LCD laser installation projectors extreme brightness captivates audiences in conference rooms, auditoriums and sanctuaries

Flexible Installation

- Enjoy greater installation flexibility with motorized bayonet style lenses providing quick and easy exchanges. Lens throw distances range from 2.5 to 68.5 ft
 - New UST lens placing the projector above the screen and out of site (installation may place the projector above the ceiling line)
- Roll-free installation capabilities make these projector ideal for almost any install environment, including portrait orientation

Long Lasting Laser

- Images appear immediately after power on due to instantaneous start up of the laser
- Dual blue laser systems provide best in class white balance over the life of the projector
- Inorganic optical components create longer lifetime and greater peace of mind

Stacking correction

The industry's first built-in stacking correction capabilities (up to four projectors) allows the projectors to boost an image's brightness up to 32,000 lumens, which is ideal for larger-sized screens and environments with heavy ambient light. This feature also prevents the complete loss of an image, which can happen when using only one projector.

Edge blending

This function seamlessly blends multiple projected images to display a single high-resolution image.

ProAssist™

Projector management software for installation professionals provides full projector control for multiple screens to create the perfect image. Controls such as input switching, picture, lens, edge blending, uniformity and gamma control are adjustable through the GUI.

ProAssist™

Built-In HDBaseT Support

Simplify your installations with HDBaseT. Optimized for video applications and supporting uncompressed full HD digital video, audio, ethernet, and various control signals. With only a single cable (up to 100m) to run, infrastructure and labor costs are reduced, installations are significantly easier, and there is no cable clutter to manage. With uncompressed HD video support, images have never been more stunning. What's more, control signals are contained in the same cable.

Remote control

Wired and wireless backlit remote allows you to adjust for complete control of the projectors menu structure in a well lit or dark environment. Direct controls such as lamp mode, aspect ratio, volume and input selection eliminates multiple button pushes.

Cable Cover

This optional accessory creates a clean look for your installation, while hiding signal cables and the power cord.

Powerful Tools

- Multi-display support with Picture by Picture/Picture in Picture
- Seamlessly blend multiple images with integrated edge blending capabilities

Filter

- 10,000-hour filter life
- Sharp is committed to designing its products to provide long lifecycles
- This virtually maintenance-free filter reduces the frequency at which cleaning is required, thereby decreasing total cost of ownership

Cornerstone

Enhanced keystone correction allows for horizontal, vertical and diagonal image correction for aligned images even when the projector is set up at an angle to the screen.

Integrated

- 4K Ready - Display stunning 4K30 content using Sharp's proprietary high performance video processing/scaling chip without the loss of critical details. HDR10 and BT.2020 signals from "Ultra HD Blu-ray" and "4K TV broadcasting" are supported on all digital inputs
- Integrated software applications such as AMX Beacon, Crestron Roomview, Extron XTP and PJ Link allow for complete control system support
- Lower the cost of your installation by eliminating the need for costly reprogramming of a control system. (supports competitors commands, call Sharp for complete list)

Geometric Correction

Projecting an image isn't confined to a standard flat screen or wall with the Sharp V Series. Geometric correction allows these models to project an image on spheres, cylinders, corner angles and many more non-standard surfaces.

Legacy Support

Customers utilizing previous generation NEC projectors can use their existing lenses. Eliminates the costly expense of purchasing a new lens. The time consuming efforts and costs associated with reinstallation are eliminated. Supports the legacy manually adjustable lenses, NP11FL, NP12ZL, NP13ZL, NP14ZL and NP15ZL.

Roll Free

When installation requirements dictate the projector needs to be placed at different angles the V Series with Roll Free capabilities assures it is the correct projector of choice.

Unique Features

Optional short and long throw lenses available for maximum installation flexibility.

HDBaseT input provides a single connection for uncompressed full HD digital video, audio, ethernet and various control signals

Competitor command support reduces the need for reprogramming basic controls

Warranty

Registered owners receive a five (5) years or 20,000 hours (whichever comes first) parts and labor warranty including InstaCare next business day exchange.

In the Box

Remote control, batteries, power cord, cable cover, quick start guide, product registration card.

Accessories

RMT-PJ40	Replacement Remote Control
Optional Lenses	XP-40ZL, XP-41ZL, XP-43ZL, XP-44ML, XP-50ZL
Optional terminal Cover	XP-10CV-B, XP-10CV-W
PA600CM	Ceiling Mount
AEC006009	Adjustable Extension Column, 6" - 9"
AEC012018	Adjustable Extension Column, 12" - 18"
AEC0203	Adjustable Extension Column, 2" - 3"
AEC0305	Adjustable Extension Column, 3" - 5"
XP-01LK	Mounting Bracket for XP-44ML

Ordering Model Numbers
