92% of the DCI color space bringing content to life.
- Images appear immediately after power on due to instantaneous start up of the laser.
- Inorganic optical components create longer lifetime and greater peace of mind.

Filter Free

- Filter free LCD laser projector that is virtually maintenance free!
- IP5X certified Sealed LCD cooling system prevents dust from reaching the optics and eliminates the need for a filter.
- External air never enters the optical path.
- Dust artifacts cannot influence picture quality or decrease image brightness.

Stacking correction

Continuing with Sharp's full installation feature set, the A Series includes built-in stacking correction capabilities (up to four projectors). Staking correction allows the projectors to boost an image's brightness up to 80,000 lumens, which is ideal for larger-sized screens and environments with heavy ambient light. This feature also prevents the complete loss of an image, which can happen when using only one projector.

Edge blending

This function seamlessly blends multiple projected images to display a single high-resolution image.

ProAssist™

Projector management software for installation professionals provides full projector control for multiple screens to create the perfect image. Controls such as input switching, picture, lens, edge blending, uniformity and gamma control are adjustable through the GUI.

ProAssist™

Built-In HDBaseT Support

Simplify your installations with HDBaseT. Optimized for video applications and supporting uncompressed full HD digital video, audio, ethernet, power and various control signals. With only a single cable (up to 100m) to run, infrastructure and labor costs are reduced, installations are significantly easier, and there is no cable clutter to manage. With uncompressed HD video support, images have never been more stunning. What's more, control signals are contained in the same cable.

Get Connected with a Wide Selection of Inputs

- Multiple Digital computer inputs ensure quick switching between presentations.
- Three audio inputs (HDMI1™ & HDMI2™ and HDBaseT) make it easy to add sound to enhance your presentations.

Digital Inputs

Among the A Series' wide selection of inputs are dual HDMI w/HDCP and HDBaseT w/HDCP for connecting to high-definition sources such as Blu-ray players, cable boxes, satellite receivers and personal computers.

Remote control

Wired and wireless backlit remote allows you to adjust for complete control of the projectors menu structure in a well lit or dark environment. Direct controls such as lamp mode, aspect ratio, volume and input selection eliminates multiple button pushes.

Adaptive Focus Control

Automatically compensates for focus shifts caused by changes in light amount.

Advanced Software Features

Geometric Correction

Projecting an image isn't confined to a standard flat screen or wall with the A Series. Geometric correction allows these models to project an image on spheres, cylinders, corner angles and many more non-standard surfaces.

Screen Splitter

Sharp is committed to bringing the latest and greatest innovation to projectors. Multi-display capabilities and TileMatrix technologies are integrated into the new A Series projectors. This processing is all done internally and therefore eliminates the additional hardware typically required to produce a beautiful 4K resolution image.

Screen Splitter (Multi Display) by Daisy Chain

Roll Free

When installation requirements dictate the projector needs to be placed at different angles the A Series with Roll Free capabilities assures it is the correct projector of choice.

Synchronous Control

When operating multiple projectors, such as multi-screen or stacked, orders to one set are reflected to all other sets. One projector can be used as a reference to synchronize the other three projectors. For example, if you use Shutter in Main, all the subs are also linked.

Unique Features

Variable audio-out enables the remote control to be used to adjust volume of self-powered external speakers that are connected to the projector. In stand-by mode, the audio-out stays active, allowing the last input used to pass to the self-powered external speakers.

Advanced AccuBlend™ ensures detailed images when non-native resolution sources are connected to the projector.

64-step image magnification with location control.

Built-in HTTP page for control and monitoring over a LAN network. Email notification of error messages or lamp end-of-life can be sent to remote locations.

Limited Warranty

Registered owners receive a five (5) years or 20,000 hours (whichever comes first) parts and labor warranty including InstaCare next business day exchange.

In the Box

Remote control, batteries, power cord, user's manual on CD-ROM, quick start guide, product registration card.
